Who QuickEmailVerification is for

- ✓ Fits if you clean small lists and can spread them over days
- ✓ Works for people who use ActiveCampaign, Brevo or GetResponse

Who it is not for

- ✕ Tight if you have one big list, as free is 100 credits a day
- ✕ Watch out: the pricing page ran a sale with no end date, so the regular prices may change
- ✕ Watch out: a daily-credit subscription exists, and its top step is $900 a month
- ✕ Watch out: there is only a web dashboard and API, no apps

Good to know

Good for

- ✓ Occasional cleaning of a list with credits that do not expire
- ✓ Trying the service daily on the free tier before paying
- ✓ Marketers who verify inside their email platform

Worth knowing

- ⓘ The free tier gives 100 credits a day; there is no larger free monthly bucket.
- ⓘ The pricing page was running a limited-time sale with no end date shown; the prices listed here are the regular ones.
- ⓘ A Per Day Credits monthly subscription (100 to 50,000 credits a day) also exists; only its $900 a month top step was readable, so it is not listed as a plan.
- ⓘ Web dashboard and API only; no desktop or mobile app is listed.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

38/38

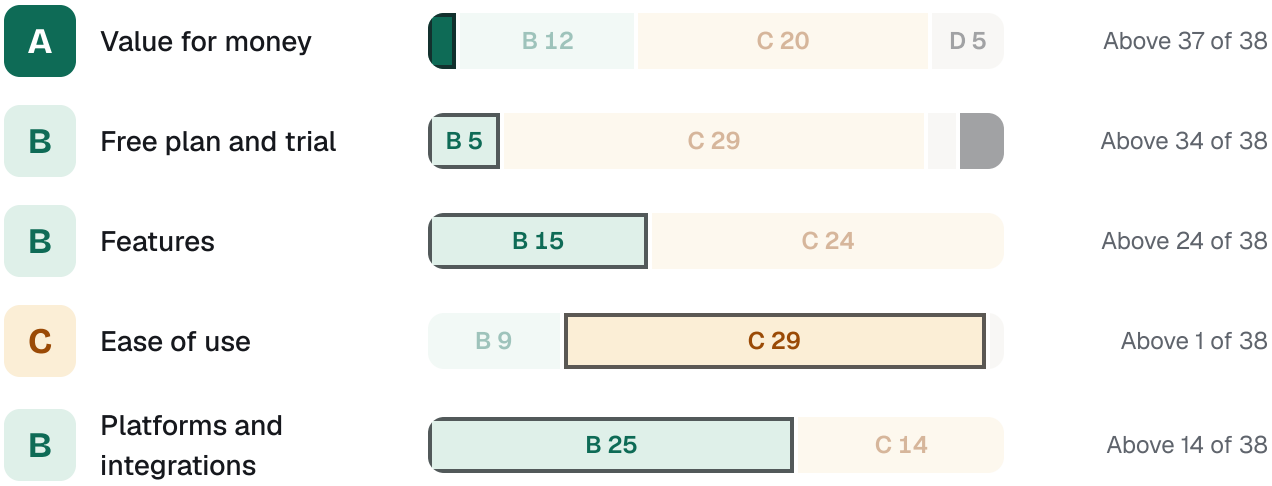

Other email verification and deliverability tools it is graded above

QuickEmailVerification's GPA of 3.0 is higher than 38 of the 38 other email verification and deliverability tools we grade.

It stands best on value for money (A, above 37 of 38) and worst on ease of use (C, above 1).

Each grade against the category

Every bar is all 39 email verification and deliverability tools we grade, cut by the letter each got. QuickEmailVerification's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Nothing QuickEmailVerification does is plain enough to make in a weekend. The 4 things listed below take a company.

It is one of the better ones too: its GPA of 3.0 is higher than 38 of the 38 other email verification and deliverability tools we grade. It costs $4, paid once.

What you could not

- ✕ Checking that an address exists without writing to it.
- ✕ It plugs into other products, ActiveCampaign, AWeber and Brevo among them, and has an API.
- ✕ What a company asks for before it lets staff use something: HIPAA.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. QuickEmailVerification's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
