Where it stands

Its grades against its category, and whether to keep it or make your own

12/80

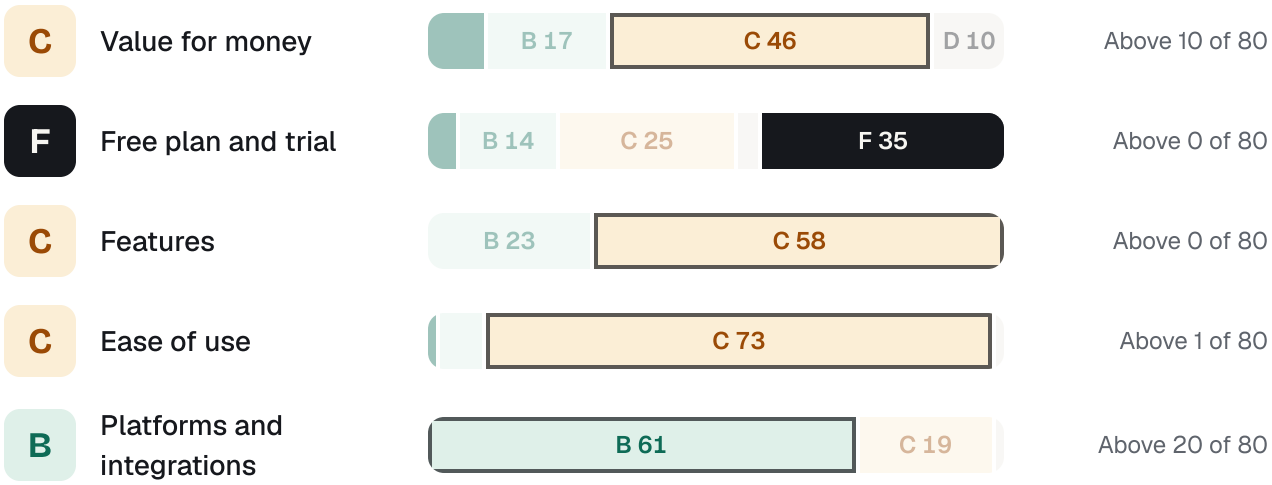

Other shipping software it is graded above

ShipGlobal's GPA of 1.8 is higher than 12 of the 80 other shipping software we grade, and level with 18.

It stands best on platforms and integrations (B, above 20 of 80) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. ShipGlobal's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace ShipGlobal you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 50 of the 80 other shipping software grade higher.

What you could not

- ✕ Discounted carrier rates and labels, which take an agreement with each carrier.
- ✕ Connections to other products, each kept working as those products change.

What this rests on. ShipGlobal's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
