Where it stands

Its grades against its category, and whether to keep it or make your own

5/114

Other calendar and scheduling apps it is graded above

Rezdy's GPA of 1.8 is higher than 5 of the 114 other calendar and scheduling apps we grade, and level with 5.

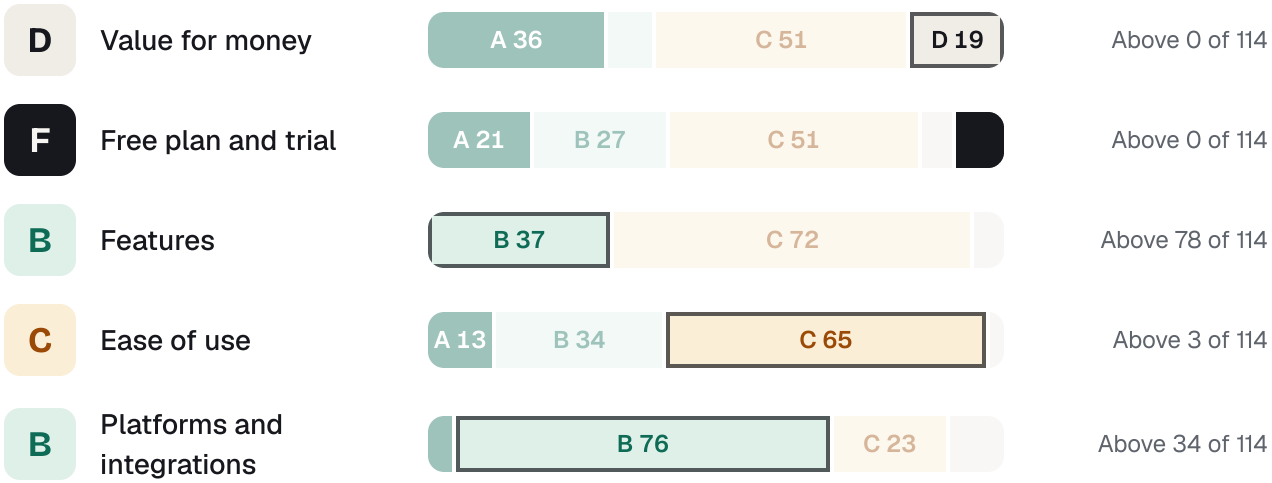

It stands best on features (B, above 78 of 114) and worst on free plan and trial (F, above 0).

Its paid plans start at $49 a month, against a middle price of $8.13 for the category: 77 of the 85 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 18 tools score higher and cost less.

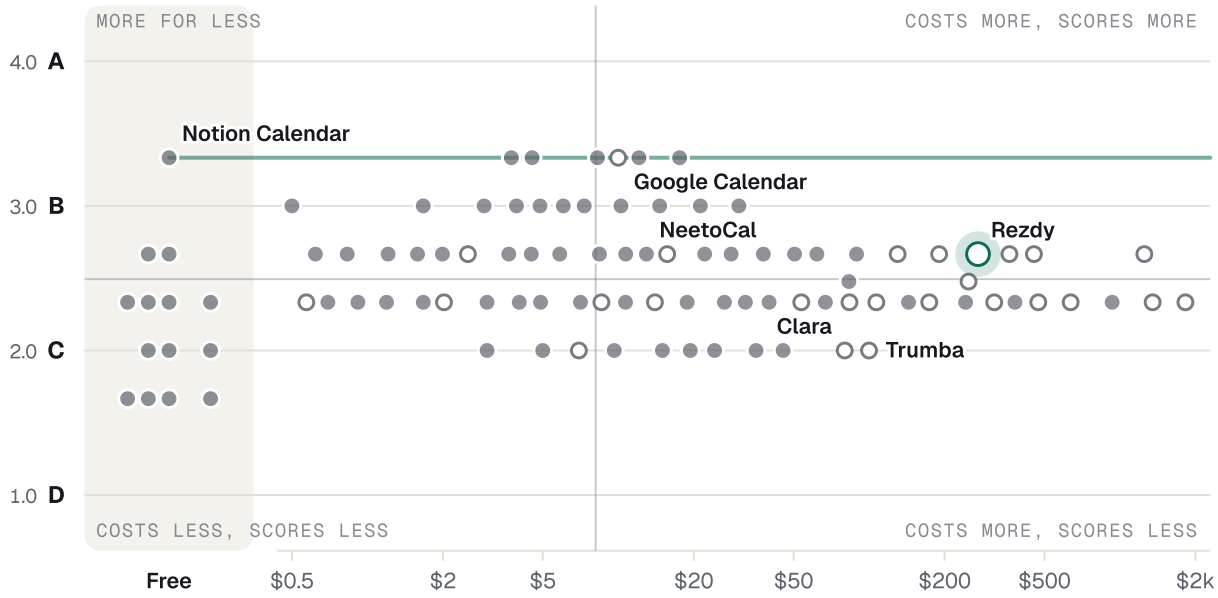

Each grade against the category

Every bar is all 115 calendar and scheduling apps we grade, cut by the letter each got. Rezdy's own letter is outlined.

Price against what you get

Each dot is one of 100 calendar and scheduling apps. Further left costs less; higher up scores better on features, ease of use and platforms. Rezdy is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Rezdy you would be making two-way connections to Airbnb, Booking.com and Vrbo. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 104 of the 114 other calendar and scheduling apps grade higher. It costs $588 a year.

What you could make

- Appointment booking and reports: an app builder makes these well.

What you could not

- ✕ Two-way connections to Airbnb, Booking.com and Vrbo.

- ✕ Selling tickets and checking them at the door.
- ✕ It plugs into other products, Viator, Google Things to do and Xero among them, and has an API.
- ✕ Hooks into the device itself: widgets.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Rezdy's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
