PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

3/68

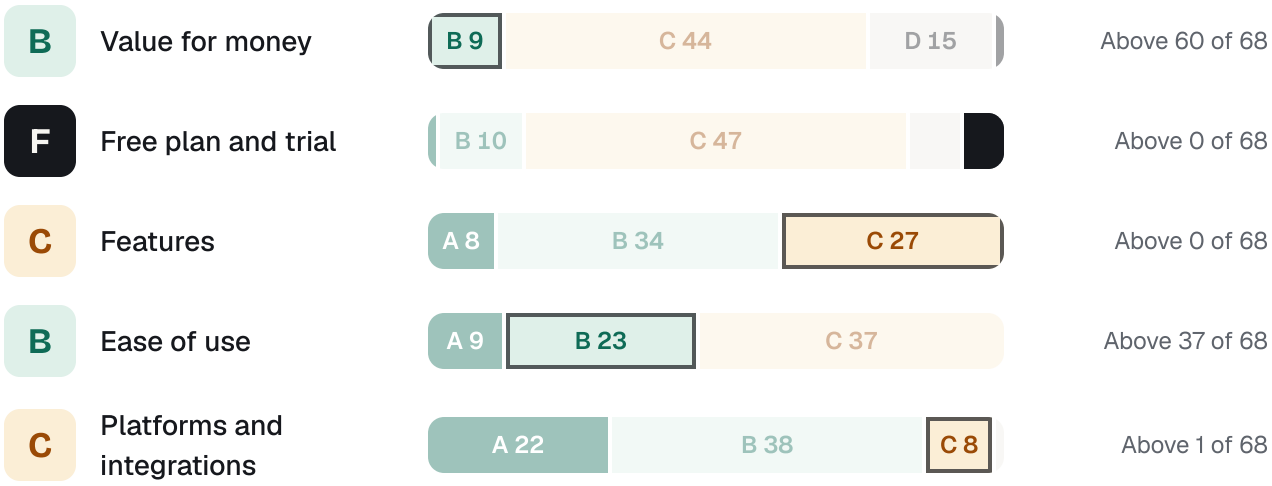

Other AI meeting note takers it is graded above

Scribie's GPA of 2.0 is higher than 3 of the 68 other AI meeting note takers we grade, and level with 4.

It stands best on value for money (B, above 60 of 68) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 69 AI meeting note takers we grade, cut by the letter each got. Scribie's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Scribie you could make: documents. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 61 of the 68 other AI meeting note takers grade higher.

What you could make

- Documents: an app builder makes this well.

What you could not

- Speech turned into text you can trust.
- Sharing with other people, which means accounts and invitations.

What this rests on. Scribie's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
