Who Shipbubble is for

- ✓ Fits if you ship in Nigeria and want to compare couriers without a subscription
- ✓ Works for stores that want branded tracking and automations

Who it is not for

- ✗ Skip it if you want a price list, as rates depend on the courier chosen
- ✗ Watch out: the pricing page shows one plan in naira and does not say if others exist
- ✗ Tight if you want a desktop app, as there is none listed
- ✗ Not for you if you need coverage outside the courier list, as unlisted couriers will not appear
- ✗ Watch out: the free trial is 7 days

Good to know

Where it stands

Its grades against its category, and whether to keep it or make your own

69/80

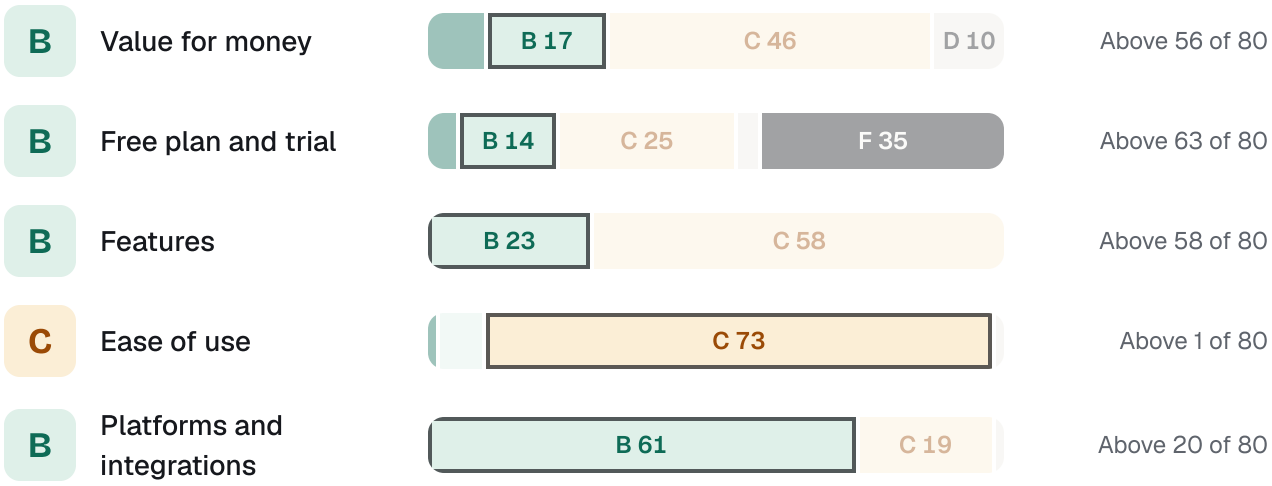

Other shipping software it is graded above

Shipbubble's GPA of 2.8 is higher than 69 of the 80 other shipping software we grade, and level with 6.

It stands best on free plan and trial (B, above 63 of 80) and worst on ease of use (C, above 1).

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. Shipbubble's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Shipbubble you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.8 is higher than 69 of the 80 other shipping software we grade.

What you could not

- ✕ Discounted carrier rates and labels, which take an agreement with each carrier.
- ✕ Connections to other products, each kept working as those products change.
- ✕ A real app for iOS and Android. Something home-made would be a web page.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Shipbubble's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
