PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

1/60

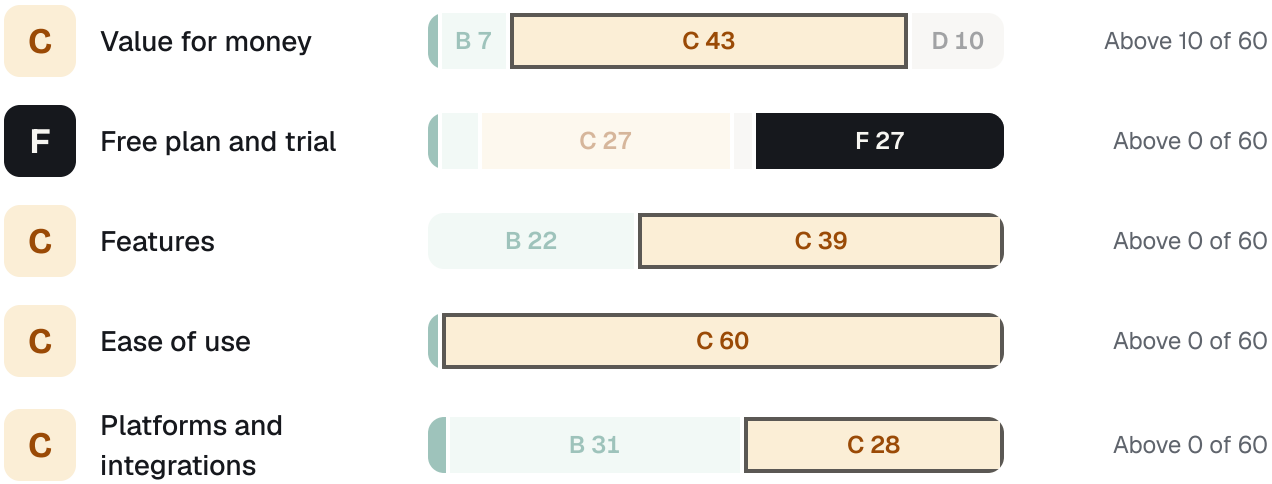

Other therapy and clinic software it is graded above

Qualifacts CareLogic's GPA of 1.6 is higher than 1 of the 60 other therapy and clinic software we grade, and level with 13.

It stands best on value for money (C, above 10 of 60) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 61 therapy and clinic software we grade, cut by the letter each got. Qualifacts CareLogic's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Qualifacts CareLogic you would be making insurance claims sent to payers through a clearinghouse. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 46 of the 60 other therapy and clinic software grade higher.

What you could make

- Clinical notes, case management and reports: an app builder makes these well.

What you could not

- Insurance claims sent to payers through a clearinghouse.
- Video sessions that meet health privacy rules.
- What a company asks for before it lets staff use something: HIPAA.

What this rests on. Qualifacts CareLogic's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
