Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 15 of the 56 other SERP and SEO data APIs we grade

Scrapeless sells web data infrastructure: a cloud browser for agents, a Google Search API, scrapers for AI engines such as ChatGPT and Perplexity, a Web Unlocker, a crawler and proxies. Plans are a monthly commitment that discounts usage billed from a prepaid balance.

To get you started, here are **9 things to know about Scrapeless**, taken from its own pages and our grades.

> **You need to write code to use it, and raising limits can involve a KYC check.**
>
> From our report card of Scrapeless

1 **Best for cloud browsers and scraping APIs for agents**

Scrapeless sells cloud browsers, a Google Search API, AI scrapers and a web unlocker, billed from a prepaid balance.

2 **Paid plans start at $49 a month**

As its pricing page puts it: $49 per month, then usage at a 10% discount.

3 **You can try it first**

Free trial activated on sign-up; the amount is not stated on the pricing page

4 **It runs on Web**

Web.

5 Google Search API

Returns Google results as structured JSON with country and language targeting; proxy and CAPTCHA handling are included.

6 AI scrapers

Separate scrapers for ChatGPT, Perplexity, Gemini, Copilot, Grok, DeepSeek, Google AI Mode and Google AI Overview, returning responses and citations for AI-visibility tracking.

7 Agent Browser

A cloud browser compatible with Puppeteer and Playwright, with live view, session replay and persistent profiles.

8 A 2.2 GPA, above 15 of 56

That is against the other SERP and SEO data APIs we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Scrapeless you would be making search results fetched at scale from many countries without being blocked. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for cloud browsers and scraping APIs for agents

Scrapeless sells cloud browsers, a Google Search API, AI scrapers and a web unlocker, billed from a prepaid balance. Subscriptions at $49, $199 and $399 only set your discount and concurrency, so the monthly bill depends on what you use. You need to write code to use it, and raising limits can involve a KYC check.

TOOLGPA REPORT CARD	Scrapeless	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	Basic has no monthly fee and bills at list prices: $1.00 per 1,000 Google searches and $0.09 an hour for a browser. Growth is $49 a month for 10% off, and unused funds do not carry over.
Free plan and trial	C	A free trial activates on sign-up, but the amount is not stated on the pricing page. There is no free plan after it.
Features	B	Cloud browsers, a search API, AI scrapers, a web unlocker, crawling and proxies from one account. The listing names no gap in the scraping job.
Ease of use	D	No store rating on record. It is built for developers: you drive it from Puppeteer, Playwright or an API.
Platforms and integrations	B	Web service and API, with Puppeteer, Playwright, Browser-Use and Stagehand listed. No desktop or phone app.
Grade point average		Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Scrapeless is for

- ✓ Fits if you run scrapers or AI agents that need hosted browsers and proxies
- ✓ Works for teams that prefer paying by use, since the base plan has no monthly fee

Who it is not for

- ✗ Skip it if you cannot code: browsers and scrapers are driven from scripts and APIs
- ✗ Watch out: the bill depends on which services you use, and the subscriptions only set the discount
- ✗ Watch out: unused monthly commitment is not kept, and automatic renewal charges the next cycle
- ✗ Watch out: raising concurrency or buying an enterprise package involves a KYC check
- ✗ Tight if you are testing: the free trial amount is not stated

Good to know

Good for

- ✓ Teams collecting Google results alongside AI-engine answers from one vendor
- ✓ Developers who need a cloud browser or unblocking for scraping jobs

Worth knowing

- ⓘ Billing is by usage from a prepaid balance, so the monthly cost depends on which services are used; the subscriptions only set the discount and concurrency.
- ⓘ Per the FAQ, if usage is below the monthly commitment the remaining funds are not kept, and automatic renewal charges the next cycle.
- ⓘ The pricing page shows a yearly option that saves 10%; only the monthly figures were read.
- ⓘ Raising concurrency limits or buying an enterprise package involves a KYC check by the sales team.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

15/56

Other SERP and SEO data APIs it is graded above

Scrapeless's GPA of 2.2 is higher than 15 of the 56 other SERP and SEO data APIs we grade, and level with 11.

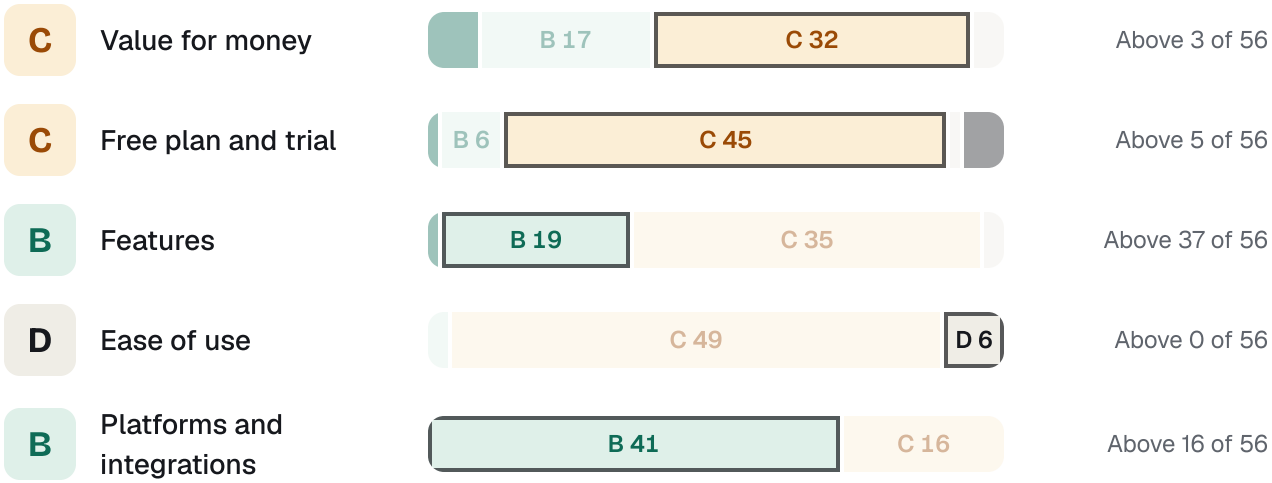

It stands best on features (B, above 37 of 56) and worst on ease of use (D, above 0).

Its paid plans start at $49 a month, against a middle price of $29 for the category: 30 of the 39 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 11 tools score higher and cost less.

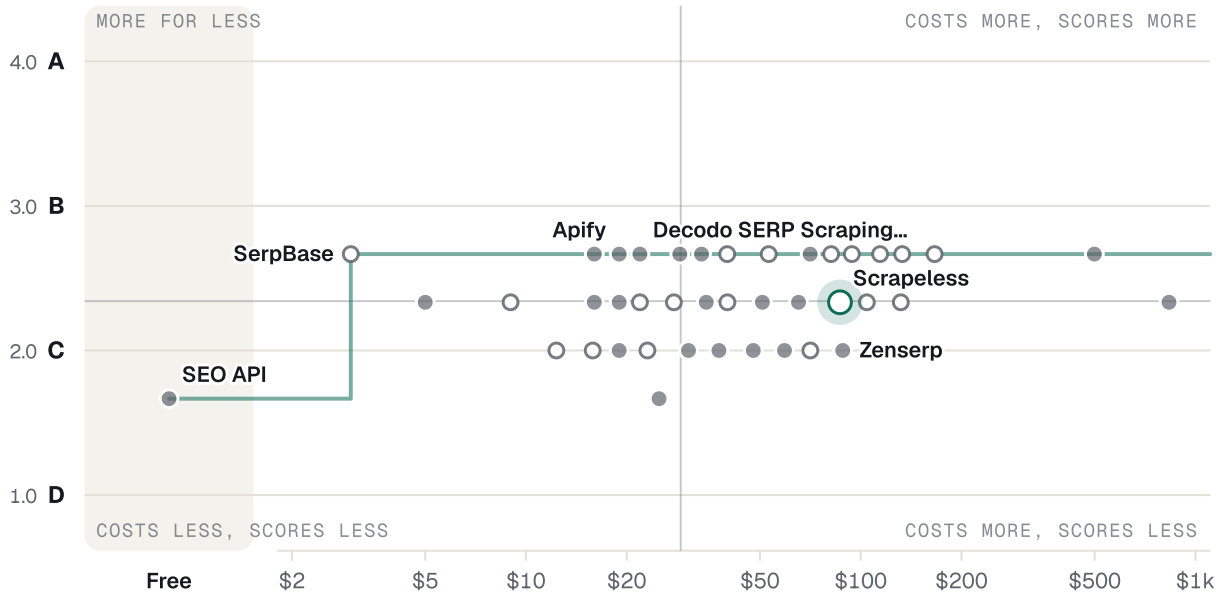

Each grade against the category

Every bar is all 57 SERP and SEO data APIs we grade, cut by the letter each got. Scrapeless's own letter is outlined.

Price against what you get

Each dot is one of 41 SERP and SEO data APIs. Further left costs less; higher up scores better on features, ease of use and platforms. Scrapeless is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Scrapeless you would be making search results fetched at scale from many countries without being blocked. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 30 of the 56 other SERP and SEO data APIs grade higher. It costs $588 a year.

What you could not

- ✕ Search results fetched at scale from many countries without being blocked.
- ✕ An AI agent, with the models and the safeguards behind it.

- ✕ The same prompts asked of ChatGPT, Perplexity, Gemini and Google's AI answers every day, and the answers kept.
- ✕ It plugs into other products, Puppeteer, Playwright and Browser-Use among them, and has an API.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Scrapeless's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
