RentalReady is made by RentalReady, and has been around since 2016.

Where it stands

Its grades against its category, and whether to keep it or make your own

3/53

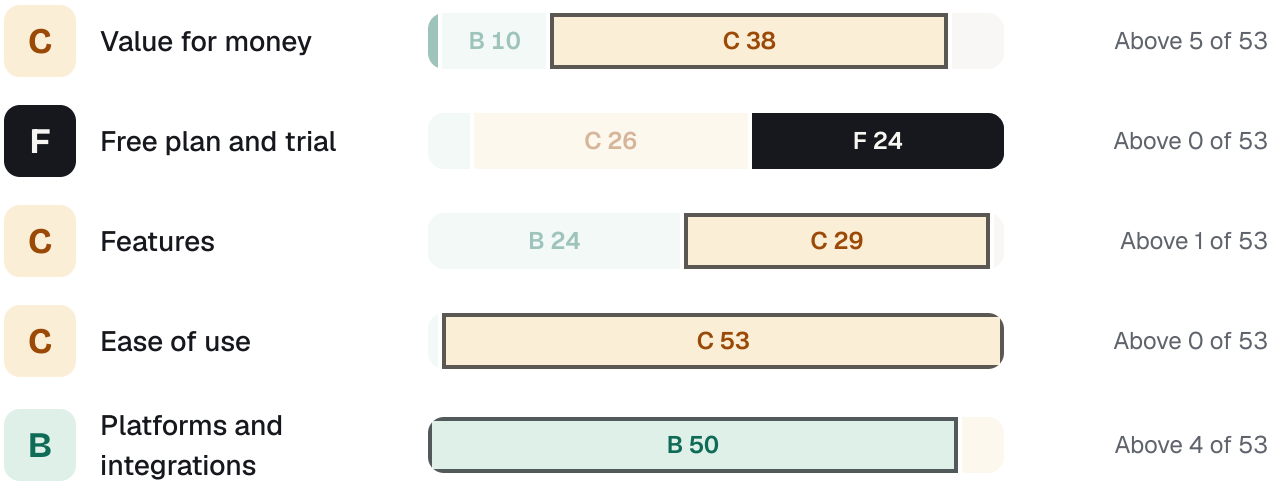

Other vacation rental tools it is graded above

RentalReady's GPA of 1.8 is higher than 3 of the 53 other vacation rental tools we grade, and level with 10.

It stands best on platforms and integrations (B, above 4 of 53) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 54 vacation rental tools we grade, cut by the letter each got. RentalReady's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace RentalReady you would be making two-way connections to Airbnb, Booking.com and Vrbo. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 40 of the 53 other vacation rental tools grade higher.

What you could make

- Calendar, reports and invoicing: an app builder makes these well.

What you could not

- Two-way connections to Airbnb, Booking.com and Vrbo.
- One mailbox that several people work at once.
- A real app for Android. Something home-made would be a web page.
- It plugs into other products, PriceLabs, Beyond and WhatsApp among them.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. RentalReady's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
