Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 10 of the 134 other automation tools we grade

Quickwork is an enterprise platform for connecting applications, APIs, data, events and workflows, with an AI and agent framework layered on top. It can be run in the vendor's cloud, on a customer's premises, in a private cloud network or in a fully air-gapped setup. Its pages publish no prices.

To get you started, here are **7 things to know about Quickwork**, taken from its own pages and our grades.

>
> **An enterprise rollout with a visual builder and developer tooling takes setup.**
>
> From our grade for ease of use

1 **Best for enterprise integration and AI agent workflows**

No price is published, and its pricing page returns a not-found error.

2 **It runs on Web**

Web.

3 **Integration engine**

Connects applications, systems and services and runs integration flows across a library of more than 1,600 connectors.

4 **Workflows as APIs**

An API engine turns workflows into APIs that can be created, exposed, consumed and managed from the same platform.

5 **Data and event engines**

Moves and transforms enterprise data, including ETL, ELT and change data capture, and routes real-time events as they happen.

6 **A 1.8 GPA, above 10 of 134**

That is against the other automation tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Quickwork you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for enterprise integration and AI agent workflows

Quickwork is an enterprise platform that connects apps, APIs, data and events, with an agent framework and cloud, on-premise or air-gapped deployment. No price is published, and its pricing page returns a not-found error. We found no free plan or trial.

TOOLGPA REPORT CARD	Quickwork	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is on record: the pricing URL returns a not-found page. With nothing to compare, it sits in the middle.
Free plan and trial	F	No free plan or trial on the pages read.
Features	C	Integration engine, workflows as APIs, data and event engines, a visual builder and an agent framework. Fairly broad, but we can't see the gaps from the listing.
Ease of use	C	No store rating on record. An enterprise rollout with a visual builder and developer tooling takes setup.
Platforms and integrations	B	Web, with 8 integrations and cloud, on-premise or air-gapped deployment.

Grade point average Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Quickwork is for

- ✓ Fits if you're an enterprise that needs integrations running on-premise or air-gapped
- ✓ Works for IT teams that want a visual builder with developer tooling underneath

Who it is not for

- ✗ Not for you if you want a price first, since none could be found
- ✗ Skip it if you want to try before paying, as no free plan or trial appears
- ✗ Too heavy for individuals or small teams automating a few apps
- ✗ Watch out: the pricing page returns a 404, so costs are likely quoted on request

Good to know

Good for

- ✓ Enterprises that need integration and automation on their own premises
- ✓ Teams that want to expose workflows as APIs
- ✓ Organizations combining integration with AI agents under governance

Worth knowing

- ⓘ No pricing page could be found: the site's pricing URL returns a not-found page, so costs are unverified and likely quoted on request.
- ⓘ No free plan or trial is described on the pages read.
- ⓘ It is positioned for enterprises, with on-premise and air-gapped options that suggest a managed rollout.

What it costs

Integration engine

Connects applications, systems and services and runs integration flows across a library of more than 1,600 connectors.

Workflows as APIs

An API engine turns workflows into APIs that can be created, exposed, consumed and managed from the same platform.

Data and event engines

Moves and transforms enterprise data, including ETL, ELT and change data capture, and routes real-time events as they happen.

Visual builder with developer tooling

Workflows are built visually without code, with developer tooling available, plus testing, versioning and promotion across environments.

AI and agent framework

An agent builder, model gateway, memory, human-in-the-loop review and governed tool access with support for standards such as MCP.

Flexible deployment and control

Runs on-premise, in the cloud, in a VPC, hybrid or air-gapped, with logs, audit trails, role-based access and SSO or SAML.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

10/134

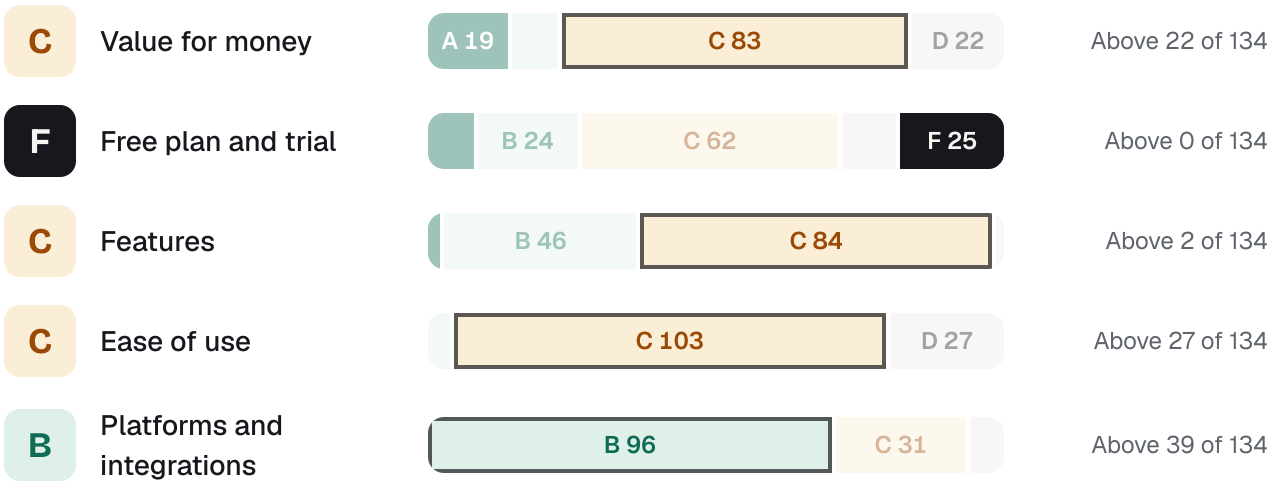

Other automation tools it is graded above

Quickwork's GPA of 1.8 is higher than 10 of the 134 other automation tools we grade, and level with 15.

It stands best on platforms and integrations (B, above 39 of 134) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 135 automation tools we grade, cut by the letter each got. Quickwork's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Quickwork you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 109 of the 134 other automation tools grade higher.

What you could not

- ✕ Connections to other products, each kept working as those products change.
- ✕ A builder that other people can use without writing code.
- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ What a company asks for before it lets staff use something: single sign-on and roles and permissions.

What this rests on. Quickwork's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
