Where it stands

Its grades against its category, and whether to keep it or make your own

35/63

Other customer review tools it is graded above

ProvenExpert's GPA of 2.4 is higher than 35 of the 63 other customer review tools we grade, and level with 19.

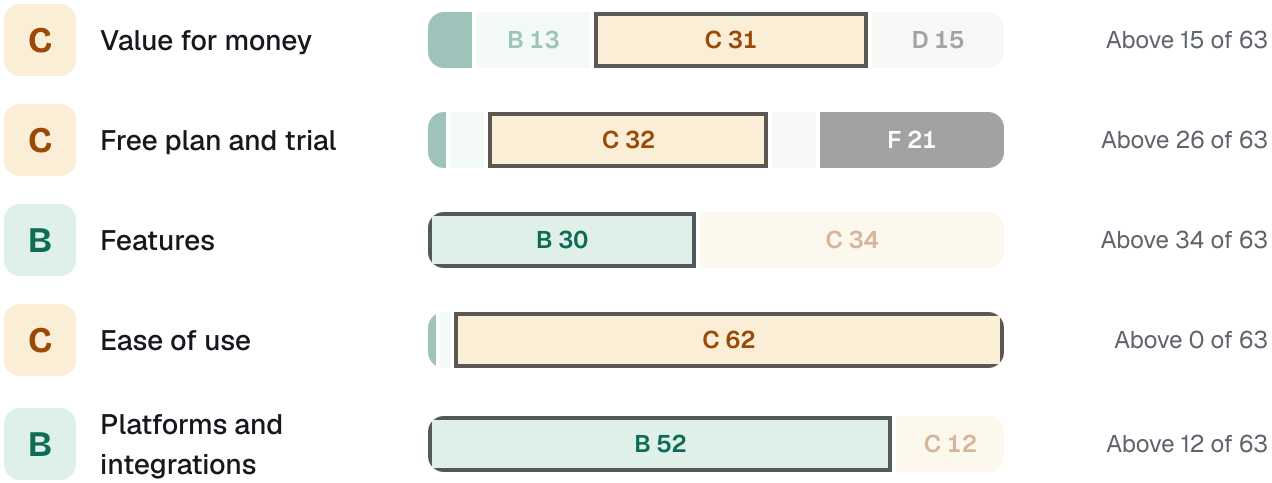

It stands best on features (B, above 34 of 63) and worst on ease of use (C, above 0).

Its paid plans start at $39.99 a month, against a middle price of $29 for the category: 31 of the 50 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

Each dot is one of 51 customer review tools. Further left costs less; higher up scores better on features, ease of use and platforms. ProvenExpert is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of ProvenExpert you could make: review collection, surveys and qR codes. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

It costs $479.88 a year.

What you could make

- Review collection, surveys and qR codes: an app builder makes these well.

What you could not

- It plugs into other products, Google and Yelp among them, and has an API.

- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. ProvenExpert's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
