Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 11 of the 15 other data removal services we grade

Redact is an app that deletes your old posts, messages and comments across social platforms, and edits content first if you choose. It says processing happens on your device. The free plan covers the last 30 days; paid plans remove the limit. Data broker removal is listed only on its Enterprise platform.

To get you started, here are **9 things to know about Redact**, taken from its own pages and our grades.

> **It is a post-deleting tool, not a data-broker remover, which sits only on its Enterprise platform.**

As its pricing page puts it: $7.99 per month, billed yearly at $95.88.

3 There is a free plan

The site says it supports 35+ sites. Premium unlocks the major ones; Ultimate adds LinkedIn, Slack, Stack Exchange, email and GitHub.

7 Edit before delete

Replaces content with your own text before deleting, which the pricing page says is to beat archive bots.

8 A 2.4 GPA, above 11 of 15

That is against the other data removal services we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Redact you would be making opt-out requests to hundreds of data brokers, sent again whenever they list you again. That is not a weekend's work, with an AI app builder or without one.

TOOLGPA REPORT CARD — **Redact** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

It is one of the better ones too: its GPA of 2.4 is higher than 11 of the 15 other data removal services we grade. It costs $95.88 a year.

What you could not

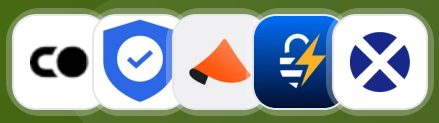

- ✕ Opt-out requests to hundreds of data brokers, sent again whenever they list you again.
- ✕ Connections to other products, each kept working as those products change.

- ✕ Apps for macOS, Windows, Linux, iOS and Android that stay in step with each other.

What this rests on. Redact's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
