Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 18 of the 38 other email verification and deliverability tools we grade

Proofy verifies email addresses without sending a message, labeling each as valid, invalid, risky or unknown and flagging disposable, catch-all and role-based ones. Lists go in as CSV or TXT files, and a REST API, bulk and batch endpoints, a JavaScript widget and webhooks cover automated use. Credits do not expire and duplicate or unknown results are not charged.

To get you started, here are **8 things to know about Proofy**, taken from its own pages and our grades.

1 **Best for cheap email list checks by the credit**

Proofy verifies email lists with credits that never expire and does not charge for unknowns, starting at $5 for 5,000.

2 **What it costs**

Paid plans start at $5 one-time for 5,000 credits.

3 **It runs on Web**

Web.

4 **Bulk verification**

Upload a .txt or .csv file up to 65 MB; result columns are added to the original file and the data layout is kept.

5 **API, widget and webhooks**

Single, bulk and batch API endpoints plus a JavaScript widget and webhook support, documented at docs.proofy.io.

6 **Risk and type detection**

Flags disposable, catch-all, role-based and mailbox-full addresses and shows the mail provider behind each one.

7 **A 2.4 GPA, above 18 of 38**

That is against the other email verification and deliverability tools we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

Nothing Proofy does is plain enough to make in a weekend. The 5 things listed below take a company.

The report card

Best for cheap email list checks by the credit

Proofy verifies email lists with credits that never expire and does not charge for unknowns, starting at $5 for 5,000. Only that $5 trial pack has a price on the page, there is no free plan, and risky and unknown results still come back for catch-all servers.

TOOLGPA REPORT CARD	Proofy	Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	B	$5 for 5,000 credits, under the $8 middle for one-time prices in the category. The page shows no price for larger packs or subscriptions.
Free plan and trial	D	No free plan and no free trial. There is a free single-address checker, but a list costs the $5 pack.
Features	B	Bulk verification, an API, a widget and webhooks, with risk and type detection. Catch-all servers can still return Risky or Unknown.
Ease of use	C	No store rating on record. You upload a list or wire up the API, a few steps.
Platforms and integrations	B	Web dashboard and API, with a widget and webhooks. No integrations or apps are listed.
Grade point average		Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Proofy is for

- ✓ Fits if you have one list to clean and want to pay about $5
- ✓ Works for developers who want an API and a sign-up widget

Who it is not for

- ✕ Tight if you want to try it free, as only a single-address checker is free
- ✕ Watch out: larger packs and subscriptions showed no prices when the page was read
- ✕ Watch out: the vendor says verification does not guarantee delivery
- ✕ Watch out: there is no desktop or mobile app

Good to know

Good for

- ✓ Cheap one-off tests of a list before committing to volume
- ✓ Teams that want credits that never expire

Worth knowing

- ⓘ The only price shown on the pricing page is the $5 trial pack; larger packages and subscriptions are set with a volume selector that showed no prices when read.
- ⓘ Catch-all and restricted mail servers can come back Risky or Unknown, and the vendor says verification does not guarantee delivery.
- ⓘ Web dashboard and API only; there is no desktop or mobile app.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

18/38

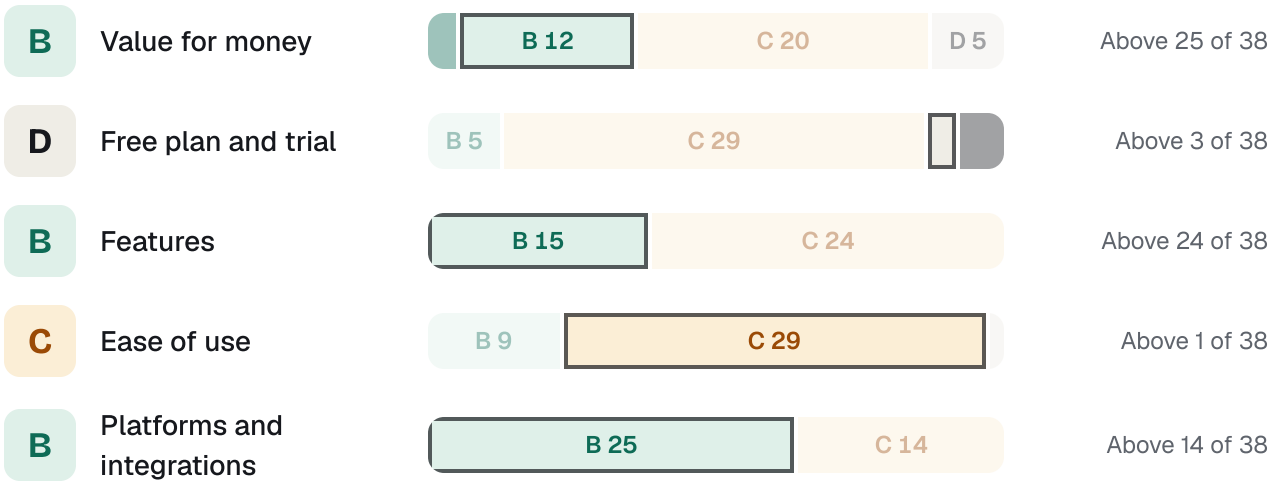

Other email verification and deliverability tools it is graded above

Proofy's GPA of 2.4 is higher than 18 of the 38 other email verification and deliverability tools we grade, and level with 12.

It stands best on value for money (B, above 25 of 38) and worst on free plan and trial (D, above 3).

Each grade against the category

Every bar is all 39 email verification and deliverability tools we grade, cut by the letter each got. Proofy's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Nothing Proofy does is plain enough to make in a weekend. The 5 things listed below take a company.

It costs $5, paid once.

What you could not

- ✕ Checking that an address exists without writing to it.
- ✕ An API that other software can build on.
- ✕ Hooks into the device itself: widgets.
- ✕ What a company asks for before it lets staff use something: roles and permissions.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Proofy's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
