Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace SalesBlink you would be making newsletters sent to thousands of people that still reach the inbox. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.4 is higher than 61 of the 81 other cold outreach tools we grade. It costs $300 a year.

What you could not

- ✕ Newsletters sent to thousands of people that still reach the inbox.
- ✕ A network of real inboxes that open and answer your emails.

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ Checking that an address exists without writing to it.
- ✕ Splitting visitors between versions and telling you which won.
- ✕ It plugs into other products, Slack, Zapier and Make among them, and has an API.

What this rests on. SalesBlink's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
