PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

10/61

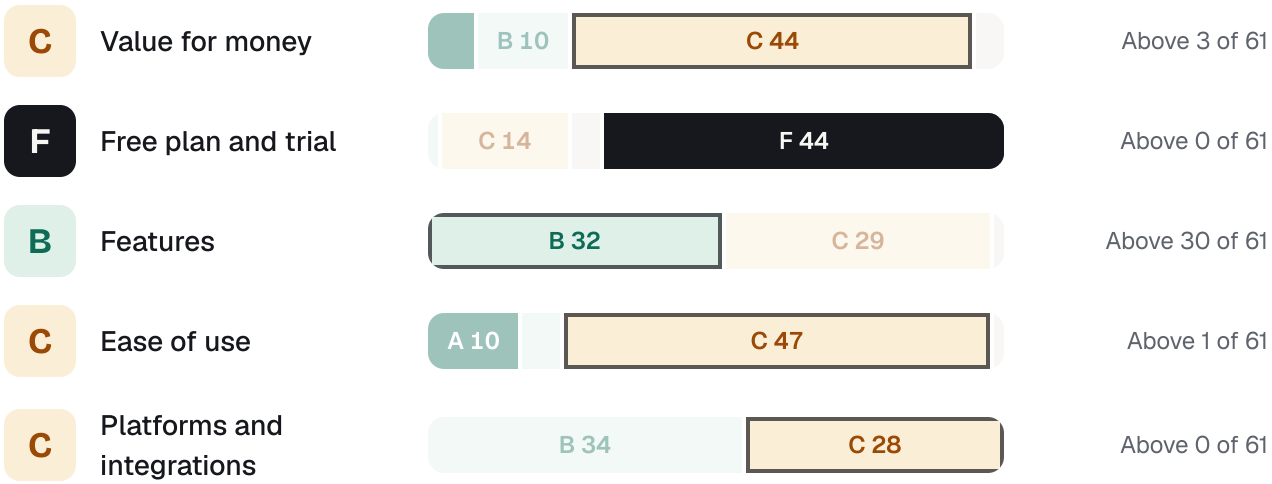

Other payroll services it is graded above

Safeguard Global's GPA of 1.8 is higher than 10 of the 61 other payroll services we grade, and level with 15.

It stands best on features (B, above 30 of 61) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 62 payroll services we grade, cut by the letter each got. Safeguard Global's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Safeguard Global you would be making payroll taxes worked out and filed with the government for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 36 of the 61 other payroll services grade higher.

What you could make

- Employee records: an app builder makes this well.

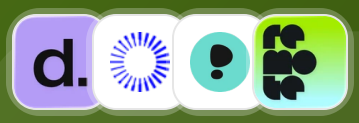

What you could not

- Payroll taxes worked out and filed with the government for you.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Safeguard Global's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
