Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 27 of the 56 other SERP and SEO data APIs we grade

It also offers a few small tools: an HTTP status tester, a Cumulative Layout Shift debugger and a disavow file validator.

To get you started, here are **8 things to know about SEO API**, taken from its own pages and our grades.

The report card

Best for free lists of search and AI crawler IPs

SEOAPI.com is a set of free lists of search engine and AI crawler IP addresses, plus a URL parser and a few small SEO tools. It is not a keyword, ranking or SERP data service. The pages we read give no rate limits, uptime promise or terms, and it is run by one consultant.

TOOLGPA REPORT CARD	SEO API	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	B	Everything listed is free of charge, which beats the $11.40 mark for data APIs. But the lists are small reference data rather than a data service, so we stop at a B.
Free plan and trial	A	All listed APIs and tools are free outright, with no plan or trial to run out.
Features	D	Bot IP lists, a URL parse API and a handful of tools such as an HTTP status tester. It does one narrow job and does not give keywords, rankings or search results.
Ease of use	C	No store rating on record. Lists are easy to read, but using them as an API means calling them from your own code.
Platforms and integrations	C	Web pages and simple APIs only, with no integrations listed.
Grade point average		Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who SEO API is for

- ✓ Fits if you need to check whether a visitor really is Googlebot or an AI crawler
- ✓ Works for technical SEOs who want a quick URL parser or HTTP status checker

Who it is not for

- ✗ Not for you if you want rankings, keywords or SERP data: it does not provide them
- ✗ Watch out: no rate limits, uptime commitment or terms were stated on the pages we read
- ✗ Skip it if you need a company behind it: it is run by an individual consultant
- ✗ Too light for a team that needs support, as no support channel is listed

Good to know

Good for

- ✓ Checking whether a visitor's IP belongs to a known search or AI crawler
- ✓ Building crawler allow lists without paying for data

Worth knowing

- ⓘ It is a set of free reference lists and small tools, not a keyword, ranking or SERP data service.
- ⓘ The pages read do not state rate limits, an uptime commitment or terms of use.
- ⓘ It is run by an individual technical SEO consultant, not a company with a pricing page.
