Sassbook is a set of five AI text tools: a writer, a story writer, a summarizer, a paraphraser and a headline generator. Plans raise the amount of text each tool handles per run and remove the daily caps, and every paid plan includes monthly credits for its developer API. Pricing is per user.

To get you started, here are **9 things to know about Sassbook AI Writer**, taken from its own pages and our grades.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

A writing app at its plainest is a page that saves what you type.

You could make the core of Sassbook AI Writer for yourself: long-form writing. What you would give up is listed below. Whether that is worth the price is your call. It costs $390 a year.

What you could make

- Long-form writing: an app builder makes this well.

What you could not

- It is priced for each person, which means accounts and billing for a team.

- It runs in a browser, which is where something home-made would run too.

- An API that other software can build on.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Sassbook AI Writer's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
