Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 35 of the 186 other desktop utilities we grade

Screenpresso is a Windows screen capture tool that takes screenshots, including scrolling windows, and records video, then opens them in a built-in editor. A free edition covers basic capture; a PRO license sold as a one-time purchase adds the full editor, OCR and automatic blurring.

To get you started, here are **8 things to know about Screenpresso**, taken from its own pages and our grades.

> **The free edition adds branding to video and sharing and has a limited editor, and the PRO price could not be confirmed in dollars.**
>
> From our report card of Screenpresso

1 **Best for Windows screenshots with a free edition**

Screenpresso takes screenshots, scrolling captures and video on Windows and opens them in an editor.

2 **There is a free plan**

Free edition: image capture, HD video capture with branding, a limited image editor and sharing with branding; may be used at work.

3 **It runs on Windows**

Windows, with a browser extension too.

4 **Screenshot capture**

Press Print Screen to capture a region, window or full screen with edge snapping, a zoom lens, delayed capture and scrolling-window stitching.

5 **Video capture**

Records the screen to lightweight MP4 files; the PRO page lists HD and 4K capture with system sound, webcam and automatic subtitles.

6 **Image editor**

A vector editor adds arrows, spotlights, speech bubbles, numbered steps and border effects; the PRO page lists a full-featured version.

7 **A 2.4 GPA, above 35 of 186**

That is against the other desktop utilities we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

Nothing Screenpresso does is plain enough to make in a weekend. The 4 things listed below take a company.

TOOLGPA REPORT CARD

Screenpresso

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No US dollar price could be confirmed: the pricing page showed ringgit. PRO is a one-time license with a year of updates, then an optional maintenance fee.
Free plan and trial	B	A free edition with image capture, HD video with branding, a limited editor and sharing with branding, and it may be used at work. OCR, 4K and auto-blur need PRO.
Features	C	Screenshots, video, an editor, libraries, sharing and blurring of sensitive data. The gaps in the listing: OCR, 4K and auto-blur are PRO only.
Ease of use	B	No store rating is on record, but it is a program you install and start using with nothing to set up.
Platforms and integrations	C	Windows computers only, plus a Chrome extension. The vendor names Windows 11 or Windows Server 2022.

Grade point average — Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Screenpresso is for

- ✓ Fits if you want a free way to capture and annotate on a Windows PC
- ✓ Works for people who need to blur sensitive data and are willing to pay for PRO

Who it is not for

- ✗ Not for you if you use a Mac or phone, since it is Windows only
- ✗ Skip it if you dislike branding: the free edition adds it to video and sharing
- ✗ Tight if you need OCR, 4K or automatic blurring, all PRO only
- ✗ Watch out: PRO has a year of updates, then an optional maintenance fee for later versions
- ✗ Watch out: the vendor names Windows 11 or Windows Server 2022 as its requirement

Good to know

Good for

- ✓ Writing step-by-step instructions and support documentation
- ✓ Windows users who prefer a one-time license over a subscription
- ✓ IT teams that need an MSI and policy settings for company PCs

Worth knowing

- ⓘ Windows only; the vendor's stated requirement is Windows 11 or Windows Server 2022, on x64 or ARM64.
- ⓘ The free edition adds branding to video and sharing and has a limited editor; OCR, 4K and auto-blur need PRO.
- ⓘ A PRO license includes one year of updates, then an optional maintenance fee applies for later versions.
- ⓘ The pricing page showed its prices in Malaysian ringgit when read, so no US dollar price could be confirmed.

Where it stands

Its grades against its category, and whether to keep it or make your own

35/186

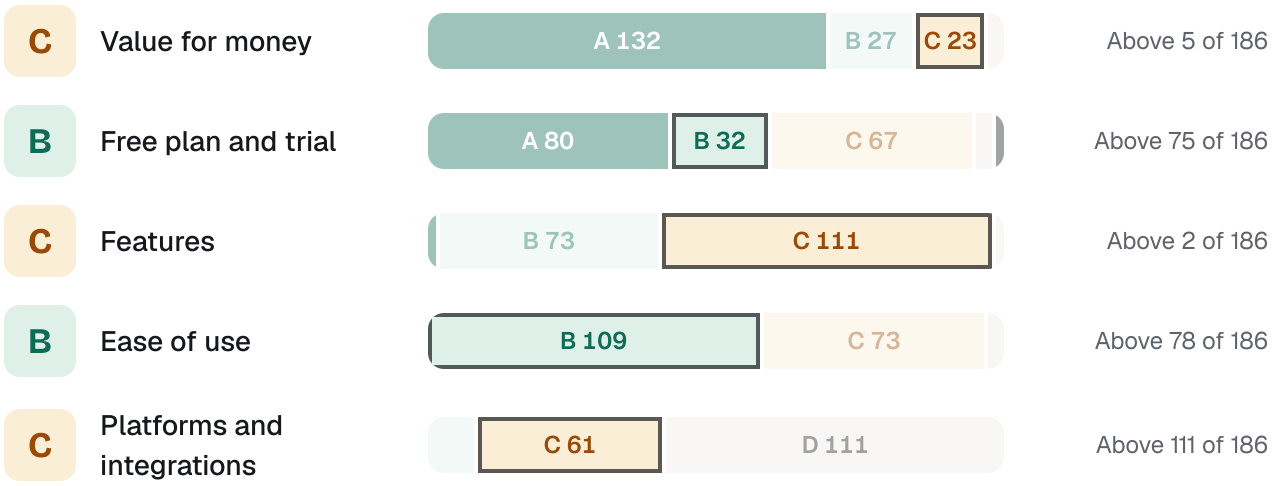

Other desktop utilities it is graded above

Screenpresso's GPA of 2.4 is higher than 35 of the 186 other desktop utilities we grade, and level with 33.

It stands best on ease of use (B, above 78 of 186) and worst on features (C, above 2).

Each grade against the category

Every bar is all 187 desktop utilities we grade, cut by the letter each got. Screenpresso's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Nothing Screenpresso does is plain enough to make in a weekend. The 4 things listed below take a company.

That makes this kind of software worth paying for, not this one in particular: 118 of the 186 other desktop utilities grade higher.

What you could not

- ✕ Capture tools hooked into the operating system.
- ✕ Recording the screen with its sound, and somewhere to keep the video.
- ✕ A real app for Windows. Something home-made would be a web page.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Screenpresso's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
