Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 31 of the 87 other field service apps we grade

RazorSync is field service management software for small and mid-sized service companies. It covers dispatch, job scheduling, work orders, estimating and invoicing, time cards, a customer portal and credit card payments, with iOS and Android apps for field staff. Plans are priced by how many users they include rather than per seat.

To get you started, here are **9 things to know about RazorSync**, taken from its own pages and our grades.

> "
>
> **QuickBooks and merchant services are set up by you.**
>
> From our grade for ease of use

1 **Best for small field service teams on QuickBooks**

Dispatch, mobile work orders and invoicing are in every plan, but QuickBooks sync, routing and inventory are extra on the lower ones.

2 **Paid plans start at $85 a month**

As its pricing page puts it: $85 per month for up to 2 users, billed annually ($90 billed monthly).

3 **You can try it first**

14-day free trial of the Enterprise plan

4 **It runs on 3 platforms**

Web, iOS and Android.

5 **Dispatch and scheduling**

Service dispatch, job tracking, recurring schedules and GPS mapping with driving directions are in every plan's standard features.

6 **Mobile apps**

iOS and Android apps let field workers capture photos and signatures and work from work orders.

7 **Estimating and invoicing**

Estimates, invoices, credit card on file with recurring billing, and card payments that need an application for merchant services through RazorSync.

8 **A 2.0 GPA, above 31 of 87**

That is against the other field service apps we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

The plain part of RazorSync you could make: job scheduling, quotes and estimates, invoicing, time tracking, inventory and reports. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

The report card

Best for small field service teams on QuickBooks

RazorSync has price bands by team size: $85 a month for up to 2 users, $195 for 7 and $439 for 15. Dispatch, mobile work orders and invoicing are in every plan, but QuickBooks sync, routing and inventory are extra on the lower ones.

TOOLGPA REPORT CARD — **RazorSync** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	$85 a month for up to 2 users billed annually, $195 for up to 7. Add-ons cost more on lower plans: QuickBooks $20, routes $50, inventory $30 a month. That puts it between the middle and the dearer quarter.
Free plan and trial	D	A 14-day trial of the Enterprise plan, but it cannot take card payments, and nothing else is free.
Features	C	Dispatch, mobile apps, estimates, invoices, a customer portal and alerts. QuickBooks sync, advanced reporting, routing and inventory are gated by plan or add-on.
Ease of use	C	No rating on record. QuickBooks and merchant services are set up by you.
Platforms and integrations	B	Web plus iOS and Android apps, with QuickBooks Online and Desktop. No desktop app.

Grade point average — Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who RazorSync is for

- ✓ Fits if you have a team of two to seven and want a flat price rather than per-seat billing
- ✓ Works for crews that need photos and signatures on a work order

Who it is not for

- ✗ Skip it if you need QuickBooks on the Solo plan, as it is a $20 a month add-on
- ✗ Tight if you outgrow 2, 7 or 15 users, because beyond that you go to sales
- ✗ Watch out: route optimization is $50 a month and inventory $30 on lower plans
- ✗ Watch out: card payments need a merchant services application, and the trial can't process them
- ✗ Pricey if you want the monthly rate: $90, $225 and $499 against the annual prices

Good to know

Good for

- ✓ Small service companies that want a set number of users at a flat price
- ✓ Teams of two to fifteen field workers across trades such as HVAC and plumbing
- ✓ Businesses that keep their books in QuickBooks

Worth knowing

- ⓘ Add-ons cost extra on lower plans: QuickBooks sync $20, advanced notifications $20, route optimization $50 and inventory $30, each per month.
- ⓘ The free trial runs on the Enterprise plan and cannot process card payments, which require a merchant services application.
- ⓘ Plans cap users at 2, 7 and 15; beyond that the price is set through sales.
- ⓘ The vendor's own pricing FAQ gives the monthly list prices; the annual rates are shown on the page toggle.

From our grade for features

Dispatch and scheduling

Service dispatch, job tracking, recurring schedules and GPS mapping with driving directions are in every plan's standard features.

Mobile apps

iOS and Android apps let field workers capture photos and signatures and work from work orders.

Estimating and invoicing

Estimates, invoices, credit card on file with recurring billing, and card payments that need an application for merchant services through RazorSync.

QuickBooks sync

Works with QuickBooks Online and Desktop: customers and service items come in, and invoices, payments and quotes go out.

Customer portal and alerts

Customers get a portal, and email and SMS notifications are standard.

Route optimization and inventory

Route optimization and inventory management with templates are included on Pro, or added to lower plans for a monthly fee.

Where it stands

Its grades against its category, and whether to keep it or make your own

31/87

Other field service apps it is graded above

RazorSync's GPA of 2.0 is higher than 31 of the 87 other field service apps we grade, and level with 23.

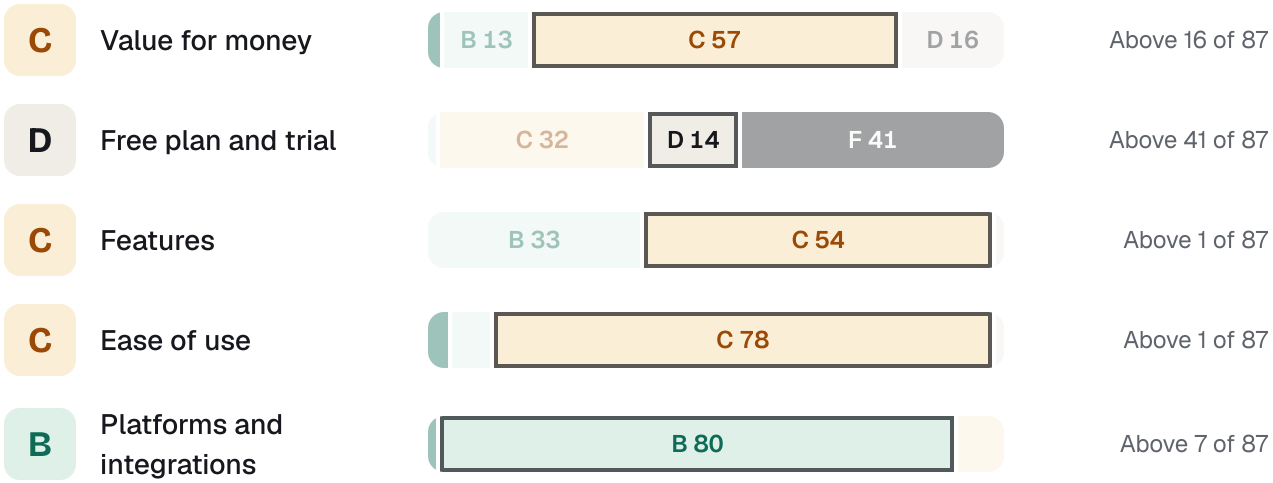

It stands best on platforms and integrations (B, above 7 of 87) and worst on free plan and trial (D, above 41).

Its paid plans start at $85 a month, against a middle price of $50 for the category: 38 of the 53 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 13 tools score higher and cost less.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of RazorSync you could make: job scheduling, quotes and estimates, invoicing, time tracking, inventory and reports. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

It costs $1,020 a year.

What you could make

- Job scheduling, quotes and estimates, invoicing, time tracking, inventory and reports: an app builder makes these well.

What you could not

- A real app for iOS and Android. Something home-made would be a web page.
- It plugs into other products, QuickBooks Online and QuickBooks Desktop among them, and has an API.

What this rests on. RazorSync's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
