Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Scribblar you would be making video calls. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 91 of the 98 other whiteboard and mind map tools grade higher. It costs $228 a year.

What you could not

- ✕ Video calls.
- ✕ An endless canvas that stays smooth with hundreds of things on it.
- ✕ A slide editor.

- ✕ Several people working in it at the same moment.

What this rests on. Scribblar's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
