| **Free plan and trial** | F | No free plan and no trial are listed, so nothing is free to try. |
| **Features** | B | A consumer return portal, ship and track, processing, data and insights, and retail and omnichannel returns. The listing names no gap in the core job. |
| **Ease of use** | C | No store rating on record. It is a logistics service set up through a demo. |
| **Platforms and integrations** | C | Web portal with Shopify and TikTok Shop listed. No desktop or phone app. |

# Where it stands

Its grades against its category, and whether to keep it or make your own

**12/80**

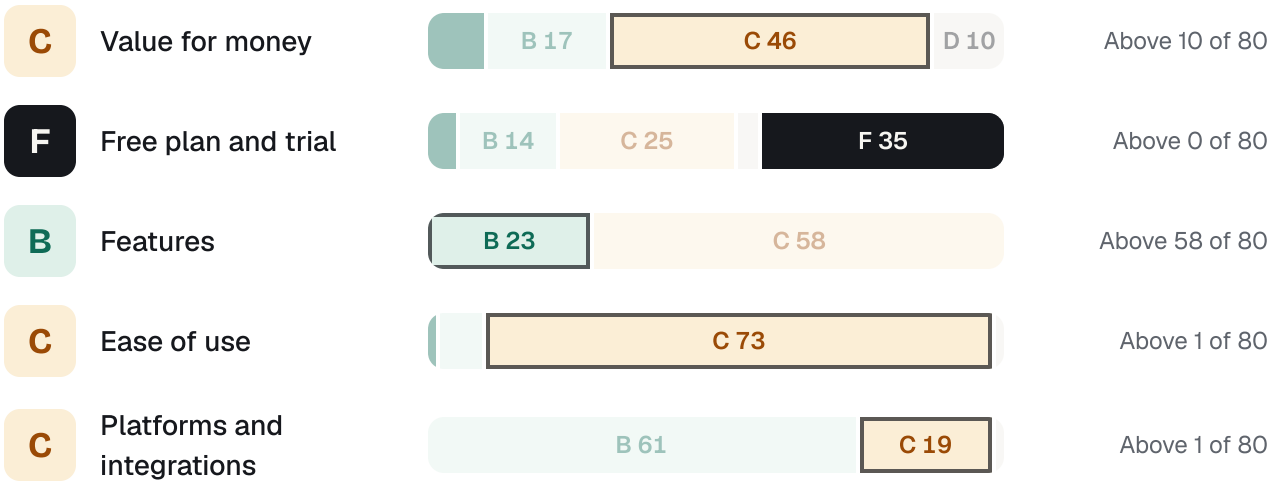

Other shipping software it is graded above

ReBound Returns's GPA of 1.8 is higher than 12 of the 80 other shipping software we grade, and level with 18.

It stands best on features (B, above 58 of 80) and worst on free plan and trial (F, above 0).

## Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. ReBound Returns's own letter is outlined.

## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

## Keep it

To replace ReBound Returns you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 50 of the 80 other shipping software grade higher.

### What you could make

- Reports: an app builder makes this well.

### What you could not

- Connections to other products, each kept working as those products change.
- Discounted carrier rates and labels, which take an agreement with each carrier.
- The depth: we grade its features B, which means it covers the whole job.

**What this rests on.** ReBound Returns's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
