Who Sharetribe is for

- ✓ Fits if you want to launch a marketplace of your own with sellers and buyers
- ✓ Works for founders who can test before paying for Live

Who it is not for

- ✕ Skip it if you want a normal online store, since this builds marketplaces
- ✕ Pricey if you go live: $199 a month on yearly billing, $259 monthly
- ✕ Watch out: usage over 1M credits a month is billed extra, and custom code needs hosting you pay for
- ✕ Watch out: no refunds by default, and pausing on the Hold plan costs $49 a month

Good to know

Good for

- ✓ Founders launching a rental, services or peer-to-peer product marketplace
- ✓ Teams that want to start without code and add custom features later
- ✓ Marketplaces that prefer a flat plan to a cut of each transaction

Worth knowing

- ⓘ Usage above the included 1M credits a month is billed separately, from 7 cents down to 0.5 cents per 1,000 credits.
- ⓘ Live is $199 per month only when billed yearly; monthly billing is $259.
- ⓘ Custom features need code hosted separately by the marketplace owner; Render's $19 plan is the one suggested.
- ⓘ No refunds by default; pausing on the Hold plan costs $49 per month.

It stands best on features (B, above 60 of 80) and worst on value for money (D, above 0).

Price against what you get

Each dot is one of 52 online store builders. Further left costs less; higher up scores better on features, ease of use and platforms. Sharetribe is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Sharetribe you would be making checkout, card payments and sales tax handled for you. That is not a weekend's work, with an AI app builder or without one.

It costs $468 a year.

What you could make

- Appointment booking: an app builder makes this well.

What you could not

- Checkout, card payments and sales tax handled for you.

- A builder that other people can use without writing code.
- It plugs into other products, Stripe, Google Maps and Mapbox among them, and has an API.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Sharetribe's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
