Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

You could make the core of QR Code Dynamic for yourself: qR codes.

What you would give up is listed below. Whether that is worth the price is your call. It costs $348 a year.

What you could make

- QR codes: an app builder makes this well.

What you could not

- An API that other software can build on.

It runs in a browser, which is where something home-made would run too.

AI features, unless you pay a model provider for each request yourself.

What this rests on. QR Code Dynamic's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
