Its paid plans start at $49 a month, against a middle price of $29 for the category: 17 of the 28 others that charge start lower.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace ReviewPush you would be making texts to thousands of numbers, registered with the carriers. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 21 of the 34 other customer review tools grade higher. It costs $588 a year.

What you could make

- Review collection and reports: an app builder makes these well.

What you could not

- × Texts to thousands of numbers, registered with the carriers.

- Connections that pull numbers from dozens of other services.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. ReviewPush's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
