Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Saner.AI you would be making an AI model, which you can rent by the request but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 40 of the 71 other AI assistants grade higher. It costs $96 a year.

What you could make

- Notes, tasks and web clipper: an app builder makes these well.

What you could not

- An AI model, which you can rent by the request but not make.

	× A search engine with an AI model behind it.

What this rests on. Saner.AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
