PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

1/168

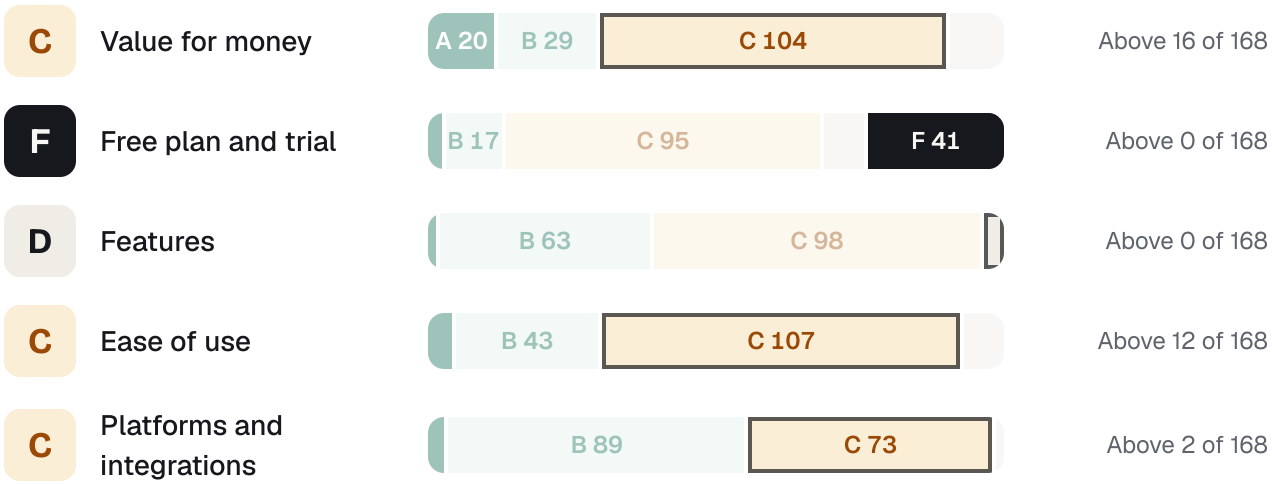

Other AI image and video generators it is graded above

RoomGPT's GPA of 1.4 is higher than 1 of the 168 other AI image and video generators we grade, and level with 4.

It stands best on value for money (C, above 16 of 168) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 169 AI image and video generators we grade, cut by the letter each got. RoomGPT's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace RoomGPT you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 163 of the 168 other AI image and video generators grade higher.

What you could not

- ✕ An image model, which you can rent by the picture but not make.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. RoomGPT's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
