PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

7 /52

Other read-later and bookmark apps it is graded above

Refind's GPA of 2.4 is higher than 7 of the 52 other read-later and bookmark apps we grade, and level with 13.

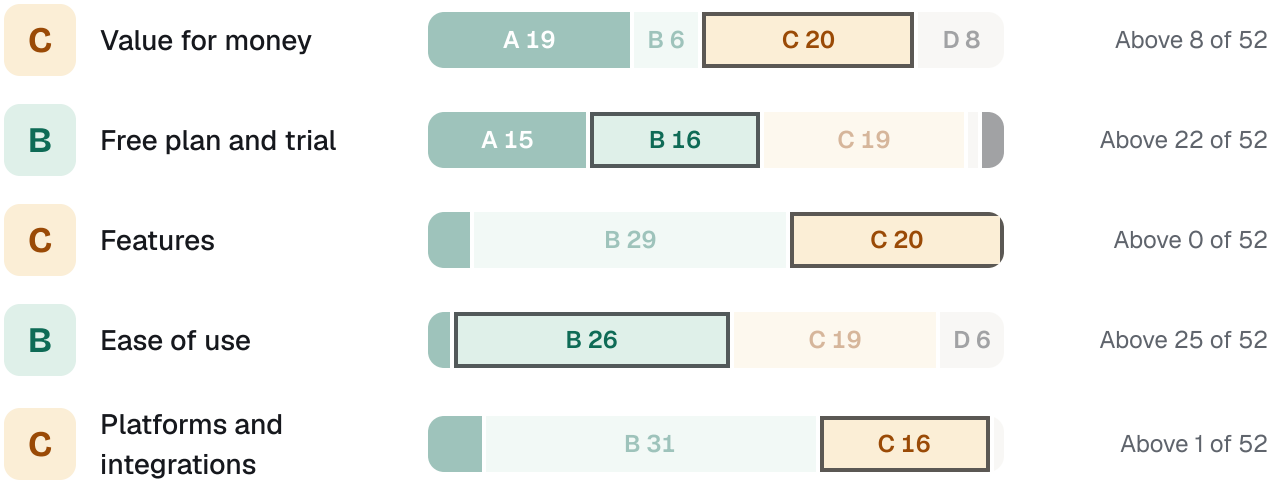

It stands best on ease of use (B, above 25 of 52) and worst on features (C, above 0).

Refind has no paid plan.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

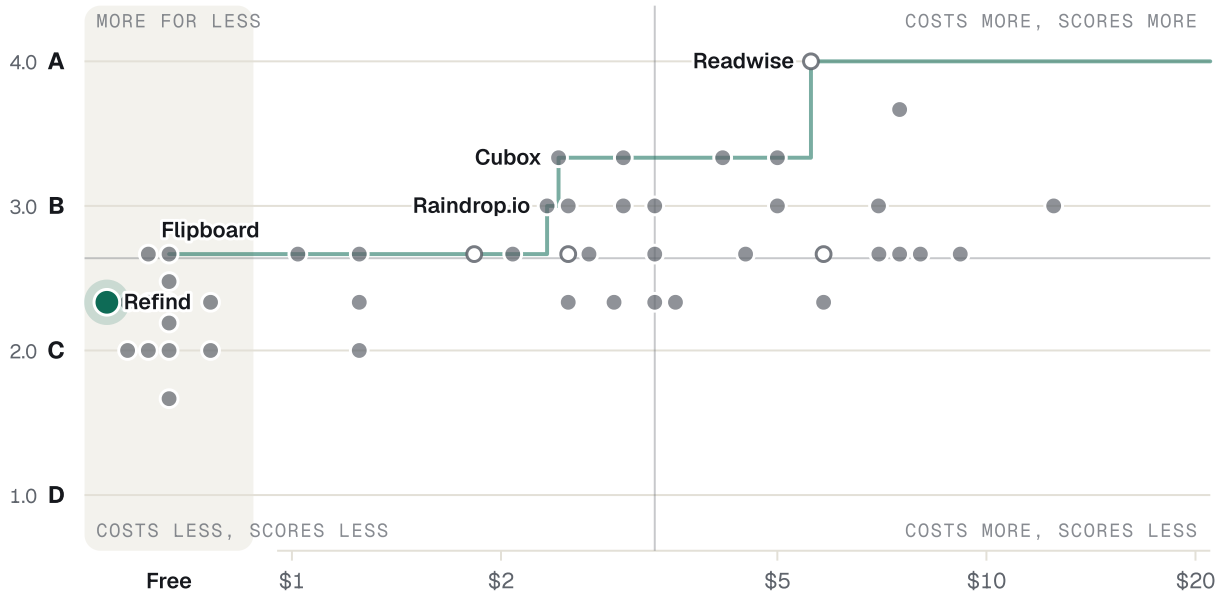

Each grade against the category

Every bar is all 53 read-later and bookmark apps we grade, cut by the letter each got. Refind's own letter is outlined.

Price against what you get

Each dot is one of 47 read-later and bookmark apps. Further left costs less; higher up scores better on features, ease of use and platforms. Refind is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Refind is free, so making your own would save you nothing.

That makes this kind of software worth paying for, not this one in particular: 32 of the 52 other read-later and bookmark apps grade higher.

What you could make

- Bookmarks, web clipper and read later: an app builder makes these well.

What this rests on. Refind's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
