Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 26 of the 134 other automation tools we grade

Quixy is a no-code and low-code platform for building business apps and workflows. Apps are assembled in a drag-and-drop designer with business rules, data tables, document generation, reports and dashboards, and run on the vendor's cloud with Android and iOS apps. Pricing is by user, with a small fixed Starter plan.

To get you started, here are **9 things to know about Quixy**, taken from its own pages and our grades.

> **You build the apps and workflows yourself, so there's a learning curve.**
>
> From our grade for ease of use

1 **Best for no-code approval and request workflows for about 20 people**

Quixy is a no-code builder for approval and request workflows with iOS and Android apps.

2 **Paid plans start at $165 a month**

As its pricing page puts it: $165 per month for 20 users, billed annually.

3 **You can try it first**

14-day free trial, no credit card required

4 **It runs on 3 platforms**

Web, iOS and Android.

5 **Drag-and-drop app designer**

A UI and workflow designer for building apps without code, with business rules, validations and field-level access control.

6 **Workflows with approvals**

Workflow actions such as submit, approve, reject and resubmit move records through steps, with unlimited steps per workflow on the Platform plan.

7 **Data tables and document generator**

Data tables with advanced data functions, plus a document generator and reports for output from the apps you build.

8 **A 2.0 GPA, above 26 of 134**

That is against the other automation tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Quixy you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for no-code approval and request workflows for about 20 people

Quixy is a no-code builder for approval and request workflows with iOS and Android apps. Starter is $165 a month flat for up to 20 users, which is steep for one person, caps you at 1,000 workflow actions, and Platform needs 20 users at $400 a month.

TOOLGPA REPORT CARD — **Quixy** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	D	Starter is $165 a month for up to 20 users, so one person pays $165, which is in the category's dearest tenth. Platform is $20 a user with a 20-user minimum, so $400 a month.
Free plan and trial	C	14-day trial with no card. No free plan.
Features	C	Forms, workflows and apps. Starter caps usage at 1,000 workflow actions a month and 1 GB of storage per user; SSO and private cloud are Enterprise only.
Ease of use	C	No store rating on record. You build the apps and workflows yourself, so there's a learning curve.
Platforms and integrations	B	Web, iPhone and Android. No desktop app and no integrations list on the listing.

Grade point average — Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Quixy is for

- ✓ Fits if about 20 people need approval flows without developers
- ✓ Makes sense if you want a small fixed monthly price for a whole group

Who it is not for

- ✗ Pricey if you're one person, as Starter is $165 a month
- ✗ Tight if you run busy flows: Starter stops at 1,000 workflow actions a month
- ✗ Watch out: Platform needs at least 20 users, so $400 a month
- ✗ Skip it if you need SSO, LDAP or private cloud, which are Enterprise only

Good to know

Good for

- ✓ Business teams building approval and request workflows without developers
- ✓ Companies with many users but few apps, using the Solution plan
- ✓ Teams of about 20 that want a small fixed monthly price

Worth knowing

- ⓘ Starter caps usage at 1,000 workflow actions a month and 1 GB of storage per user.
- ⓘ Platform requires at least 20 users, so its entry cost is $400 a month billed annually.
- ⓘ SSO, LDAP/SAML, IP filtering and private-cloud hosting are limited to Enterprise.
- ⓘ Solution and Enterprise prices are not published; both are quote-based.

Where it stands

Its grades against its category, and whether to keep it or make your own

26/134

Other automation tools it is graded above

Quixy's GPA of 2.0 is higher than 26 of the 134 other automation tools we grade, and level with 27.

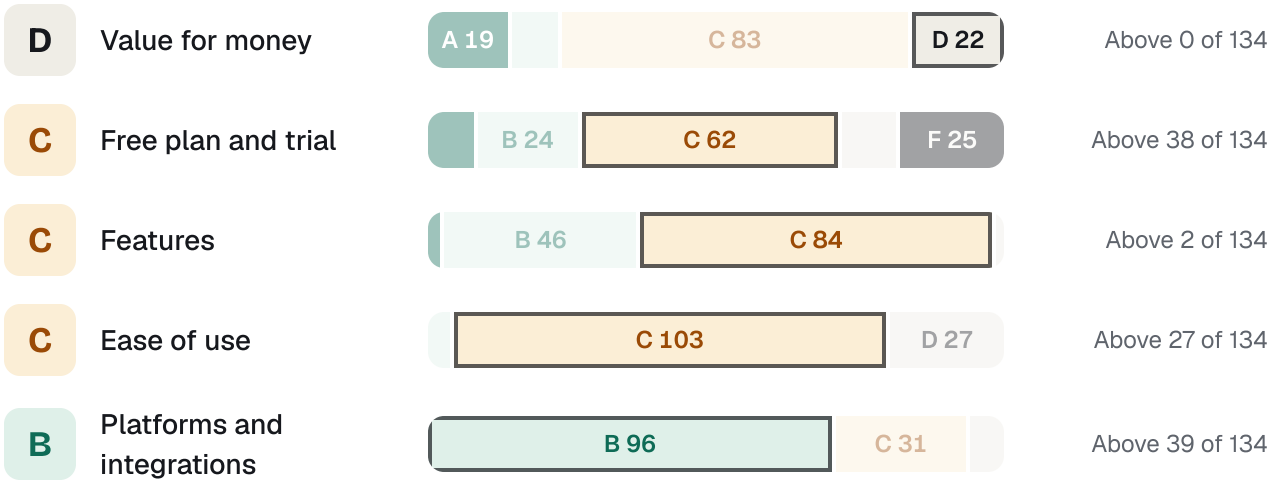

It stands best on platforms and integrations (B, above 39 of 134) and worst on value for money (D, above 0).

Its paid plans start at $165 a month, against a middle price of $22.17 for the category: 57 of the 65 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 19 tools score higher and cost less.

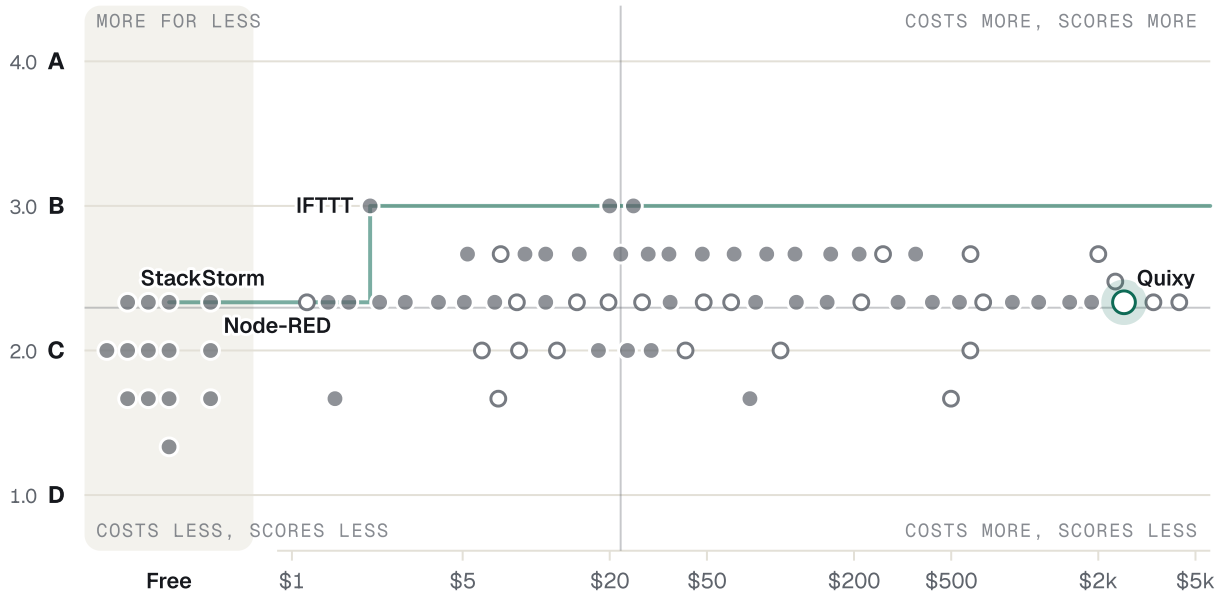

Each grade against the category

Every bar is all 135 automation tools we grade, cut by the letter each got. Quixy's own letter is outlined.

Price against what you get

Each dot is one of 80 automation tools. Further left costs less; higher up scores better on features, ease of use and platforms. Quixy is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Quixy you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 81 of the 134 other automation tools grade higher. It costs $1,980 a year.

What you could make

- Forms: an app builder makes this well.

What you could not

- A builder that other people can use without writing code.

- Connections to other products, each kept working as those products change.
- A tool that builds and hosts other apps.
- Connections that pull numbers from dozens of other services.
- A real app for iOS and Android. Something home-made would be a web page.
- What a company asks for before it lets staff use something: audit logs.

What this rests on. Quixy's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
