Where it stands

Its grades against its category, and whether to keep it or make your own

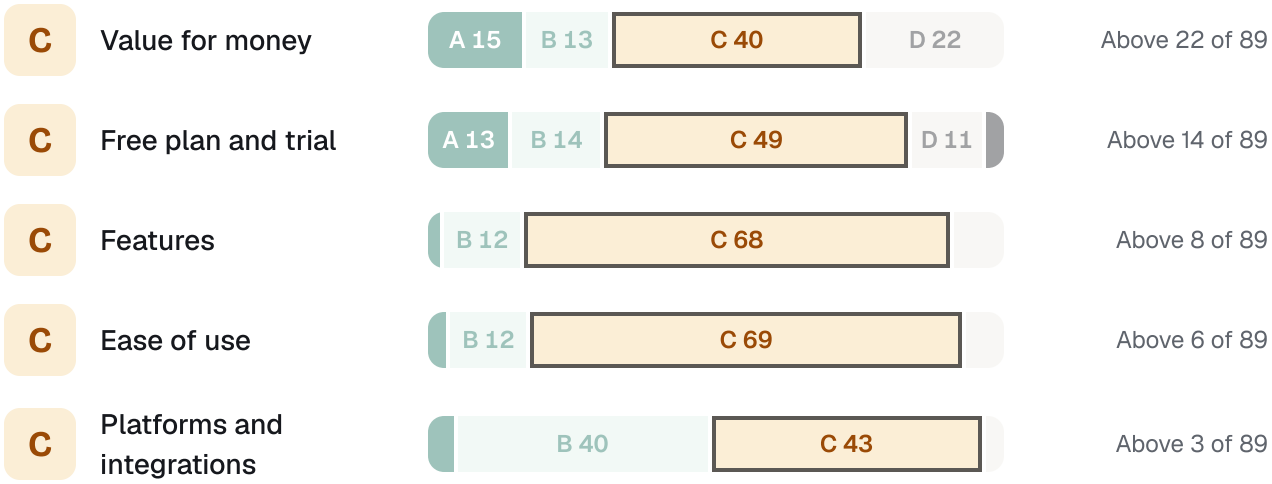

20/89

Other presentation tools it is graded above

PopAi's GPA of 2.0 is higher than 20 of the 89 other presentation tools we grade, and level with 16.

Each grade against the category

Every bar is all 90 presentation tools we grade, cut by the letter each got. PopAi's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace PopAi you would be making an AI model, which you can rent by the request but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 53 of the 89 other presentation tools grade higher.

What you could not

- ✕ An AI model, which you can rent by the request but not make.
- ✕ A slide editor.

What this rests on. PopAi's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
