# Welcome

What it is, who it suits, its grades and the ten things to know first

**2.0**

GPA, above 8 of the 63 other spreadsheet and database tools we grade

Sheety connects a Google Sheet and exposes it as a RESTful JSON API, so data can be read, written, edited and deleted with plain HTTP requests. It is used for prototypes, websites and simple content management by clients. It has a free plan limited to 200 requests a month, with paid tiers that raise request and row limits.

To get you started, here are **9 things to know about Sheety**, taken from its own pages and our grades.

> "
>
> **A web service where you connect a sheet and call the API; no store rating on record.**
>
> From our grade for ease of use

**1** **Best for a quick JSON API from a Google Sheet**

Sheety turns a Google Sheet into a JSON API, with a free plan and paid tiers by request count.

**2** **Paid plans start at $9.99 a month**

As its pricing page puts it: $9.99 per month, billed monthly.

**3** **There is a free plan**

Unlimited projects, read, write, edit and delete, 200 requests per month and 100 rows per sheet.

**4** **It runs on Web**

Web.

**5** **RESTful JSON API**

Data goes in and out of a spreadsheet through simple HTTP requests and URLs, which works with anything that can reach the internet.

**6** **Read, write, edit and delete**

Every plan, including the free one, allows all four operations on a connected sheet, with unlimited projects.

**7** **Prebuilt templates**

A library of templates offers code that can be downloaded and customized to start a project faster.

**8** **A 2.0 GPA, above 8 of 63**

That is against the other spreadsheet and database tools we grade, on value, the free plan, features, ease of use and platforms.

**9** **Keep it**

To replace Sheety you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

## The report card

### Best for a quick JSON API from a Google Sheet

Sheety turns a Google Sheet into a JSON API, with a free plan and paid tiers by request count. The free plan stops at 200 requests a month and 100 rows per sheet, it works with Google Sheets only, and the site looks unmaintained.

## Sheety

Graded Nov 13, 2026

| SUBJECT | GRADE | COMMENT |
|---|---|---|
| **Value for money** | C | $9.99 a month for 50,000 requests and 1,000 rows per sheet, which is mid-range, and the tiers climb to $79.99. |
| **Free plan and trial** | C | A free plan, but 200 requests a month and 100 rows per sheet is a cap you'll hit quickly. |
| **Features** | C | Read, write, edit and delete over a REST API, with templates. Google Sheets is the only source named. |
| **Ease of use** | C | A web service where you connect a sheet and call the API; no store rating on record. |
| **Platforms and integrations** | C | Web only, Google Sheets only, with no desktop or phone apps. |

**Grade point average** — Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

### Who Sheety is for

- ✓ Fits if you want a throwaway API for a sheet with a few dozen rows
- ✓ Works for people building a small prototype who only use Google Sheets

### Who it is not for

- ✗ Skip it if you use Excel or CSV files, as the site names Google Sheets only
- ✗ Tight if you stay free: 200 requests a month and 100 rows per sheet
- ✗ Pricey if you outgrow 1,000 rows, since the next tier is $29.99 a month
- ✗ Watch out: the footer carries a 2024 copyright and the About page is unfinished template text

## Good to know

### Good for

- ✓ Prototypes that need live data without building a backend
- ✓ Freelancers giving clients a spreadsheet they can edit as a CMS
- ✓ Small sites staying within the 200-request free plan

### Worth knowing

- ⓘ The free plan stops at 200 requests a month and 100 rows per sheet.
- ⓘ It works with Google Sheets only; the site mentions no Excel or CSV upload.
- ⓘ Pricing is monthly only on the page; no yearly option is shown.
- ⓘ The site footer carries a 2024 copyright, and its About page is unfinished template text.

From our grade for features

### RESTful JSON API

Data goes in and out of a spreadsheet through simple HTTP requests and URLs, which works with anything that can reach the internet.

### Read, write, edit and delete

Every plan, including the free one, allows all four operations on a connected sheet, with unlimited projects.

### Prebuilt templates

A library of templates offers code that can be downloaded and customized to start a project faster.

### Spreadsheet as a CMS

The site suggests using a sheet to populate client website content such as headings or opening times.

### Managed hosting

Sheety says it manages servers and uptime, so the API needs no backend of your own.

### Request and row tiers

Plans scale from 200 to 1,000,000 requests a month and from 100 to 500,000 rows per sheet.

PART 04 · STANDING

# Where it stands

Its grades against its category, and whether to keep it or make your own

**8**/63

Other spreadsheet and database tools it is graded above

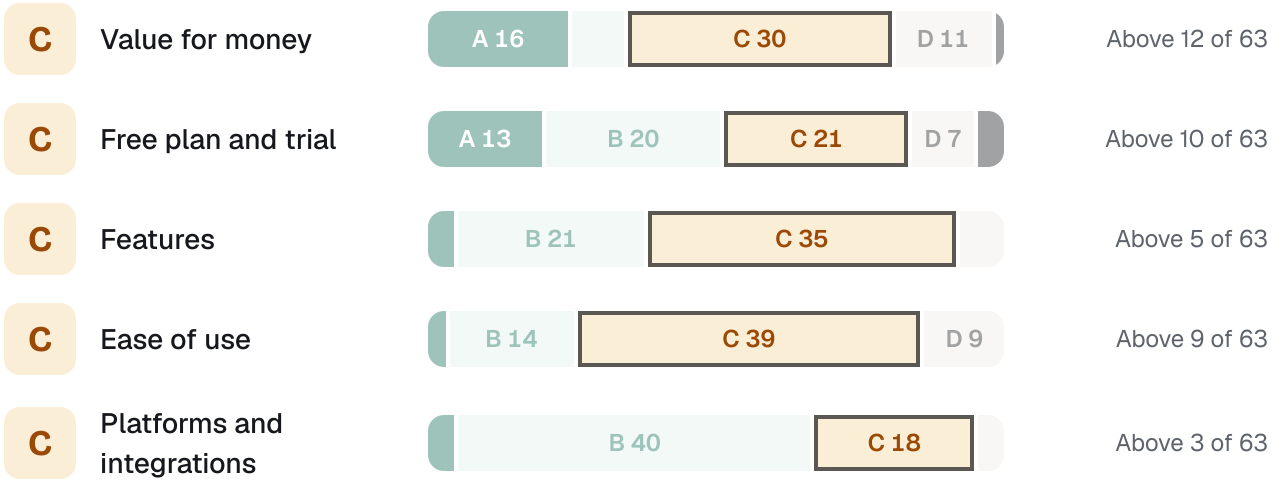

Sheety's GPA of 2.0 is higher than 8 of the 63 other spreadsheet and database tools we grade, and level with 8.

Its paid plans start at $9.99 a month, against a middle price of $12 for the category: 17 of the 47 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 17 tools score higher and cost less.

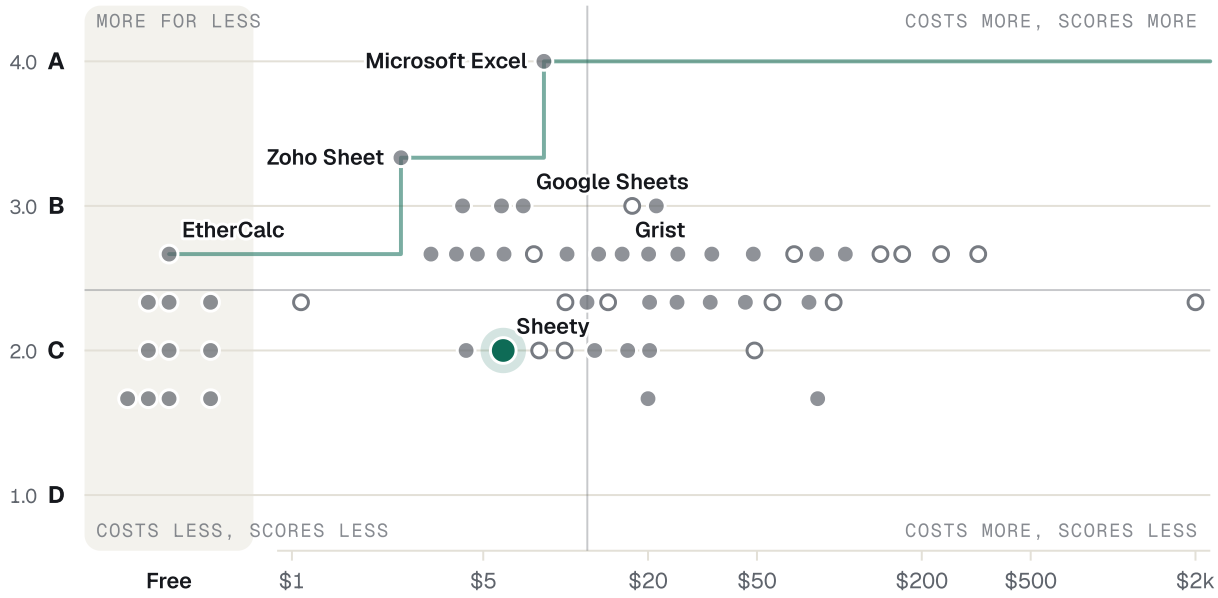

## Each grade against the category

Every bar is all 64 spreadsheet and database tools we grade, cut by the letter each got. Sheety's own letter is outlined.

## Price against what you get

Each dot is one of 59 spreadsheet and database tools. Further left costs less; higher up scores better on features, ease of use and platforms. Sheety is the marked dot.

What paid plans start at, a month (each step along is roughly double)

## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

### Keep it

To replace Sheety you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 47 of the 63 other spreadsheet and database tools grade higher. It costs $119.88 a year.

**What you could make**

- Templates: an app builder makes this well.

**What you could not**

- A builder that other people can use without writing code.

- A spreadsheet engine with its formulas.
- It plugs into other products, Google Sheets among them, and has an API.

**What this rests on.** Sheety's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
