Who Resoomer is for

- ✓ Fits if you want a quick summary of an article with no sign-up
- ✓ Works for rewording or translating a passage in the browser

Who it is not for

- ✗ Skip it if you want answers with sources, as the summaries come with no citations
- ✗ Not for you if you want to manage papers or citations, because it does neither
- ✗ Too light for chatting with a document, as it is not a chat assistant
- ✗ Watch out: texts are deleted after processing, so export or save results yourself

Good to know

Good for

- ✓ Students who want a quick summary of a course text or article
- ✓ Readers who prefer to listen to a text or have dyslexia or ADHD in mind
- ✓ People who want summaries without creating an account

Worth knowing

- ⓘ It is a set of single-purpose text tools, not a chat assistant, and it does not manage a library of papers or citations.
- ⓘ Texts are deleted after processing, so results must be exported or saved by the user.
- ⓘ The site gives no sources or citations for the summaries it produces.
- ⓘ The site's page code still carries a monthly premium price variable, but no paid plan is shown on any page read.

What it works with

Its own pages name no integrations.

Resoomer is made by Resoomer, and has been around since 2016.

Where it stands

Its grades against its category, and whether to keep it or make your own

65/69

Other AI research tools it is graded above

Resoomer's GPA of 3.2 is higher than 65 of the 69 other AI research tools we grade, and level with 4.

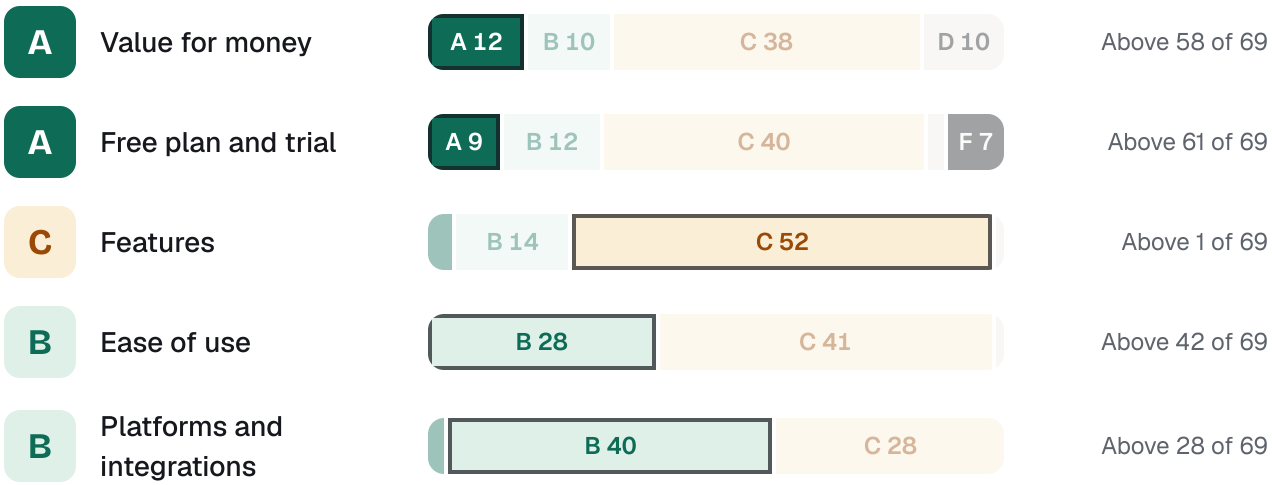

It stands best on free plan and trial (A, above 61 of 69) and worst on features (C, above 1).

Resoomer has no paid plan.

On features, ease of use and platforms it scores 2.7 out of 4, and no tool on the category's chart scores higher without costing more.

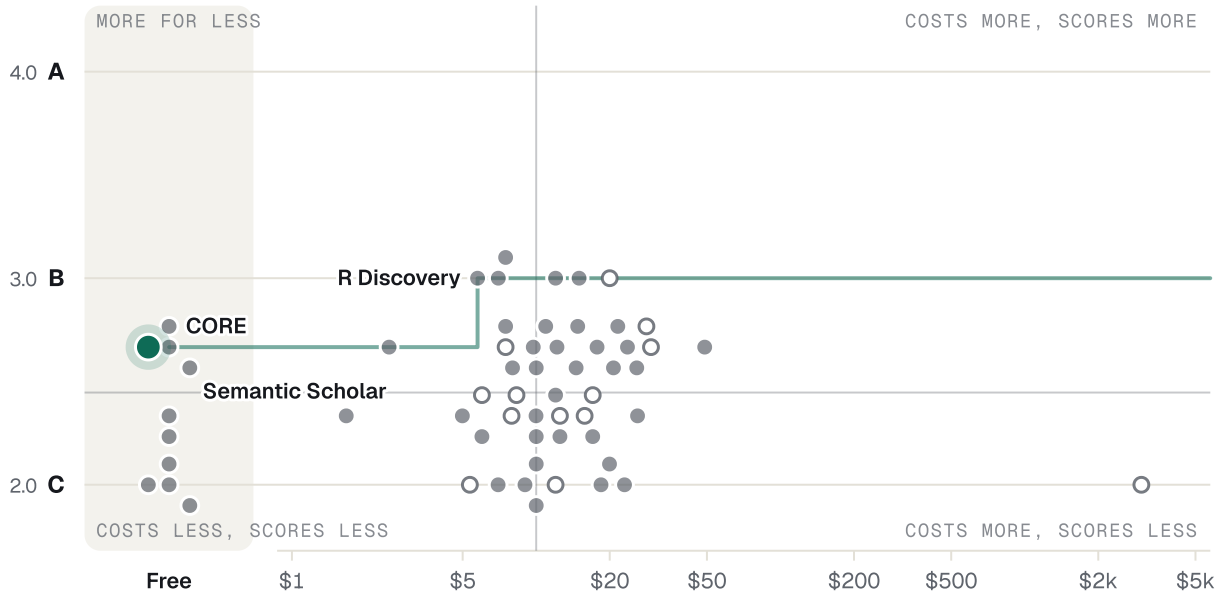

Each grade against the category

Every bar is all 70 AI research tools we grade, cut by the letter each got. Resoomer's own letter is outlined.

Price against what you get

Each dot is one of 59 AI research tools. Further left costs less; higher up scores better on features, ease of use and platforms. Resoomer is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Resoomer is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces. It is one of the better ones too: its GPA of 3.2 is higher than 65 of the 69 other AI research tools we grade.

What you could make

- Documents: an app builder makes this well.

What you could not

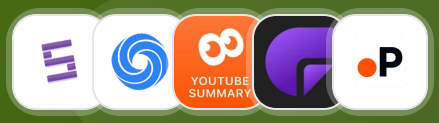

- × A voice model, which you can rent by the minute but not make.
- × Grammar checking as you type, wherever you type.

- A real app for iOS and Android. Something home-made would be a web page.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Resoomer's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
