Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 0 of the 71 other automation tools we grade

Rewst is an automation platform for managed service providers (MSPs). It offers automations, apps, client-facing forms, integrations and an AI agent that builds automations from plain-language requests. Pricing is a per-client-organization rate set by volume bands, with no per-seat charge; the rates themselves are quoted after a demo.

To get you started, here are **7 things to know about Rewst**, taken from its own pages and our grades.

1 **Best for automating work at an MSP**

Rewst is an automation platform built for managed service providers, with forms, client-facing apps and an AI agent that drafts automations.

2 **It runs on Web**

Web.

3 **Automations**

Build automations for MSP work such as user onboarding and billing reconciliation. The vendor says unlimited automations come with every account.

4 **Rewst Agent**

An AI agent that turns an idea into a working automation or app, connected to the workflows, integrations and data it needs.

5 **Forms and apps**

Branded, dynamic client-facing forms and a front door of apps, portals and dashboards for the automations you run.

6 **A 1.6 GPA, above 0 of 71**

That is against the other automation tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Rewst you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for automating work at an MSP

Rewst is an automation platform built for managed service providers, with forms, client-facing apps and an AI agent that drafts automations. Prices aren't published and are charged per client organization, so a small MSP can't see what it would pay, and it isn't aimed at anyone outside that trade.

TOOLGPA REPORT CARD — **Rewst** — Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No rates are shown: the page explains per-client pricing, says the rate falls as you add bands of client organizations, and asks for a demo. With nothing on record it sits at C.
Free plan and trial	F	Nothing free is listed: no free plan and no trial. The way in is a demo request.
Features	C	Automations, forms, dashboards and an AI agent, with unlimited users and automations on every account. Execution history is kept for only 30 days, and it's built for MSPs, so it's a narrower job than general automation.
Ease of use	C	No store rating on record. You build workflows, forms and integrations first, so there's a learning curve.
Platforms and integrations	C	Web only. The listing names no integrations beyond saying it connects to the tools an MSP already runs.

Grade point average — Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Rewst is for

- ✓ Fits if you run an MSP and bill by client organization
- ✓ Works for MSP teams automating onboarding and billing reconciliation

Who it is not for

- ✗ Not for you if you're not an MSP, as the pricing and the product are built around client organizations
- ✗ Skip it if you need a price up front: none is published and the page sends you to a demo
- ✗ Watch out: execution history is kept for 30 days, so older runs won't be there to look at
- ✗ Tight if you want to try it first, as no free plan or trial is listed
- ✗ Watch out: the AI allowance is capped at 5% of the monthly invoice unless you bring your own AI key

Good to know

Good for

- ✓ MSPs automating service desk and billing work across client organizations
- ✓ Providers who want client-facing forms and portals without extra tooling
- ✓ Teams that want to bring their own AI model key

Worth knowing

- ⓘ Prices are not published: the page explains the per-client model but shows no rates, and asks for a demo.
- ⓘ It is built for MSPs; the pricing is per client organization on the platform.
- ⓘ Execution history is kept for 30 days.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Rewst's current pricing could not be confirmed from its own site.

> **No rates are shown: the page explains per-client pricing, says the rate falls as you add bands of client organizations, and asks for a demo.**

We could not confirm Rewst's current prices from its own site, so this guide lists no plans. rewst.io has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Automation platform built for managed service providers. Here is what it does, as its own site describes it, and what it covers: workflow automation, AI agents, forms, dashboards.

> **Automations, forms, dashboards and an AI agent, with unlimited users and automations on every account.**

Automations

Build automations for MSP work such as user onboarding and billing reconciliation. The vendor says unlimited automations come with every account.

Rewst Agent

An AI agent that turns an idea into a working automation or app, connected to the workflows, integrations and data it needs.

Forms and apps

Branded, dynamic client-facing forms and a front door of apps, portals and dashboards for the automations you run.

Integrations

Connects to the tools an MSP already runs, with a Fabric feature for asking questions and acting across the stack.

AI allowance

Each account gets an AI allowance set at 5% of the monthly invoice, and you can connect your own AI provider key with no Rewst markup.

Per-client pricing

Unlimited users and every feature at every size; the rate falls as each new band of client organizations is added.

Where it stands

Its grades against its category, and whether to keep it or make your own

0/71

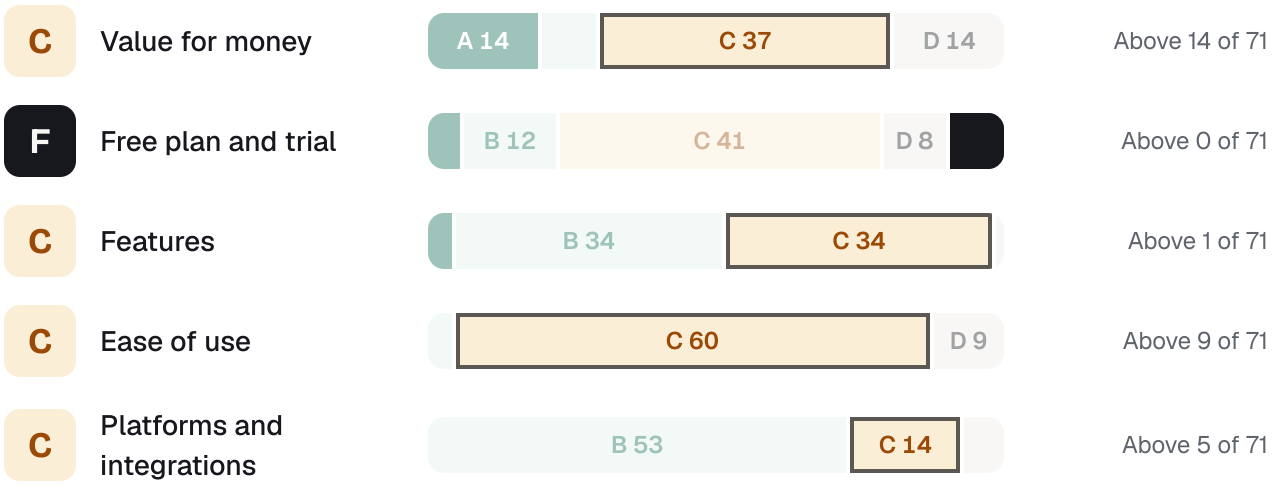

Other automation tools it is graded above

Rewst's GPA of 1.6 is higher than 0 of the 71 other automation tools we grade, and level with 2.

It stands best on value for money (C, above 14 of 71) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 72 automation tools we grade, cut by the letter each got. Rewst's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Rewst you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 69 of the 71 other automation tools grade higher.

What you could make

- Forms: an app builder makes this well.

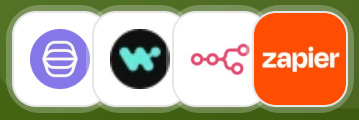

What you could not

- Connections to other products, each kept working as those products change.
- An AI agent, with the models and the safeguards behind it.
- Connections that pull numbers from dozens of other services.

What this rests on. Rewst's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
