07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Post for Me's own pages, its app-store listings and our grades. Every fact in it is on Post for Me's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 6 of the 90 other social media schedulers we grade

Post for Me is an API that lets a product publish posts, read feeds and pull analytics across nine social platforms through one endpoint. Developers can use Post for Me's own platform credentials or bring their own. Plans are tiered by successful posts per month, with unlimited accounts and team members.

To get you started, here are **8 things to know about Post for Me**, taken from its own pages and our grades.

> "
>
> **It's an API, so you need to write code and, for white-label, get platform developer approval.**
>
> From our grade for ease of use

1 **Best for a posting API priced by post volume**

Post for Me is an API for publishing, feeds and analytics across nine networks, with unlimited accounts and team members.

2 **Paid plans start at $10 a month**

As its pricing page puts it: $10 per month for up to 1,000 successful posts.

3 **It runs on Web**

Web.

4 **Unified posting endpoint**

Create, schedule and publish text, images and video to every connected platform with a single API call.

5 **Feeds and analytics**

Fetch content from connected accounts and read views, likes, shares and engagement for posts.

6 **Quickstart or white label**

Start on Post for Me's credentials with no platform approval, or use your own developer credentials so users see your app name.

7 **A 1.8 GPA, above 6 of 90**

That is against the other social media schedulers we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace Post for Me you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

Post for Me at a glance

PRICING Paid, from $10 per month for up to 1,000 successful posts	FREE PLAN No
FREE TRIAL None stated	RUNS ON Web
MADE BY Day Moon Development	CATEGORY Social Media Schedulers
OUR GRADE 1.8 GPA, weak	

The report card

Best for a posting API priced by post volume

Post for Me is an API for publishing, feeds and analytics across nine networks, with unlimited accounts and team members. There's no free plan or trial, it's for developers rather than people who want a calendar, and the price steps up with the number of posts a month.

TOOLGPA REPORT CARD

Post for Me

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	B	$10 a month for up to 1,000 successful posts, inside the $14 cheaper quarter. It steps to $25, $50, $75 and on to $500 for 100,000 posts.
Free plan and trial	F	No free plan and no trial are listed; the entry is a $10 paid plan.
Features	C	One posting endpoint, feeds and analytics, SDKs, webhooks and an MCP server. The listing itself says it's not a scheduler with a content calendar.
Ease of use	D	No store rating on record. It's an API, so you need to write code and, for white-label, get platform developer approval.
Platforms and integrations	B	Web dashboard and API with SDKs, webhooks and an open-source side. Nine networks, and no desktop or phone app.

Grade point average — Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Post for Me is for

- ✓ Fits if you build an app that needs to publish to several networks
- ✓ Works for developers who'd rather pay by post volume than by account

Who it is not for

- ✕ Not for you if you want to try before paying, as there's no free plan or trial
- ✕ Skip it if you want a content calendar, because this is an API
- ✕ Tight if you post a lot: 1,000 posts a month at $10, 10,000 at $75
- ✕ Watch out: with Quickstart credentials your users see Post for Me at sign-in, and white-label needs platform developer approval

Good to know

Good for

- ✓ SaaS teams adding social posting to their product
- ✓ Builders of schedulers or AI content tools who want one integration
- ✓ Developers who prefer a flat monthly price over per-account fees

Worth knowing

- ⓘ It is an API for developers, not a ready-made scheduler with a content calendar.
- ⓘ Pricing steps up by monthly successful post volume; the vendor says going over a limit is not charged automatically.
- ⓘ With Quickstart credentials, users see "Post for Me" during the sign-in step; a white-label setup needs platform developer approval.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$10
A month to start

Post for Me is a paid product, starting at $10 per month for up to 1,000 successful posts.

PRO, UP TO 1,000 POSTS

$10

per month for up to 1,000 successful posts

Unlimited social accounts, API keys and team members; feeds and analytics included.

PRO, UP TO 10,000 POSTS

$75

per month for up to 10,000 successful posts

Same features as the entry tier. Steps between include 2,500 posts for $25 and 5,000 for $50.

PRO, UP TO 100,000 POSTS

$500

per month for up to 100,000 successful posts

Same features; the top listed tier is 200,000 posts for $1,000 a month.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Social media posting API for apps, priced by post volume. Here is what it does, as its own site describes it, and what it covers: open source, public API, AI agents, reports.

> **One posting endpoint, feeds and analytics, SDKs, webhooks and an MCP server.**

From our grade for features

Unified posting endpoint

Create, schedule and publish text, images and video to every connected platform with a single API call.

Feeds and analytics

Fetch content from connected accounts and read views, likes, shares and engagement for posts.

Quickstart or white label

Start on Post for Me's credentials with no platform approval, or use your own developer credentials so users see your app name.

SDKs and webhooks

Libraries for JavaScript, TypeScript, Python, Ruby and Go, plus webhooks for account connections and post status.

MCP server

A documented MCP server lets AI tools call the API.

Open source

The vendor says the code is open source and public on GitHub.

Where it runs

What it works with

- TikTok
- Facebook
- Instagram
- X (Twitter)
- LinkedIn
- Pinterest
- Bluesky
- Threads

Post for Me is made by Day Moon Development.

Where it stands

Its grades against its category, and whether to keep it or make your own

6/90

Other social media schedulers it is graded above

Post for Me's GPA of 1.8 is higher than 6 of the 90 other social media schedulers we grade, and level with 12.

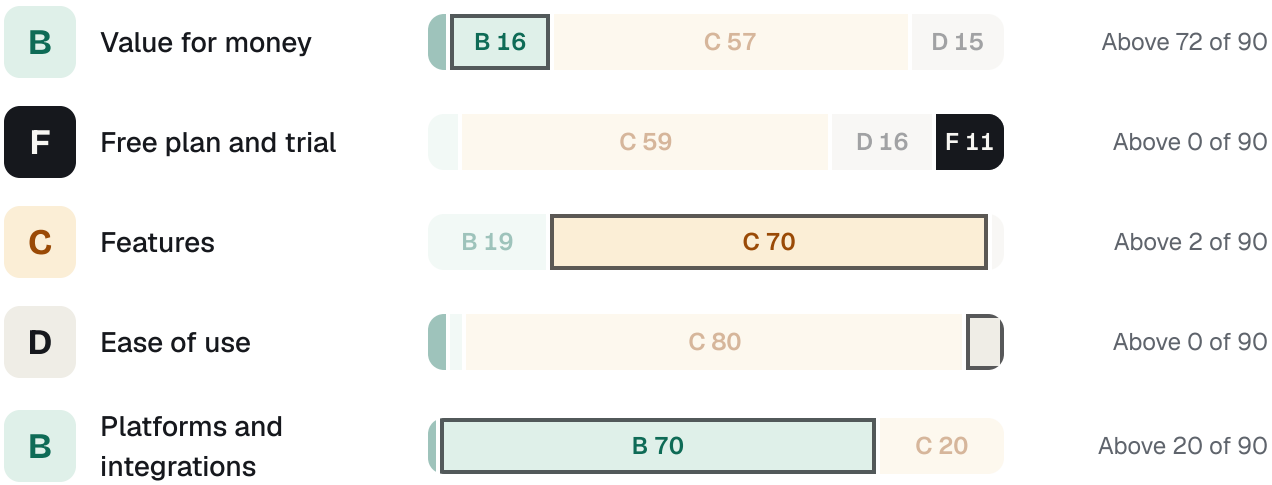

It stands best on value for money (B, above 72 of 90) and worst on free plan and trial (F, above 0).

Its paid plans start at $10 a month, against a middle price of $24.46 for the category: 12 of the 79 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 9 tools score higher and cost less.

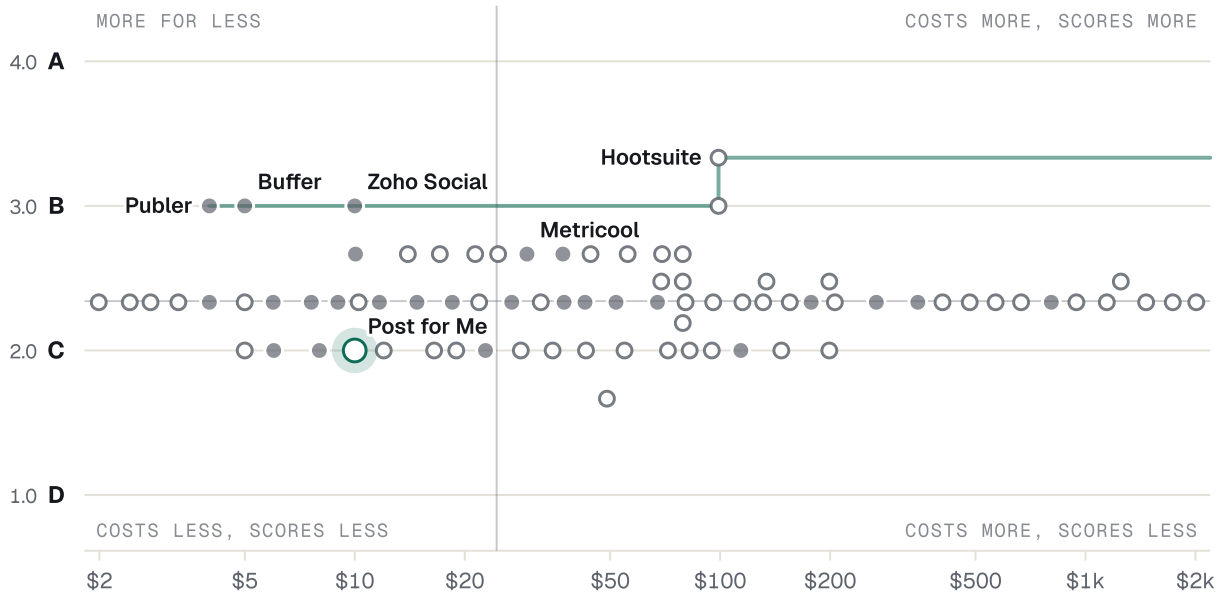

Each grade against the category

Every bar is all 91 social media schedulers we grade, cut by the letter each got. Post for Me's own letter is outlined.

Price against what you get

Each dot is one of 80 social media schedulers. Further left costs less; higher up scores better on features, ease of use and platforms. Post for Me is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Post for Me you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 72 of the 90 other social media schedulers grade higher. It costs $120 a year. Post for Me is open source, so there is a third way: take its code and run it yourself.

What you could make

- Reports: an app builder makes this well.

What you could not

- An AI agent, with the models and the safeguards behind it.
- It plugs into other products, TikTok, Facebook and Instagram among them, and has an API.

What this rests on. Post for Me's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Zernio, Ayrshare, Upload-Post, Bundle Social and Postiz

The 5 tools Post for Me is most often weighed against, with where each one differs from it.

2.4 GPA

Zernio

Free plan · from $6/mo

One API for posting, messaging and ads across social networks.

- Zernio has a free plan. Post for Me does not.
- Post for Me is open source, according to its own site.
- Zernio also covers business texting and whatsApp messaging.

Post for Me and Zernio compared in full

1.6 GPA

Ayrshare

Free trial · from $129/mo

Social media API for posting, analytics and comments in your product.

- Post for Me is open source, according to its own site.

Post for Me and Ayrshare compared in full

2.2
GPA
