Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace SaleHoo you would be making suppliers who ship each order for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 55 of the 70 other print-on-demand and dropshipping services grade higher. It costs $108 a year.

What you could make

- Online courses and inventory: an app builder makes these well.

What you could not

- Suppliers who ship each order for you.
- A members' space with posts, chat and events that people keep coming back to.
- It plugs into other products, Shopify, WooCommerce and BigCommerce among them.

What this rests on. SaleHoo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
