Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 2 of the 127 other accounting and invoicing tools we grade

Qoyod is cloud accounting software for small and medium businesses in Saudi Arabia. Its App Store listing describes invoicing, purchases, expenses, inventory, journal entries and reports, plus e-invoicing (Fatoorah) that follows ZATCA requirements. The vendor's website returned an access-denied error, so pricing could not be read.

To get you started, here are **7 things to know about Qoyod**, taken from its own pages and our grades.

> **We couldn't read any price, only an iPhone and iPad app was confirmed, and its App Store score is too thin to lean on.**
>
> From our report card of Qoyod

1 **Best for Saudi accounting with ZATCA e-invoicing**

Qoyod is cloud accounting for Saudi small businesses, with e-invoicing that follows ZATCA rules.

2 **It runs on iOS**

iOS.

3 **Sales and purchases**

Creates sales invoices with pricing promotions and discounts, and records supplier bills, purchase orders and expenses.

4 **ZATCA e-invoicing**

Issues electronic invoices (Fatoorah) that support ZATCA compliance, with a simulation environment for testing before going live.

5 **Journal entries and reports**

Captures daily transactions as journal entries and produces reports on profitability and cash flow.

6 **A 1.6 GPA, above 2 of 127**

That is against the other accounting and invoicing tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Qoyod you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for Saudi accounting with ZATCA e-invoicing

Qoyod is cloud accounting for Saudi small businesses, with e-invoicing that follows ZATCA rules. We couldn't read any price, only an iPhone and iPad app was confirmed, and its App Store score is too thin to lean on.

TOOLGPA REPORT CARD — **Qoyod** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price on record, since the vendor's site blocked the request. That's a C by default.
Free plan and trial	F	No free plan and no trial on record, so nothing to try before paying.
Features	C	Sales, purchases, journals, inventory, reports, POS and ZATCA e-invoicing. The listing doesn't show how deep any of it goes.
Ease of use	C	App Store shows 3.0, but from only 20 ratings, which doesn't count. Accounts and invoicing rules to set up.
Platforms and integrations	C	Only the iPhone and iPad app was confirmed. Web and other platforms couldn't be checked.

Grade point average — Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Qoyod is for

- ✓ Fits if you run a Saudi business and need ZATCA e-invoicing
- ✓ Works for owners who want hourly accountant help with setup

Who it is not for

- ✗ Skip it if you need to know the price first, because none could be read
- ✗ Not for you if you're outside Saudi Arabia, as the listing covers no other country
- ✗ Watch out: only an Apple app was confirmed, so Android or desktop is unknown
- ✗ Watch out: the 3.0 App Store score rests on just 20 ratings
- ✗ Watch out: the vendor site blocked our request, so plans are unconfirmed

Good to know

Good for

- ✓ Saudi small businesses that must issue ZATCA e-invoices
- ✓ Owners who want accounting on an iPhone or iPad
- ✓ Retail, service and online-store businesses in Saudi Arabia

Worth knowing

- ⓘ No prices could be read: the vendor's website blocked the request, so none are recorded here.
- ⓘ Built for Saudi Arabia and its e-invoicing rules; the listing does not describe other countries.
- ⓘ The App Store listing offers hourly accountants for setup and training.
- ⓘ Only the iPhone and iPad app was confirmed; the site was not readable to check other platforms.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Qoyod's current pricing could not be confirmed from its own site.

> **No price on record, since the vendor's site blocked the request.**
>
> From our grade for value for money

We could not confirm Qoyod's current prices from its own site, so this guide lists no plans. qoyod.com has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: iOS

Cloud accounting and ZATCA e-invoicing for Saudi small businesses. Here is what it does, as its own site describes it, and what it covers: invoicing, reports, bookkeeping, expense tracking, inventory.

> **Sales, purchases, journals, inventory, reports, POS and ZATCA e-invoicing.**

From our grade for features

Sales and purchases

Creates sales invoices with pricing promotions and discounts, and records supplier bills, purchase orders and expenses.

ZATCA e-invoicing

Issues electronic invoices (Fatoorah) that support ZATCA compliance, with a simulation environment for testing before going live.

Journal entries and reports

Captures daily transactions as journal entries and produces reports on profitability and cash flow.

Products and inventory

Manages items, prices, quantities and stock counts, when the inventory feature is enabled.

POS and store connections

Syncs with point-of-sale and e-commerce platforms, and links online stores by API where integrations exist.

Where it stands

Its grades against its category, and whether to keep it or make your own

2/127

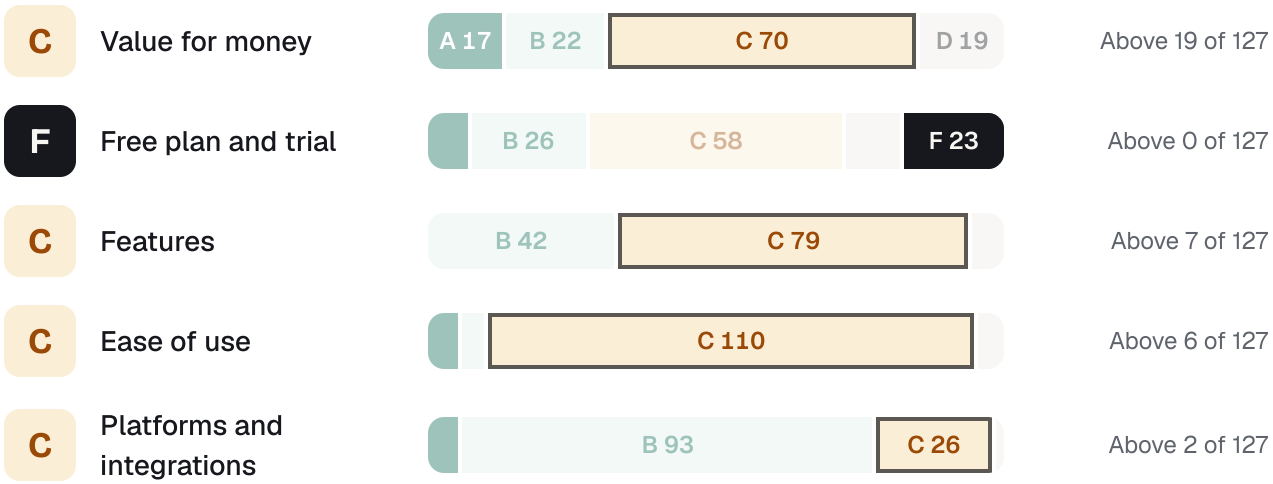

Other accounting and invoicing tools it is graded above

Qoyod's GPA of 1.6 is higher than 2 of the 127 other accounting and invoicing tools we grade, and level with 9.

It stands best on value for money (C, above 19 of 127) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 128 accounting and invoicing tools we grade, cut by the letter each got. Qoyod's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Qoyod you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 116 of the 127 other accounting and invoicing tools grade higher.

What you could make

- Invoicing, inventory, expense tracking and reports: an app builder makes these well.

What you could not

- Live feeds from your bank, which take an agreement with each bank or a service that has them.
- A real app for iOS. Something home-made would be a web page.

What this rests on. Qoyod's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

Where this guide comes from

The prices, plans, platforms and features were read from Qoyod's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Qoyod's own pages on 13 November 2026, and its App Store listing. Not based on using the product, and shorter than our full reviews. The vendor's own site blocked the request, so only its App Store page was read.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades.
