Rendair is a browser workspace where architects and designers turn sketches, floor plans and 3D models into renders, then refine them by chat or by drawing over the image. It runs several image, video and 3D models in one project board and has client sharing and review built in. Plans are sold as monthly credit allowances.

It costs $228 a year.

What you could not

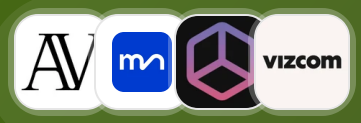

- An image model, which you can rent by the picture but not make.
- A video model, which you can rent by the second but not make.

- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ The depth: we grade its features B, which means it covers the whole job.
