PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

58/85

Other salon, spa and studio booking apps it is graded above

RhinoFit's GPA of 2.4 is higher than 58 of the 85 other salon, spa and studio booking apps we grade, and level with 16.

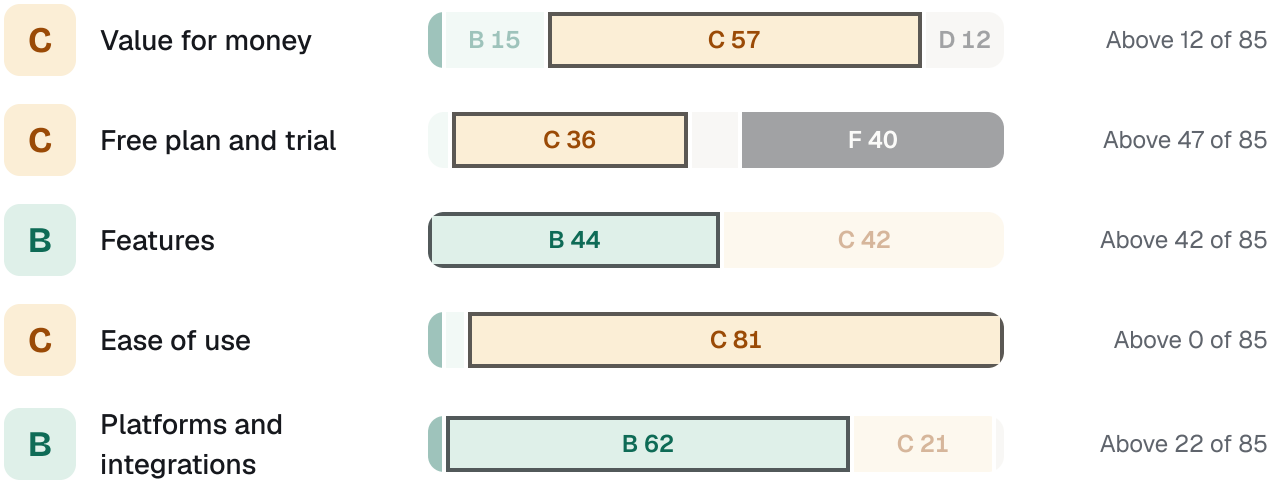

It stands best on features (B, above 42 of 85) and worst on ease of use (C, above 0).

Its paid plans start at $57 a month, against a middle price of $49 for the category: 34 of the 57 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 4 tools score higher and cost less.

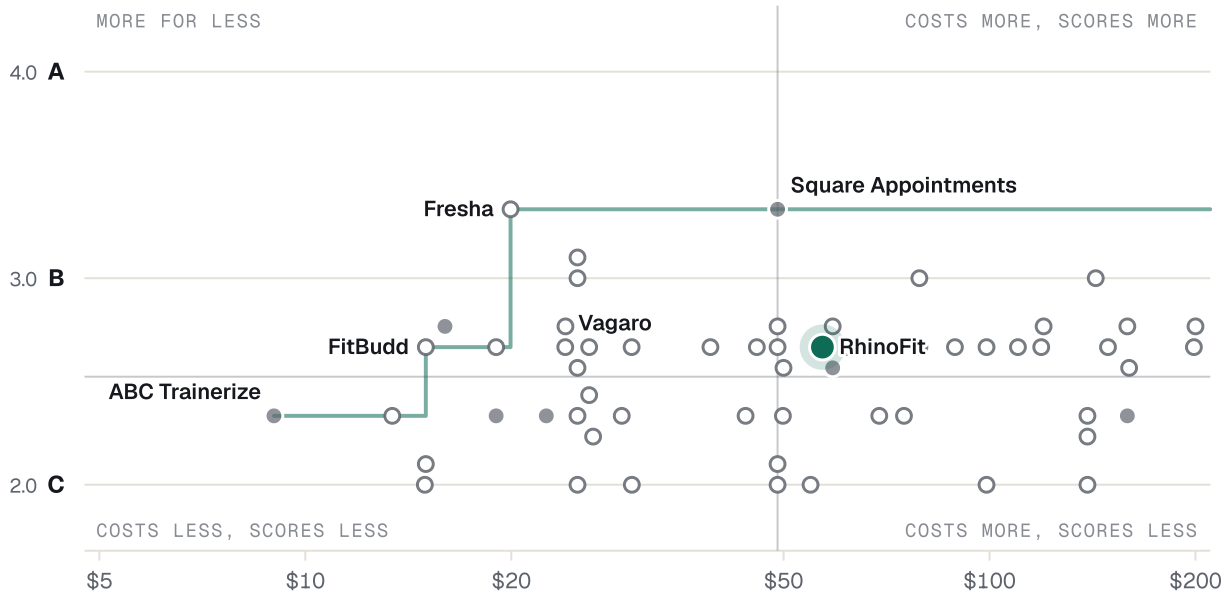

Each grade against the category

Every bar is all 86 salon, spa and studio booking apps we grade, cut by the letter each got. RhinoFit's own letter is outlined.

Price against what you get

Each dot is one of 58 salon, spa and studio booking apps. Further left costs less; higher up scores better on features, ease of use and platforms. RhinoFit is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace RhinoFit you would be making texts to thousands of numbers, registered with the carriers. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.4 is higher than 58 of the 85 other salon, spa and studio booking apps we grade. It costs $684 a year.

What you could make

- Class booking, appointment booking and reports: an app builder makes these well.

What you could not

- Texts to thousands of numbers, registered with the carriers.
- Scanning barcodes with a phone camera or a scanner.
- A real app for iOS and Android. Something home-made would be a web page.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. RhinoFit's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
