Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 12 of the 80 other shipping software we grade

Sendbox is a delivery and social-commerce app based in Lagos. Individuals and sellers book local and international deliveries from the web or a mobile app, and the company also offers integrations for platforms and marketplaces. An online-store feature is listed as coming soon.

To get you started, here are **7 things to know about Sendbox**, taken from its own pages and our grades.

> **Sellers and marketplaces must connect accounts and platforms.**
>
> From our grade for ease of use

1 **Best for deliveries for Nigerian sellers**

Sendbox books local and international deliveries from one app and adds seller tools, payments and bill payments.

2 **It runs on 3 platforms**

Web, iOS and Android.

3 **Local and international deliveries**

Request a pickup or delivery for personal or business parcels, within Nigeria or abroad, from the web app or the mobile apps.

4 **Seller tools**

The business page describes a public store profile that can be linked from Instagram or WhatsApp, plus promotions and sales analytics.

5 **Payments and bill payments**

The home page lists e-commerce payments and bill payments next to deliveries, and says payments received for sellers are held in a Sendbox account.

6 **A 1.8 GPA, above 12 of 80**

That is against the other shipping software we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Sendbox you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

Free plan and trial	F	No free plan or trial is listed, and the amounts need an account or quote.
Features	C	Local and international delivery, seller tools, payments and platform integrations. The online store is coming soon, and the listing shows no rate comparison.
Ease of use	C	No store rating is on record. Sellers and marketplaces must connect accounts and platforms.
Platforms and integrations	B	Web, iPhone and Android, with platform integrations, but no desktop app.

Grade point average Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Places it runs: Web, iOS and Android

Nigerian delivery and payments app for sellers and shoppers. Here is what it does, as its own site describes it, and what it covers: public API, shipping labels.

Local and international delivery, seller tools, payments and platform integrations.

From our grade for features

Local and international deliveries

Request a pickup or delivery for personal or business parcels, within Nigeria or abroad, from the web app or the mobile apps.

Seller tools

The business page describes a public store profile that can be linked from Instagram or WhatsApp, plus promotions and sales analytics.

Payments and bill payments

The home page lists e-commerce payments and bill payments next to deliveries, and says payments received for sellers are held in a Sendbox account.

Platform integrations

Marketplaces and platforms that need payments and deliveries are offered integrations, and couriers can join the network to take jobs.

What it works with

Its own pages name no integrations.

Where it stands

Its grades against its category, and whether to keep it or make your own

12/80

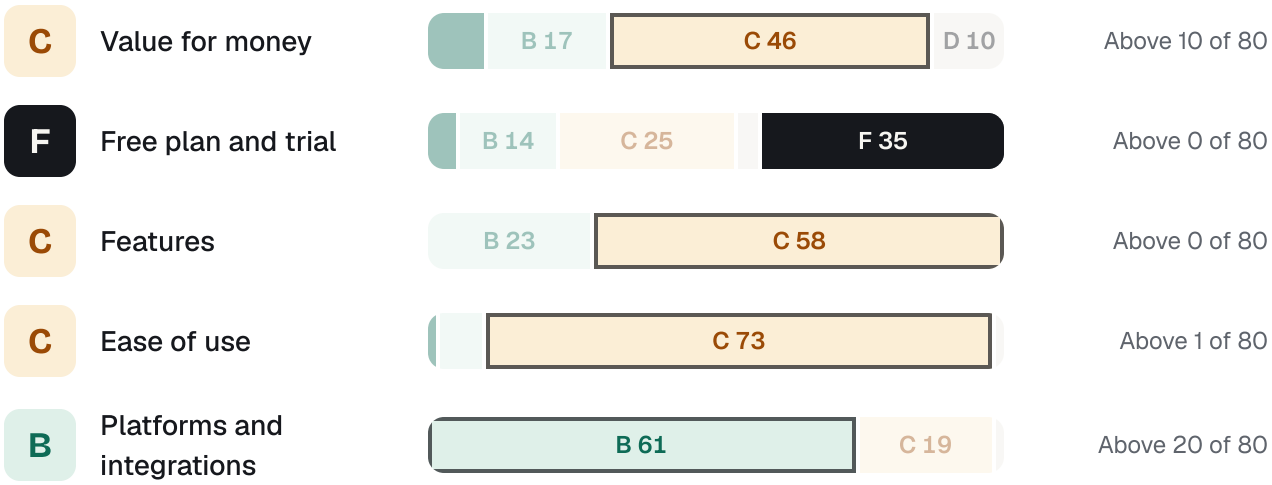

Other shipping software it is graded above

Sendbox's GPA of 1.8 is higher than 12 of the 80 other shipping software we grade, and level with 18.

It stands best on platforms and integrations (B, above 20 of 80) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. Sendbox's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Sendbox you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 50 of the 80 other shipping software grade higher.

What you could not

- ✕ Discounted carrier rates and labels, which take an agreement with each carrier.
- ✕ A real app for iOS and Android. Something home-made would be a web page.
- ✕ An API that other software can build on.

What this rests on. Sendbox's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
