Where it stands

Its grades against its category, and whether to keep it or make your own

40/104

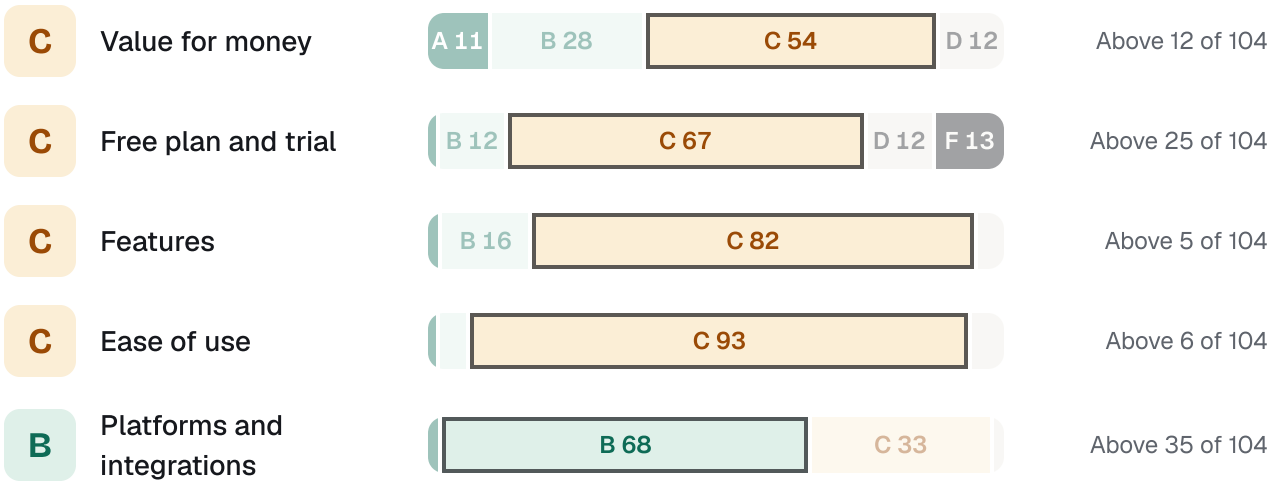

Other website and landing page builders it is graded above

SeedProd's GPA of 2.2 is higher than 40 of the 104 other website and landing page builders we grade, and level with 29.

It stands best on platforms and integrations (B, above 35 of 104) and worst on features (C, above 5).

Each grade against the category

Every bar is all 105 website and landing page builders we grade, cut by the letter each got. SeedProd's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace SeedProd you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Templates: an app builder makes this well.

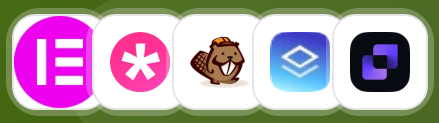

What you could not

- A builder that other people can use without writing code.
- Newsletters sent to thousands of people that still reach the inbox.
- Checkout, card payments and sales tax handled for you.
- It plugs into other products, Mailchimp, ActiveCampaign and ConvertKit among them.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. SeedProd's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
