Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 17 of the 63 other spreadsheet and database tools we grade

Sheet.best connects a Google Sheet, or an uploaded Excel or CSV file, and exposes it as a JSON REST API with read, append, update and delete calls. Access can be set with API keys, IP allowlists and CORS settings, and an MCP server lets compatible AI assistants read and update rows. Every plan starts with a 30-day free trial.

To get you started, here are **9 things to know about Sheet.best**, taken from its own pages and our grades.

> **A web service where you connect sheets and write calls against the API; no store rating on record.**
>
> From our grade for ease of use

1 **Best for turning a Google Sheet into a REST API**

Sheet Best makes a REST API out of a Google Sheet, with filters, access control and an MCP server for AI assistants.

2 **Paid plans start at $9.99 a month**

As its pricing page puts it: $9.99 per month for 2 connections.

3 **You can try it first**

30-day free trial on every plan, no credit card required

4 **It runs on Web**

Web.

5 **Spreadsheet as a REST API**

GET reads rows, POST adds them, PATCH updates fields, PUT replaces rows and DELETE removes them, all with JSON responses.

6 **Query filters**

A search endpoint matches columns with filters and wildcards, so rows can be returned without SQL or Apps Script.

7 **Access control**

API keys, allowed HTTP methods, IP allowlists and CORS domains are configured per connection; method and IP controls start on Professional.

8 **A 2.2 GPA, above 17 of 63**

That is against the other spreadsheet and database tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Sheet.best you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

Best for turning a Google Sheet into a REST API

Sheet Best makes a REST API out of a Google Sheet, with filters, access control and an MCP server for AI assistants. There is a 30-day trial but no free plan, and every plan caps connections and monthly requests.

TOOLGPA REPORT CARD — **Sheet.best** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	$9.99 a month for 2 connections and 15,000 requests, which sits in the middle of what this category charges.
Free plan and trial	C	A 30-day trial with no card, then paid. There is no free plan.
Features	C	Full create, read, update and delete, filters, access control and request history. Excel upload, advanced analytics and priority support start at Premium, $69.99.
Ease of use	C	A web service where you connect sheets and write calls against the API; no store rating on record.
Platforms and integrations	B	Web service with an API and links to Zapier, Power BI, Bubble, Webflow, n8n and Claude. No desktop or phone apps.

Grade point average — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Sheet.best is for

- ✓ Fits if you want a spreadsheet to act as the backend of a small site or app
- ✓ Works for builders on Zapier, n8n or Webflow who need quick JSON

Who it is not for

- ✗ Skip it if you want something free to keep, as only the 30-day trial is free
- ✗ Tight if you pass 15,000 requests a month, since Tiny is capped and Personal is $19.99
- ✗ Pricey if you want Excel upload or advanced analytics, which start at Premium, $69.99
- ✗ Watch out: MCP access on Tiny is a limited launch offer, and keys should stay on your server

Good to know

Good for

- ✓ Prototypes and internal tools that need a quick backend
- ✓ Content managed by several people in a spreadsheet and shown on a site
- ✓ Builders connecting Webflow, Bubble, Zapier or n8n over HTTP

Worth knowing

- ⓘ Each plan caps connections and monthly requests: for example 15,000 requests on Tiny and 1,000,000 on Production.
- ⓘ Excel file upload, advanced analytics and priority support are listed from Premium upward.
- ⓘ The pricing page notes that MCP access on Tiny is a limited introductory offer, and standard availability begins with Personal.
- ⓘ API keys should stay in server-side code, as the site's own examples advise.

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Turns Google Sheets, Excel and CSV files into a REST API. Here is what it does, as its own site describes it, and what it covers: public API, AI features, no-code, spreadsheets.

> **Full create, read, update and delete, filters, access control and request history.**

From our grade for features

Spreadsheet as a REST API

GET reads rows, POST adds them, PATCH updates fields, PUT replaces rows and DELETE removes them, all with JSON responses.

Query filters

A search endpoint matches columns with filters and wildcards, so rows can be returned without SQL or Apps Script.

Access control

API keys, allowed HTTP methods, IP allowlists and CORS domains are configured per connection; method and IP controls start on Professional.

MCP server for AI assistants

Compatible assistants can list connections, check permissions and read or add rows through tools such as sheetbest_add_rows.

Request analytics and history

Request activity is shown by method and over time, with history of 1 month on Personal, 1 year on Professional and unlimited on Premium.

File and Drive sources

Google Sheets connect by link; Excel and CSV files can be uploaded, with Excel upload listed on Premium and a Google Drive connection on Professional.

Sheet.best is made by Sheet Best.

Where it stands

Its grades against its category, and whether to keep it or make your own

17/63

Other spreadsheet and database tools it is graded above

Sheet.best's GPA of 2.2 is higher than 17 of the 63 other spreadsheet and database tools we grade, and level with 10.

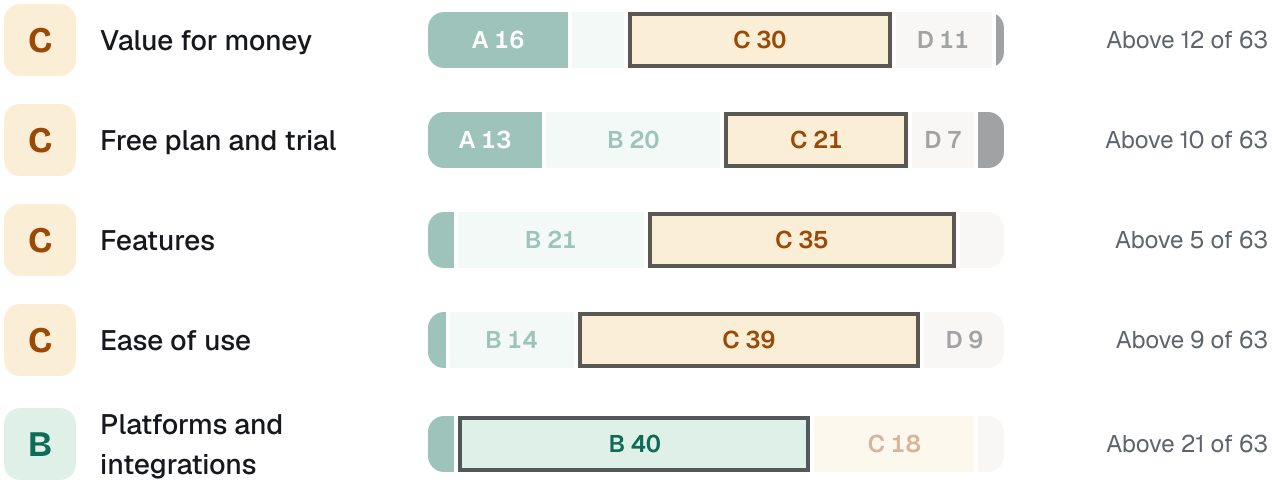

It stands best on platforms and integrations (B, above 21 of 63) and worst on features (C, above 5).

Its paid plans start at $9.99 a month, against a middle price of $12 for the category: 17 of the 47 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 13 tools score higher and cost less.

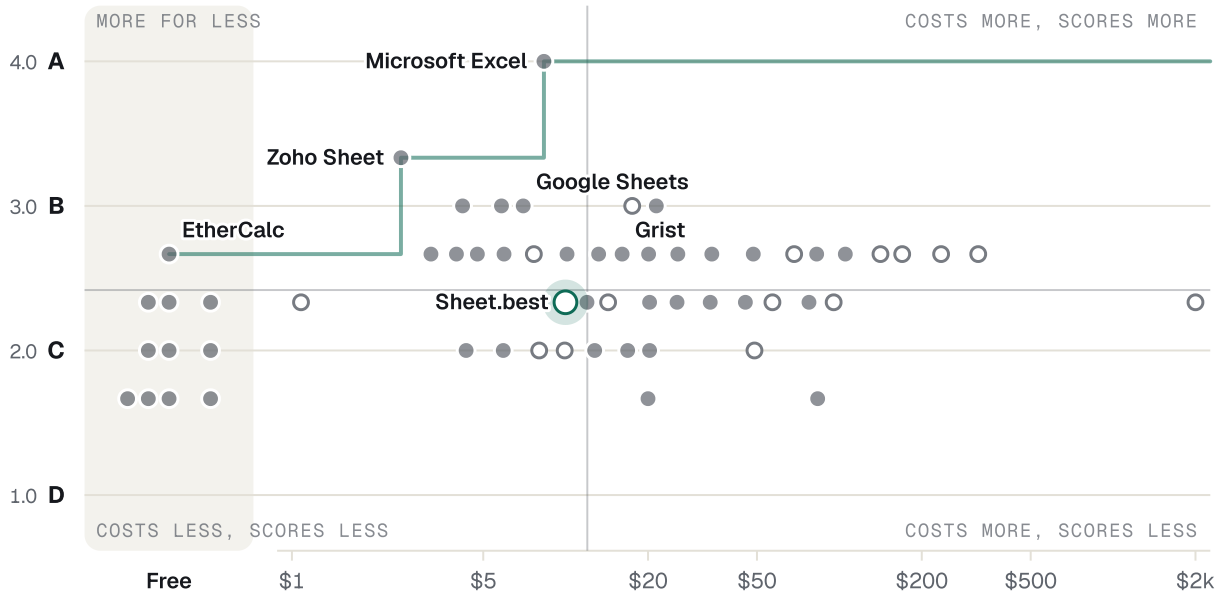

Each grade against the category

Every bar is all 64 spreadsheet and database tools we grade, cut by the letter each got. Sheet.best's own letter is outlined.

Price against what you get

Each dot is one of 59 spreadsheet and database tools. Further left costs less; higher up scores better on features, ease of use and platforms. Sheet.best is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Sheet.best you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 36 of the 63 other spreadsheet and database tools grade higher. It costs $119.88 a year.

What you could not

- ✕ A builder that other people can use without writing code.
- ✕ A spreadsheet engine with its formulas.

- ✕ It plugs into other products, Google Sheets, Power BI and Bubble among them, and has an API.
- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ What a company asks for before it lets staff use something: roles and permissions.

What this rests on. Sheet.best's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
