It stands best on free plan and trial (B, above 101 of 149) and worst on ease of use (C, above 7).

Its paid plans start at $9 a month for each person, against a middle price of $9 for the category: 57 of the 121 others that charge start lower.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Project Insight you could make: tasks, Gantt & timelines, kanban boards, time tracking and reports. What surrounds it you could not. The 5 things listed below take a company, not a weekend.

It costs $108 a year.

What you could make

- Tasks, Gantt & timelines, kanban boards, time tracking and reports: an app builder makes these well.

What you could not

- A real app for iOS and Android. Something home-made would be a web page.
- It is priced for each person, which means accounts and billing for a team.
- It plugs into other products, Microsoft 365, Microsoft Teams and Slack among them, and has an API.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Project Insight's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
