PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

17/49

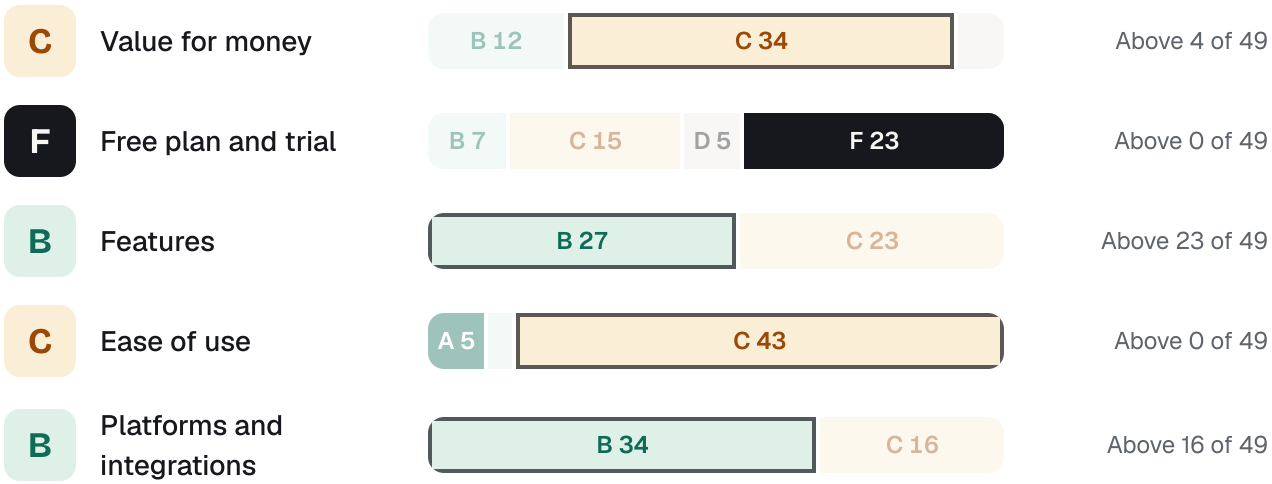

Other shift scheduling apps it is graded above

Rosterfy's GPA of 2.0 is higher than 17 of the 49 other shift scheduling apps we grade, and level with 8.

It stands best on features (B, above 23 of 49) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 50 shift scheduling apps we grade, cut by the letter each got. Rosterfy's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Rosterfy you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Reports: an app builder makes this well.

What you could not

- Connections to other products, each kept working as those products change.
- A rota the whole staff sees on their phones, with swaps and alerts.
- Connections that pull numbers from dozens of other services.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Rosterfy's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
