07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from RingLogix's own pages, its app-store listings and our grades. Every fact in it is on RingLogix's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 12 of the 77 other business phone systems we grade

RingLogix is a white-label voice platform for resellers, MSPs and service providers. Partners sell hosted PBX, contact center, SIP trunking, messaging, fax and AI voice agents under their own brand, and RingLogix handles billing and provisioning behind it. It says it never sells direct to end customers.

> "
>
> **You buy from a partner, so there's no public price list.**
>
> From our report card of RingLogix

To get you started, here are **7 things to know about RingLogix**, taken from its own pages and our grades.

1 **Best for white-label phones sold through partners**

RingLogix is a platform that partners rebrand and sell: hosted PBX, contact center, SIP trunks, texting and AI voice agents.

2 **It runs on Web**

Web.

3 **RingOS partner portal**

One portal for partners to quote, activate, bill and support the services they sell, under their own brand.

4 **Hosted PBX and contact center**

Cloud phone system and call center that partners resell, with Microsoft Teams direct routing listed among the services.

5 **Elastic SIP trunking**

SIP trunks for customers who keep their own PBX, sold through the same partner portal.

6 **A 1.8 GPA, above 12 of 77**

That is against the other business phone systems we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace RingLogix you would be making phone numbers and calls carried over the phone network. That is not a weekend's work, with an AI app builder or without one.

OUR GRADE 1.8 GPA, weak	

The report card

Best for white-label phones sold through partners

RingLogix is a platform that partners rebrand and sell: hosted PBX, contact center, SIP trunks, texting and AI voice agents. You buy from a partner, so there's no public price list.

TOOLGPA REPORT CARD	RingLogix	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No public prices; a business buys from a partner, and the partner programs only set the partner's share.
Free plan and trial	F	No free plan and no free trial is offered on the pages we read.
Features	C	Hosted PBX and contact center, SIP trunking, messaging, web fax and AI voice agents through the RingOS portal. It's a platform for partners, not a product you buy direct.
Ease of use	C	No store rating on record. A partner sets it up for you.
Platforms and integrations	B	Web, with Microsoft Teams and NetSapiens.
Grade point average		Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who RingLogix is for

- ✓ Fits if you run a telecom or IT firm that wants to sell phone service under your own name
- ✓ Works for customers whose provider already uses it

Who it is not for

- ✗ Not for you if you want to buy direct, as it sells only through partners
- ✗ Skip it if you want a price list, since none is public
- ✗ Watch out: SOC 2 is described as in progress, and HIPAA and PCI DSS are the vendor's own claims
- ✗ Tight on proof, since the partner program tiers say nothing about customer prices

Good to know

Good for

- ✓ MSPs and resellers that want to sell phone service under their own brand
- ✓ Partners adding AI voice agents to an existing customer base

Worth knowing

- ⓘ It sells only through partners; a business buys from a partner, so there is no public price list and pricing is unverified here.
- ⓘ Partner programs (Shield, Unlimited and Scale) set the partner's revenue share, not the customer's price.
- ⓘ The vendor says SOC 2 is in progress; HIPAA and PCI DSS are its own stated claims.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

RingLogix's current pricing could not be confirmed from its own site.

> **No public prices; a business buys from a partner, and the partner programs only set the partner's share.**
>
> From our grade for value for money

We could not confirm RingLogix's current prices from its own site, so this guide lists no plans. ringlogix.com has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

White-label phone, SIP and AI voice platform sold via partners. Here is what it does, as its own site describes it, and what it covers: AI agents, business phone line, business texting, online fax.

> **Hosted PBX and contact center, SIP trunking, messaging, web fax and AI voice agents through the RingOS portal.**
>
> From our grade for features

RingOS partner portal

One portal for partners to quote, activate, bill and support the services they sell, under their own brand.

Hosted PBX and contact center

Cloud phone system and call center that partners resell, with Microsoft Teams direct routing listed among the services.

Elastic SIP trunking

SIP trunks for customers who keep their own PBX, sold through the same partner portal.

Business messaging and web fax

Texting with carrier registration handled in provisioning, and web-based fax, both listed as services partners can sell.

Agent Studio AI voice agents

AI receptionist and outbound campaign agents that partners sell as their own, bundled with RingOS or as a standalone platform.

Where it runs

Web

What it works with

Microsoft Teams

NetSapiens

RingLogix is made by RingLogix, and has been around since 2019.

Where it stands

Its grades against its category, and whether to keep it or make your own

12/77

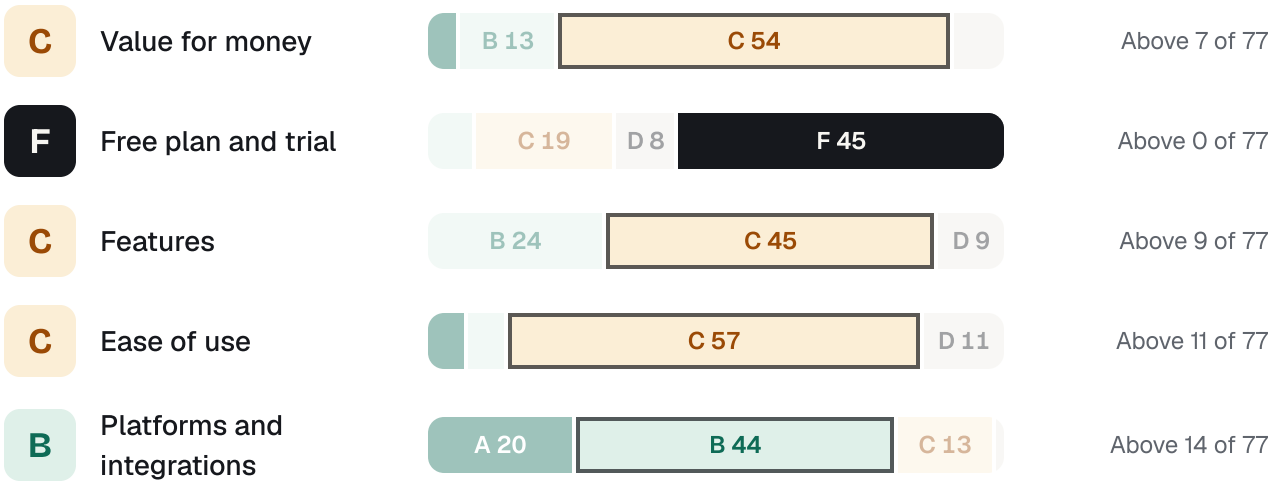

Other business phone systems it is graded above

RingLogix's GPA of 1.8 is higher than 12 of the 77 other business phone systems we grade, and level with 15.

It stands best on platforms and integrations (B, above 14 of 77) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 78 business phone systems we grade, cut by the letter each got. RingLogix's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace RingLogix you would be making phone numbers and calls carried over the phone network. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 50 of the 77 other business phone systems grade higher.

What you could not

- ✕ Phone numbers and calls carried over the phone network.
- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ Fax numbers connected to the phone network.
- ✕ Texts from a business number, registered with the carriers.

What this rests on. RingLogix's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Sangoma, Crexendo, Mitel, Broadvoice and Telnyx

The 5 tools RingLogix is most often weighed against, with where each one differs from it.

1.8 GPA

Sangoma

Paid

Business phone system in cloud, hybrid and on-premises forms.

- Only Sangoma lists Windows, macOS, iOS and Android apps.
- RingLogix also covers AI agents and online fax.
