# Where it stands

Its grades against its category, and whether to keep it or make your own

It stands best on free plan and trial (B, above 26 of 37) and worst on ease of use (C, above 0).

Its paid plans start at about $1.84 a month, against a middle price of $11 for the category: 0 of the 29 others that charge start lower.

Every bar is all 38 QR code generators we grade, cut by the letter each got. QR.net's own letter is outlined.

## Price against what you get

What paid plans start at, a month (each step along is roughly double)

## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

### Your call

You could make the core of QR.net for yourself: qR codes.

What you would give up is listed below. Whether that is worth the price is your call. At $22.12 a year it costs less than the weekend it would take to replace, which is the argument for keeping it.

**What you could make**

- QR codes: an app builder makes this well.

**What you could not**

- An API that other software can build on.

- It runs in a browser, which is where something home-made would run too.

**What this rests on.** QR.net's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
