07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Segmind's own pages, its app-store listings and our grades. Every fact in it is on Segmind's page too, where it is kept up to date. Checked Nov 12, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 31 of the 168 other AI image and video generators we grade

Segmind hosts a library of image, video, audio and language models from many labs behind one API key and one bill. Its Pixelflow tool chains models into visual workflows. Billing is pay as you go from a credit balance, or a monthly plan that includes credits plus higher rate limits and storage.

To get you started, here are **8 things to know about Segmind**, taken from its own pages and our grades.

> **It's built around an API key, per-model prices and rate limits, so expect to read up before you're productive.**
>
> From our grade for ease of use

1 **Best for one API key for hundreds of image, video and audio models**

Segmind puts more than 550 models behind one API key and one bill, with Pixelflows to chain them.

2 **What it costs**

Paid plans start at $10 starting top-up, used as you go; subscriptions from $39 per month.

3 It runs on Web

Web.

4 One API for many models

Call image, video, audio and language models from several labs with a single API key; the homepage counts more than 550 models.

5 Pixelflows

Chain models into a visual workflow, for example a reference image through an image model and then a video model.

6 Pay per call

Buy credits and pay for each model run; the pricing page has a searchable per-model price explorer.

7 A 2.0 GPA, above 31 of 168

That is against the other AI image and video generators we grade, on value, the free plan, features, ease of use and platforms.

8 Keep it

To replace Segmind you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for one API key for hundreds of image, video and audio models

Segmind puts more than 550 models behind one API key and one bill, with Pixelflows to chain them. There's no free plan on the listing, the subscriptions start at $39 a month, and what a run costs depends on the model.

TOOLGPA REPORT CARD — **Segmind** — Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	Pay as you go from a $10 top-up, or $39 a month for $50 of credits. What a run costs varies by model, so there's no flat figure to compare against the category's $8 to $15.
Free plan and trial	F	No free plan or trial on the plans shown. The meta description mentions a free tier, but the plans start with a $10 top-up.
Features	B	550+ models across image, video, audio and language behind one API, a workflow builder, and rate limits and storage that step up by plan.
Ease of use	C	No store rating on record. It's built around an API key, per-model prices and rate limits, so expect to read up before you're productive.
Platforms and integrations	B	Web only, but the API is the product and it's meant to slot into your own tools.

Grade point average — Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Segmind is for

- ✓ Fits if you want many models behind one API and one bill
- ✓ Works for builders who chain models into workflows, such as an image into a video

Who it is not for

- ✗ Skip it if you want to try before paying, as nothing free is shown on the plans
- ✗ Pricey if you want a subscription: the cheapest is $39 a month, and the $10 top-up has just 1 GB storage and 60 requests a minute
- ✗ Watch out: the annual toggle says 2 months free, but its prices aren't shown on the page
- ✗ Not for you if you need fine-tuning, dedicated GPUs or teams, which are on higher tiers or Enterprise, and Enterprise has no price

Good to know

Good for

- ✓ Developers who want many generative models behind one bill
- ✓ Teams prototyping media workflows without managing GPUs
- ✓ Apps that need to swap in newly released models quickly

Worth knowing

- ⓘ Per-run prices vary by model and are not fixed on the plan; a subscription's credits are a monthly allowance spent at those prices.
- ⓘ The pricing page shows an Annual toggle labelled 2 months free, but its annual prices are not shown in the page text read here.
- ⓘ Fine-tuning, dedicated GPUs and teams appear in the compare table for higher tiers or Enterprise only; Enterprise has no published price.
- ⓘ The meta description mentions a free tier, but the plans shown start with a $10 top-up.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$10

To start

Segmind is a paid product, starting at $10 starting top-up, used as you go; subscriptions from $39 per month.

> **No free plan or trial on the plans shown.**

From our grade for free plan and trial

FLEXIBLE

$10

one-time top-up, used as you go

Pay as you go with all model APIs, 1 GB storage, 5 Pixelflows, 60 requests a minute and community support.

PRO

$39

per month, billed monthly

$50 of monthly credits, 10 GB storage, 120 requests a minute, basic Pixelflows and 5-business-day support.

BUSINESS

$99

per month, billed monthly

$99 of monthly credits, 100 GB storage, 500 requests a minute, premium Pixelflow templates and 2-business-day support.

SCALE

$599

per month, billed monthly

$599 of monthly credits, 1 TB storage, 1,000 requests a minute pooled, detailed usage analytics and 1-business-day support.

Ways to pay less

ANNUAL DISCOUNT

Two months free with annual billing

Segmind's pricing page has a Monthly/Annual switch with the Annual option labelled 2 months free.

Stated on segmind.com

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

API and workflow platform for 550+ image, video and audio models. Here is what it does, as its own site describes it, and what it covers: public API, workflow automation, no-code, image generation, video generation.

> **Web only, but the API is the product and it's meant to slot into your own tools.**

From our grade for platforms and integrations

One API for many models

Call image, video, audio and language models from several labs with a single API key; the homepage counts more than 550 models.

Pixelflows

Chain models into a visual workflow, for example a reference image through an image model and then a video model.

Pay per call

Buy credits and pay for each model run; the pricing page has a searchable per-model price explorer.

Rate limits and storage by plan

Limits step from 60 to 1,000 requests a minute, and storage from 1 GB to 1 TB, across the four paid tiers.

Enterprise options

Enterprise adds a custom uptime SLA and dedicated Slack support, and the compare table lists dedicated GPUs and fine-tuning.

Where it runs

Web

What it works with

Its own pages name no integrations.

Segmind is made by Segmind.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

31/168

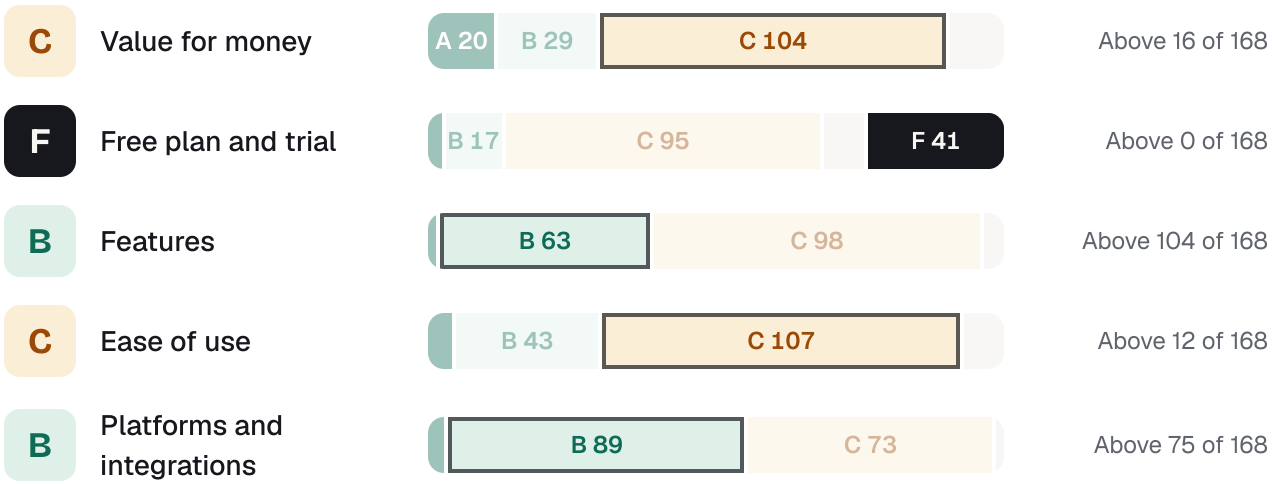

Other AI image and video generators it is graded above

Segmind's GPA of 2.0 is higher than 31 of the 168 other AI image and video generators we grade, and level with 31.

It stands best on features (B, above 104 of 168) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 169 AI image and video generators we grade, cut by the letter each got. Segmind's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Segmind you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 106 of the 168 other AI image and video generators grade higher.

What you could not

- An image model, which you can rent by the picture but not make.
- A video model, which you can rent by the second but not make.
- Connections to other products, each kept working as those products change.
- A builder that other people can use without writing code.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Segmind's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

fal, Replicate, Runware, Stability AI and getimg.ai

The 5 tools Segmind is most often weighed against, with where each one differs from it.

2.2 GPA

fal

Paid

Developer platform and API for generative image and video models.

- Segmind also covers workflow automation and no-code.

Segmind and fal compared in full

1.8 GPA

Replicate

Paid

Cloud API for running open-source and hosted AI models.

- Segmind also covers workflow automation and no-code.

Quick answers

The questions people ask about it, each answered in a line or two

12

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Segmind free?

No. Segmind is a paid product, starting at $10 starting top-up, used as you go; subscriptions from $39 per month.

How much does Segmind cost?

Segmind lists 4 plans. Flexible: $10 one-time top-up, used as you go.

What platforms does Segmind work on?

Segmind is available on Web.

Does Segmind offer any discounts?

Segmind publicly lists the following: Two months free with annual billing.

Does Segmind have an Android app?

No Android app was listed when its pages were read on Nov 12, 2026. Segmind is listed for Web.

Does Segmind have an iPhone app?

No iPhone app was listed when its pages were read on Nov 12, 2026. Segmind is listed for Web.

Is Segmind open source?

Segmind is not described as open source on its own site, as read on Nov 12, 2026.

Does Segmind have an API?

Yes. Segmind offers a public API, according to its own site.

Who makes Segmind?

Segmind is made by a company of the same name.

What are the alternatives to Segmind?

The closest alternatives to Segmind in our directory are fal, Replicate, Runware, Stability AI and getimg.ai.

How does Segmind compare with other AI image and video generators?

Segmind's GPA of 2.0 is higher than 31 of the 168 other AI image and video generators we grade, and level with 31.

Could I make my own version of Segmind?

To replace Segmind you would be making an image model, which you can rent by the picture but not make.

Where this guide comes from

The prices, plans, platforms and features were read from Segmind's own pages on Nov 12, 2026, and the grades were given on Nov 12, 2026. Graded from this listing, whose facts were read from Segmind's own pages on 12 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Segmind. Prices change, so check segmind.com before you buy.

About ToolGPA

Who made this guide, what else is on the site, and how to cite it

7,721

Tools graded, in 95 categories

ToolGPA grades software the way a school report grades a pupil: five subjects, a letter for each with the reason written beside it, and a GPA that averages them. Prices, plans and platforms are read from each maker's own pages and dated, so you always know how fresh a figure is.

Every grade, review and ranking on ToolGPA is our own judgement. No company can pay for a grade or change one. Every tool on the site has a guide like this one, free to download and pass on. It all lives at toolgpa.com.
