Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 38 of the 149 other project management tools we grade

ProWorkflow is a web-based project management tool for service businesses such as agencies, consultancies and construction firms. It combines tasks, time tracking, quoting, invoicing and project budgets so a team can see profitability as work happens. Plans are priced per user, and a free 14-day trial is offered.

To get you started, here are **9 things to know about ProWorkflow**, taken from its own pages and our grades.

1 **Best for project, time and invoicing for small agencies**

ProWorkflow does tasks, time tracking, invoicing, quoting and resource planning, from $18 per user a month billed yearly.

2 **Paid plans start at $18 a month for each person**

As its pricing page puts it: $18 per user / month, billed annually ($20 billed monthly).

3 **You can try it first**

14-day free trial, no credit card required

4 **It runs on Web**

Web.

5 **Tasks and templates**

Tasks can be added to a project, kept as general tasks outside any project, or built from task templates for repeat work.

6 **Time tracking and invoicing**

Tracked time can feed invoices and connect to accounting software such as Xero and QuickBooks.

7 **Quoting and estimating**

Quotes and estimates can be turned into invoices, with templates for both.

8 **A 2.2 GPA, above 38 of 149**

That is against the other project management tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

The plain part of ProWorkflow you could make: tasks, time tracking, invoicing, quotes and estimates and Gantt & timelines. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

Who ProWorkflow is for

- ✓ Fits if you run client projects and want time, quotes and invoices together
- ✓ Works for agencies that use Xero or QuickBooks

Who it is not for

- ✗ Pricey if you want more than the basics: Advanced is $27 per user a month
- ✗ Tight if you are a small group, as Advanced needs at least 5 users
- ✗ Not for you if you want a mobile app, as none is listed
- ✗ Watch out: on-premise hosting and LDAP sync need Enterprise, and the page shows $29 where its data shows $27

Good to know

Good for

- ✓ Agencies, consultancies and construction firms that bill clients by project or hour
- ✓ Teams that want tasks, time, quotes and invoices in one place
- ✓ Small teams: Professional is sold from a single user

Worth knowing

- ⓘ The Advanced plan has a 5-user minimum.
- ⓘ The pricing page's visible annual figure for Advanced differs from the price data it loads ($29 versus $27); this entry uses the loaded figure.
- ⓘ Recurring projects, custom project fields and custom intake forms need Advanced; on-premise hosting and LDAP sync need Enterprise.
- ⓘ No native desktop or mobile apps are listed on the pages read; the product is used in the browser.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Project, task and time management with built-in invoicing. Here is what it does, as its own site describes it, and what it covers: public API, tasks, Gantt & timelines, time tracking, invoicing, quotes and estimates.

> **Tasks and templates, time tracking and invoicing, quoting, resource planning and profitability tracking.**

> From our grade for features

Tasks and templates

Tasks can be added to a project, kept as general tasks outside any project, or built from task templates for repeat work.

Time tracking and invoicing

Tracked time can feed invoices and connect to accounting software such as Xero and QuickBooks.

Quoting and estimating

Quotes and estimates can be turned into invoices, with templates for both.

Resource planning

A resource planning page shows each person's workload from the time allocated to them, with Kanban and Gantt views, plus a Gantt chart on each project.

Profitability and cost tracking

Budgets, time, expenses and materials are tracked per project so profitability can be checked while the work runs.

Custom intake forms

Client briefs can be collected through intake forms and turned into projects (Advanced plan).

Where it stands

Its grades against its category, and whether to keep it or make your own

38/149

Other project management tools it is graded above

ProWorkflow's GPA of 2.2 is higher than 38 of the 149 other project management tools we grade, and level with 31.

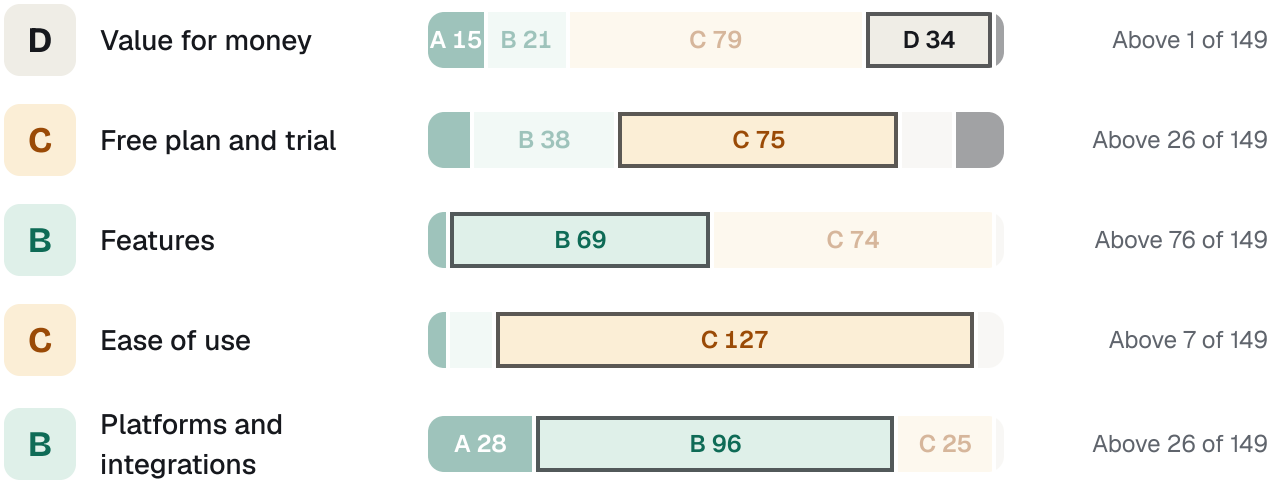

It stands best on features (B, above 76 of 149) and worst on value for money (D, above 1).

Its paid plans start at $18 a month for each person, against a middle price of $9 for the category: 94 of the 121 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 28 tools score higher and cost less.

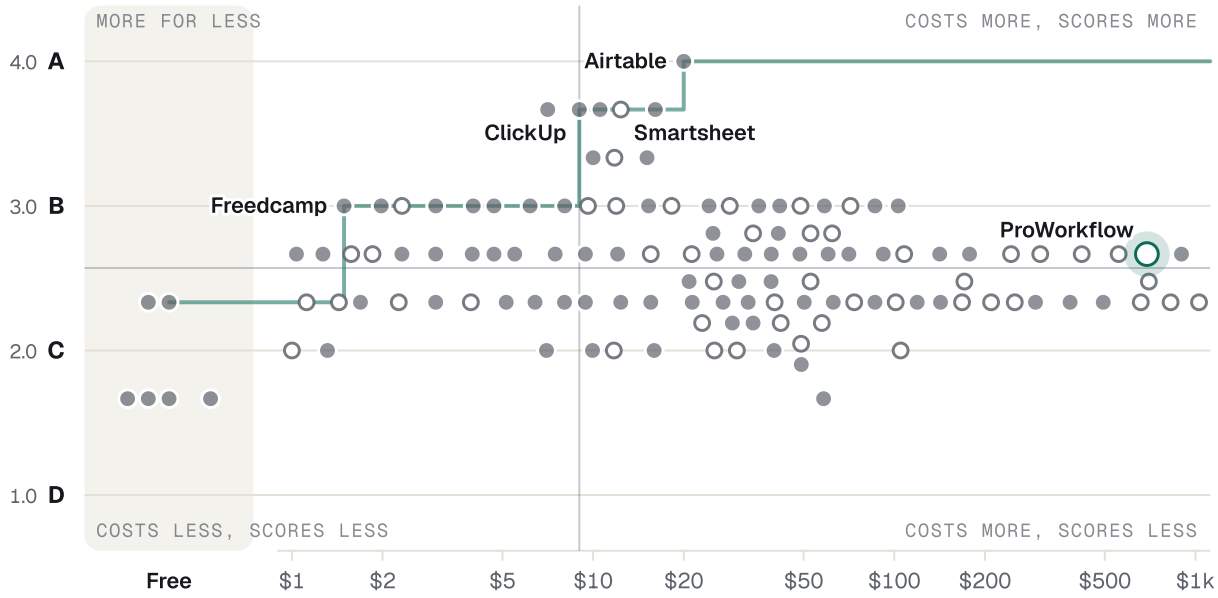

Each grade against the category

Every bar is all 150 project management tools we grade, cut by the letter each got. ProWorkflow's own letter is outlined.

Price against what you get

Each dot is one of 128 project management tools. Further left costs less; higher up scores better on features, ease of use and platforms. ProWorkflow is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of ProWorkflow you could make: tasks, time tracking, invoicing, quotes and estimates and Gantt & timelines. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 80 of the 149 other project management tools grade higher. It costs $216 a year.

What you could make

- Tasks, time tracking, invoicing, quotes and estimates and Gantt & timelines: an app builder makes these well.

What you could not

- It is priced for each person, which means accounts and billing for a team.
- It plugs into other products, Xero, QuickBooks and Zapier among them, and has an API.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. ProWorkflow's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
