Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 38 of the 78 other e-signature and proposal tools we grade

Revv combines a template composer, form filling, approvals and e-signing in one document workflow tool. Signing options include clickwrap, standard e-signatures and video consent, with bulk send and CRM data mapping for Salesforce and HubSpot. The homepage says LegalZoom has acquired Revv.

To get you started, here are **8 things to know about Revv**, taken from its own pages and our grades.

1 **Best for contracts and quotes with signing, quoted per team**

Plans are custom quotes, API use is billed per document, and the homepage says LegalZoom has acquired it, so plans may change.

2 **You can try it first**

14-day free trial of the paid plans.

3 **It runs on Web**

Web.

4 **Template and form composer**

Turn a Word document into a fillable template, publish form URLs, and collect information or files from recipients.

5 **Several consent options**

Supports clickwrap, electronic signatures and video consent. Signatures are described as ESIGN and UETA compliant and protected by PKI.

6 **Bulk send and sender-side signing**

Send documents in bulk from spreadsheets, Zapier or the API, and authorize sender-side signatures once for batches.

7 **A 2.2 GPA, above 38 of 78**

That is against the other e-signature and proposal tools we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace Revv you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

TOOLGPA REPORT CARD	Revv	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	The pricing page publishes no figures, so cost is a quote based on users and volume.
Free plan and trial	C	A 14-day trial of paid plans, no free plan; the listing does not say if a card is needed.
Features	C	Templates, approvals, bulk send, sender-side signing and CRM export. The pages list no native sender mobile apps.
Ease of use	C	No store rating on record. Templates and forms have to be built.
Platforms and integrations	B	Web, with Salesforce, HubSpot, Zapier, Slack, Box and NetSuite connections.

Grade point average Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Revv is for

- ✓ Fits if your sales team sends quotes and contracts out of a CRM
- ✓ Works for businesses that want approvals before a document goes out

Who it is not for

- ✕ Skip it if you need a price before a sales call, since none is published
- ✕ Pricey if you use the API, billed $4.00 a document at 1,000 to 5,000 a year
- ✕ Watch out: the homepage says LegalZoom has acquired Revv, so plans and branding may change
- ✕ Too light for senders on the move, as no native sender apps are listed

Good to know

Good for

- ✓ Sales teams sending quotes and proposals tied to Salesforce or HubSpot
- ✓ Companies that want forms, approvals and signatures in one flow
- ✓ Developers who need an API to generate and sign documents

Worth knowing

- ⓘ The pricing page publishes no figures: plans are custom quotes based on users, document volume, signatures and automation features.
- ⓘ API use is priced separately per document: $4.00 at 1,000 to 5,000 documents a year, $2.00 at 5,000 to 25,000, and $1.50 above 25,000.
- ⓘ The homepage says LegalZoom has acquired Revv, so plans and branding may change.
- ⓘ Recipients sign from phones and iPads through a link; the pages list no native mobile apps for senders.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

38/78

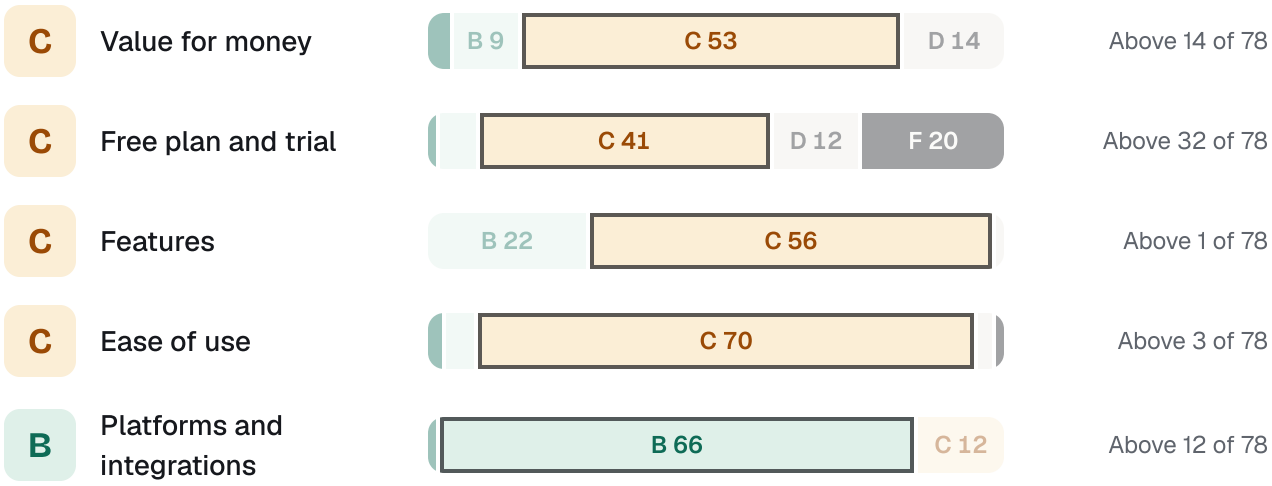

Other e-signature and proposal tools it is graded above

Revv's GPA of 2.2 is higher than 38 of the 78 other e-signature and proposal tools we grade, and level with 19.

It stands best on platforms and integrations (B, above 12 of 78) and worst on features (C, above 1).

Each grade against the category

Every bar is all 79 e-signature and proposal tools we grade, cut by the letter each got. Revv's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Revv you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Documents, templates, forms and quotes and estimates: an app builder makes these well.

What you could not

- × Connections to other products, each kept working as those products change.
- × What a company asks for before it lets staff use something: single sign-on and SOC 2.

What this rests on. Revv's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
