Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 12 of the 37 other QR code generators we grade

QR Code AI makes QR codes for links, vCards, WiFi, social profiles, payments and dozens of other content types, with custom logos, colors and AI-generated art styles. Codes can be edited after creation and tracked, and the site also offers a branded URL shortener, a barcode generator, team workspaces and a built-in scannability check.

To get you started, here are **8 things to know about QR Code AI**, taken from its own pages and our grades.

> From our report card of QR Code AI

1 **Best for branded, trackable QR codes**

But its pricing sits behind a sign-in screen, so we cannot tell you what a paid plan costs or what the free plan stops at.

2 **There is a free plan**

The site invites visitors to start free with no card needed; the limits of the free plan are not published on a page that could be read.

3 **It runs on Web**

Web.

4 **60 content types**

Types include URLs, PDFs, vCards, WiFi, menus, forms, payment links and many social and messaging profiles.

5 **AI art and custom designs**

A QR code art generator works from a template or a text prompt, and the custom generator handles logos, shapes, colors and gradients.

6 **Tracking and analytics**

Compares scans of managed QR codes with Smart Link clicks and offers campaign reports and a UTM builder.

7 **A 2.2 GPA, above 12 of 37**

That is against the other QR code generators we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace QR Code AI you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

Best for branded, trackable QR codes

QR Code AI covers a lot of ground: 60 content types, tracking, custom domains, workspaces and barcodes. But its pricing sits behind a sign-in screen, so we cannot tell you what a paid plan costs or what the free plan stops at. Check that before you build anything on it.

TOOLGPA REPORT CARD

QR Code AI

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published on a page we could read, so it sits at the middle by default.
Free plan and trial	C	The site invites you to start free with no card, but the limits of that plan are not published.
Features	B	60 content types, AI art, scan tracking, contextual routing, custom domains and workspaces. The listing shows no gap in the core job of making and tracking codes.
Ease of use	C	A web app where you build each code yourself, and no store rating is on record.
Platforms and integrations	C	Web only; no desktop or mobile apps are listed. An API is mentioned but its terms were not checked.

Grade point average — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who QR Code AI is for

- ✓ Fits if you want codes with scan tracking and your own domain
- ✓ Makes sense if you will try the free start before paying

Who it is not for

- ✕ Skip it if you need to know the price first, as no pricing page could be read
- ✕ Not for you if you want a desktop or phone app, as it runs in a browser only
- ✕ Watch out: the free plan's limits are not published
- ✕ Watch out: the API and affiliate program are listed, but we did not check their terms

Good to know

Good for

- ✓ Marketers who want styled or AI-designed QR codes with scan tracking
- ✓ Agencies separating client campaigns in team workspaces

Worth knowing

- ⓘ No pricing page could be read: the site's pricing sits behind a sign-in screen, so plan prices and limits are unverified.
- ⓘ The site lists an API and an affiliate program, but their terms were not checked.
- ⓘ It runs in a browser only; no desktop or mobile apps are listed.

What it costs

From our grade for features

60 content types

Types include URLs, PDFs, vCards, WiFi, menus, forms, payment links and many social and messaging profiles.

AI art and custom designs

A QR code art generator works from a template or a text prompt, and the custom generator handles logos, shapes, colors and gradients.

Tracking and analytics

Compares scans of managed QR codes with Smart Link clicks and offers campaign reports and a UTM builder.

Contextual routing

Destination rules send visitors to different URLs by condition, with a route simulator and fallback.

Custom domain and workspaces

Branded QR code and short-link domains, plus team workspaces with roles and separate client campaigns.

Barcodes and short links

A barcode generator covers ten formats, and a URL shortener lets the destination be edited.

Where it stands

Its grades against its category, and whether to keep it or make your own

12/37

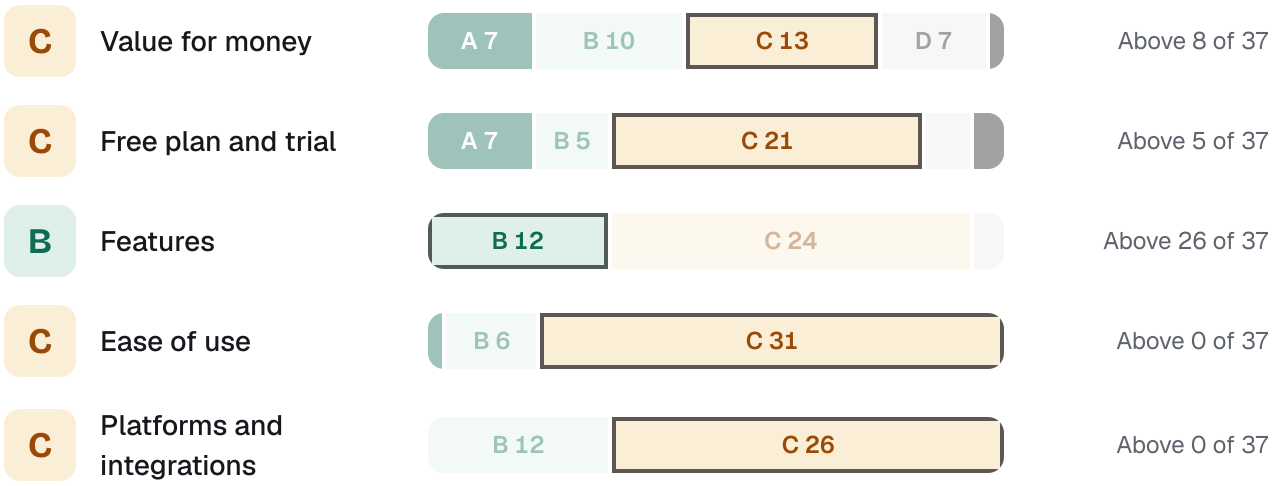

Other QR code generators it is graded above

QR Code AI's GPA of 2.2 is higher than 12 of the 37 other QR code generators we grade, and level with 6.

It stands best on features (B, above 26 of 37) and worst on ease of use (C, above 0).

Each grade against the category

Every bar is all 38 QR code generators we grade, cut by the letter each got. QR Code AI's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace QR Code AI you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 19 of the 37 other QR code generators grade higher.

What you could make

- QR codes: an app builder makes this well.

What you could not

- An image model, which you can rent by the picture but not make.
- A tracking script and a database that counts every visit.
- An API that other software can build on.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. QR Code AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
