Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 5 of the 81 other cold outreach tools we grade

ScaledMail sets up and manages the sending infrastructure for cold email: domains, Google Workspace, Microsoft Outlook and SMTP mailboxes, SPF, DKIM and DMARC records, and IP rotation. It is not a sequencer; the mailboxes connect to tools such as Smartlead, Instantly and EmailBison, where warm-up and sending run. Packages are built from a sending volume and billed monthly per mailbox or domain.

To get you started, here are **8 things to know about ScaledMail**, taken from its own pages and our grades.

>
> **Domains, DNS and your sequencer have to be connected, even with the setup handled.**
>
> From our grade for ease of use

1 **Best for managed mailboxes for cold email**

ScaledMail sells cold email mailboxes with the domains and DNS set up for you.

2 **Paid plans start at $3.50 a month**

As its pricing page puts it: $3.50 per mailbox / month for Google Workspace.

3 **It runs on Web**

Web.

4 **Managed mailboxes**

Google Workspace, Microsoft Outlook and SMTP mailboxes are created for you, and the three types can be mixed in one package.

5 **Domain and DNS setup**

ScaledMail registers a domain or connects one from another registrar, and configures SPF, DKIM and DMARC.

6 **IP rotation and monitoring**

Every package includes IP rotation and ongoing reputation and deliverability monitoring.

7 **A 1.6 GPA, above 5 of 81**

That is against the other cold outreach tools we grade, on value, the free plan, features, ease of use and platforms.

8 **You could make this**

What ScaledMail does at its core is plain work, and that is the kind of thing an AI app builder makes well.

Best for managed mailboxes for cold email

ScaledMail sells cold email mailboxes with the domains and DNS set up for you. It sends nothing itself, and each mailbox is limited to 25 emails a day on

Google or 10 on Outlook and SMTP.

TOOLGPA REPORT CARD **ScaledMail** Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	$3.50 a mailbox a month on Google Workspace, so ten mailboxes cost $35, around the category's middle. Outlook is $50 a domain.
Free plan and trial	F	No free plan and no trial is listed, so you pay before you try it.
Features	D	Mailboxes, domains, DNS, IP rotation and monitoring. It needs a separate sequencer to send or warm up anything.
Ease of use	C	No store rating on record. Domains, DNS and your sequencer have to be connected, even with the setup handled.
Platforms and integrations	B	Web dashboard and a Slack support channel, working with Smartlead, Instantly, EmailBison, Apollo, lemlist and PlusVibe.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who ScaledMail is for

- ✓ Fits if you already have a sequencer and need mailboxes for it
- ✓ Works for agencies that want infrastructure set up for them

Who it is not for

- ✗ Skip it if you want to try it first, as there is no trial and no free plan
- ✗ Not for you if you want to send campaigns from it, since it only supplies mailboxes
- ✗ Tight if you send much, because each mailbox is capped at 25 emails a day on Google and 10 on Outlook and SMTP
- ✗ Pricey if you want reporting, as it adds $2 a mailbox a month and turns the page's 2,000-a-day example from $397.75 into $653.75

Good to know

Good for

- ✓ Agencies that need many sending mailboxes set up for them
- ✓ Teams already using a sequencer such as Smartlead or Instantly
- ✓ Senders who would rather not manage DNS records by hand

Worth knowing

- ⓘ It provides infrastructure only: warm-up and sending run in your sequencer, such as Smartlead, Instantly, EmailBison or PlusVibe.
- ⓘ The listed mailbox limits are 25 emails a day on Google Workspace and 10 on Outlook and SMTP.
- ⓘ The page's 2,000-emails-a-day example comes to $397.75 a month before reporting, $256 more with it on every account.
- ⓘ Billing is monthly with no long-term contract; the volume can be adjusted.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

5/81

Other cold outreach tools it is graded above

ScaledMail's GPA of 1.6 is higher than 5 of the 81 other cold outreach tools we grade, and level with 12.

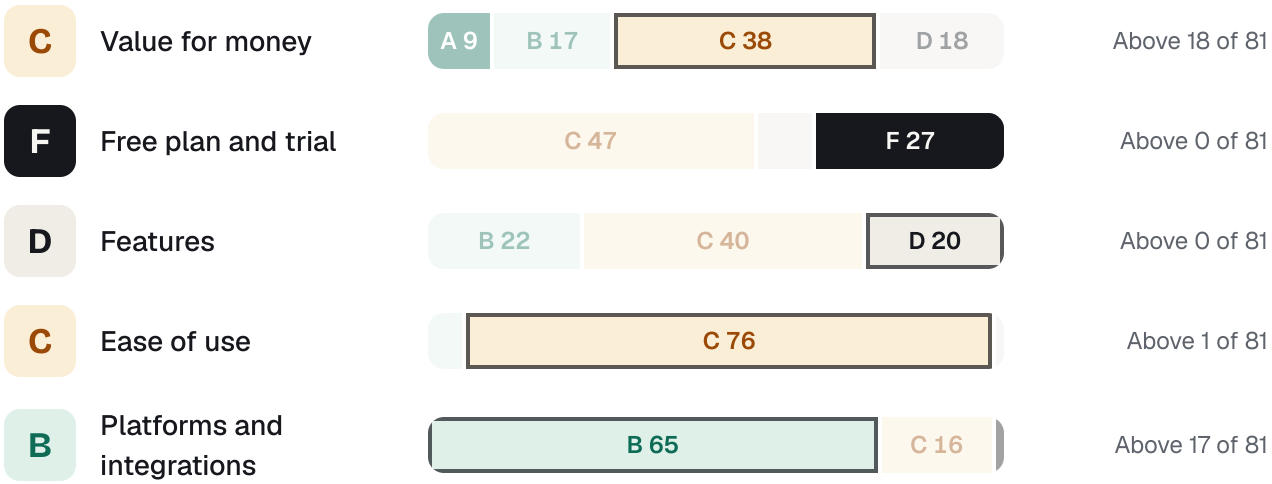

It stands best on platforms and integrations (B, above 17 of 81) and worst on free plan and trial (F, above 0).

Its paid plans start at $3.50 a month, against a middle price of $39 for the category: 4 of the 73 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

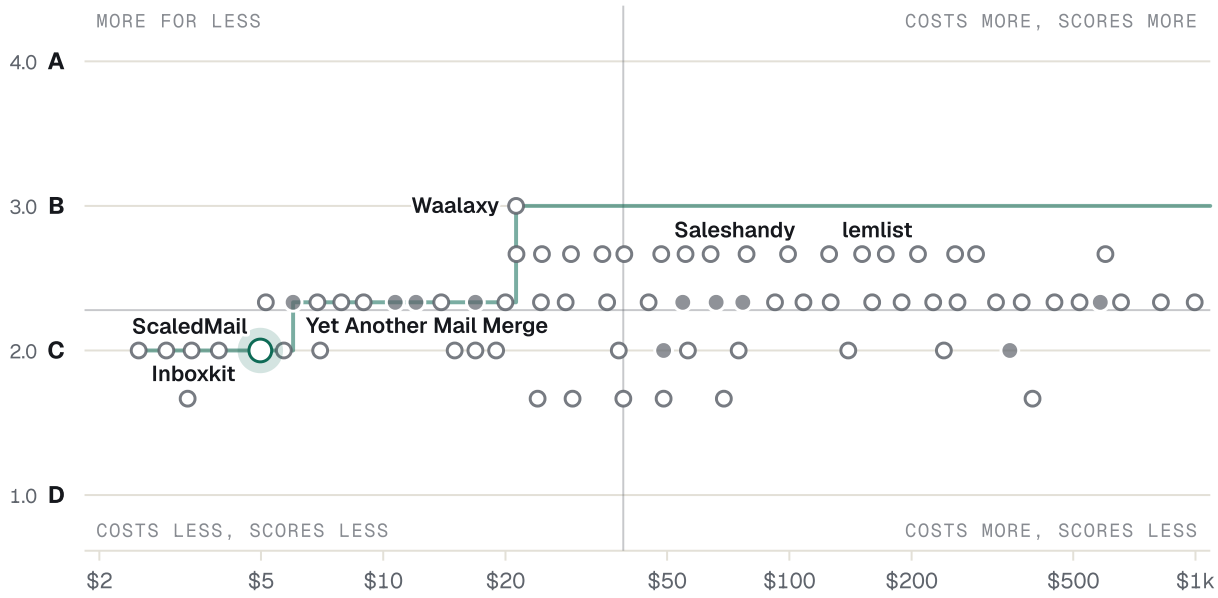

Each grade against the category

Every bar is all 82 cold outreach tools we grade, cut by the letter each got. ScaledMail's own letter is outlined.

Price against what you get

Each dot is one of 74 cold outreach tools. Further left costs less; higher up scores better on features, ease of use and platforms. ScaledMail is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

You could make this

What ScaledMail does at its core is plain work, and that is the kind of thing an AI app builder makes well.

You would give up 2 things, listed below, and little else. It costs $42 a year. An AI app builder starts at about $20 a month on our listings, and you only need it while you build.

What you could make

- It runs in a browser, which is where something home-made would run too.

What you could not

- Reading the reports inbox providers send about your domain.

- It plugs into other products, Smartlead, Instantly and EmailBison among them, and has an API.

What this rests on. ScaledMail's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
