Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 31 of the 80 other shipping software we grade

ShipMonk is a third-party logistics company that runs its own fulfillment centers and the software that goes with them. It stores products, ships orders for online sellers and retailers, and handles returns. Pricing is built per customer from storage, fulfillment, special projects and shipping.

To get you started, here are **7 things to know about ShipMonk**, taken from its own pages and our grades.

> **The pricing page publishes no figures and sends you to a proposal, and fees climb with every extra service.**
>
> From our report card of ShipMonk

1 **Best for outsourced ecommerce fulfillment**

ShipMonk is a warehouse service that handles online and wholesale orders from one provider, with its own software to run it.

2 **It runs on Web**

Web.

3 **Fulfillment centers**

The homepage describes 12+ fulfillment centers on 7 campuses, used for DTC, marketplace and retail orders.

4 **Warehouse and order software**

A proprietary platform combines order, warehouse and inventory management, with reporting and analytics.

5 **Virtual Carrier Network**

ShipMonk's own shipping program that it says delivers orders on time at lower rates, including 2-day options.

6 **A 2.0 GPA, above 31 of 80**

That is against the other shipping software we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace ShipMonk you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for outsourced ecommerce fulfillment

ShipMonk is a warehouse service that handles online and wholesale orders from one provider, with its own software to run it. The pricing page publishes no figures and sends you to a proposal, and fees climb with every extra service. If you need a cost per order before you start talking, skip it.

TOOLGPA REPORT CARD — **ShipMonk** — Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No prices published; the pricing page leads to a request for a proposal. That leaves it mid-table by default.
Free plan and trial	F	Nothing free or trial-based on record; the pricing page leads to a proposal request.
Features	B	Storage, fulfillment, B2B and direct orders, returns, its own warehouse software and international orders handled like domestic ones. Special projects are billed separately.
Ease of use	C	No store rating on record. Store connections and inventory transfers are work before the first order ships.
Platforms and integrations	B	Web only, but it links to Shopify, BigCommerce, eBay and Loop Returns, and has an API.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who ShipMonk is for

- ✓ Fits if you are a growing online brand that wants storage and shipping done for you
- ✓ Makes sense if you sell both to shoppers and to retailers and want one provider

Who it is not for

- ✕ Skip it if you want a price list, because there isn't one
- ✕ Pricey if you add services: returns, lot control and gift messages each raise the bill
- ✕ Watch out: custom packaging is billed as an extra item during pick and pack
- ✕ Watch out: bonded warehouses are a separate service

Good to know

Good for

- ✓ Growing online brands outsourcing fulfillment
- ✓ Sellers who need B2B and DTC from one provider
- ✓ Brands that want fulfillment data in one platform

Worth knowing

- ⓘ No prices are published; the pricing page leads to a request for a proposal.
- ⓘ Fees are split into storage, fulfillment, special projects and shipping, and rise with services such as returns, lot control and gift messages.
- ⓘ Custom packaging is billed as an additional item during pick and pack.
- ⓘ ShipMonk says international orders are processed like domestic ones, and bonded warehouses are a separate service.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

ShipMonk's current pricing could not be confirmed from its own site.

> **No prices published; the pricing page leads to a request for a proposal.**

Fulfillment centers

The homepage describes 12+ fulfillment centers on 7 campuses, used for DTC, marketplace and retail orders.

Warehouse and order software

A proprietary platform combines order, warehouse and inventory management, with reporting and analytics.

Virtual Carrier Network

ShipMonk's own shipping program that it says delivers orders on time at lower rates, including 2-day options.

Returns and special projects

A return portal lets sellers set how returns are handled, and extra services cover labeling, lot control and gift messages.

International and B2B

Ships to 200+ countries and offers cross-border and B2B fulfillment, plus bonded warehouses.

Integrations

Connects to more than 100 shopping carts, marketplaces and tools, and offers API and developer tools.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

31/80

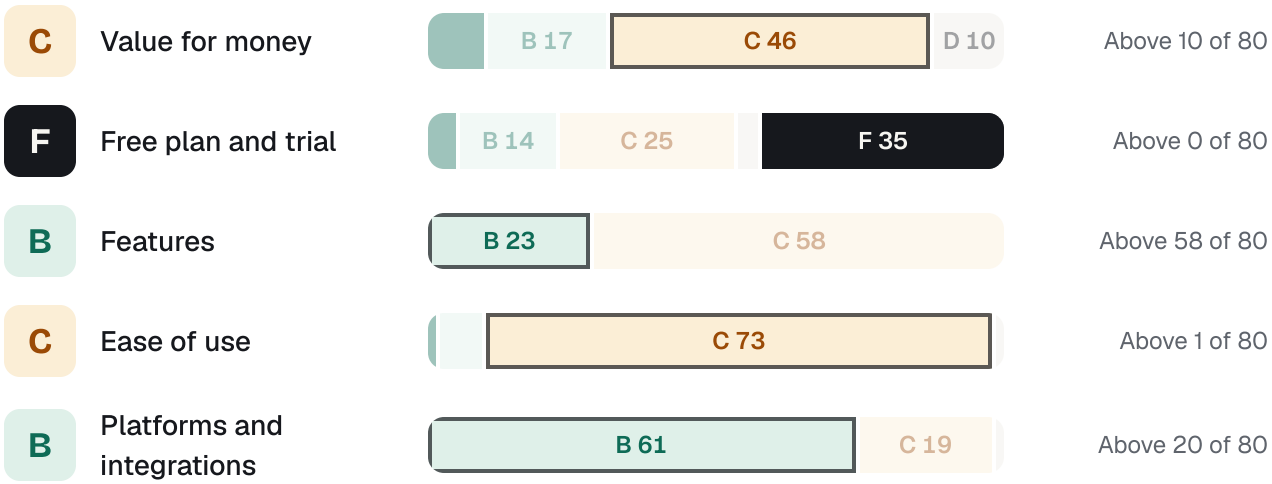

Other shipping software it is graded above

ShipMonk's GPA of 2.0 is higher than 31 of the 80 other shipping software we grade, and level with 10.

It stands best on features (B, above 58 of 80) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. ShipMonk's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace ShipMonk you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Inventory: an app builder makes this well.

What you could not

- Discounted carrier rates and labels, which take an agreement with each carrier.
- It plugs into other products, Shopify, BigCommerce and eBay among them, and has an API.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. ShipMonk's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
