Shipper is a no-code AI app builder that turns a plain-English description into a hosted web app, mobile app, online store, Chrome extension or chat bot. It also lists an AI Advisor chat for copy, design and product advice, and a feature that finds local businesses without a website and builds one. Plans are sold by monthly credits per user.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

23/89

Other AI app builders it is graded above

Shipper's GPA of 2.2 is higher than 23 of the 89 other AI app builders we grade, and level with 27.

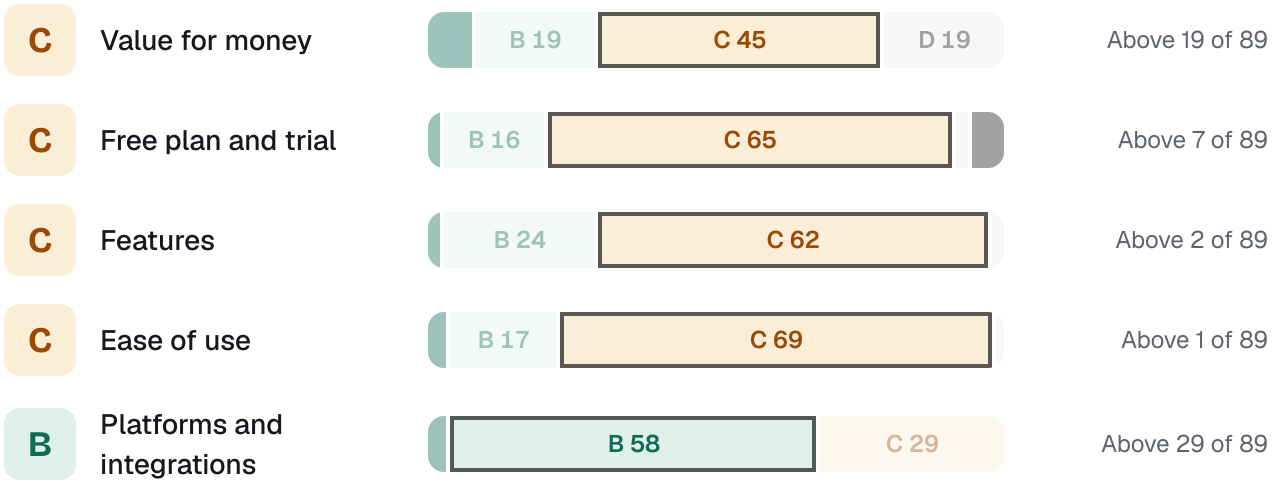

It stands best on platforms and integrations (B, above 29 of 89) and worst on ease of use (C, above 1).

Its paid plans start at $25 a month for each person, against a middle price of $20 for the category: 61 of the 82 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 20 tools score higher and cost less.

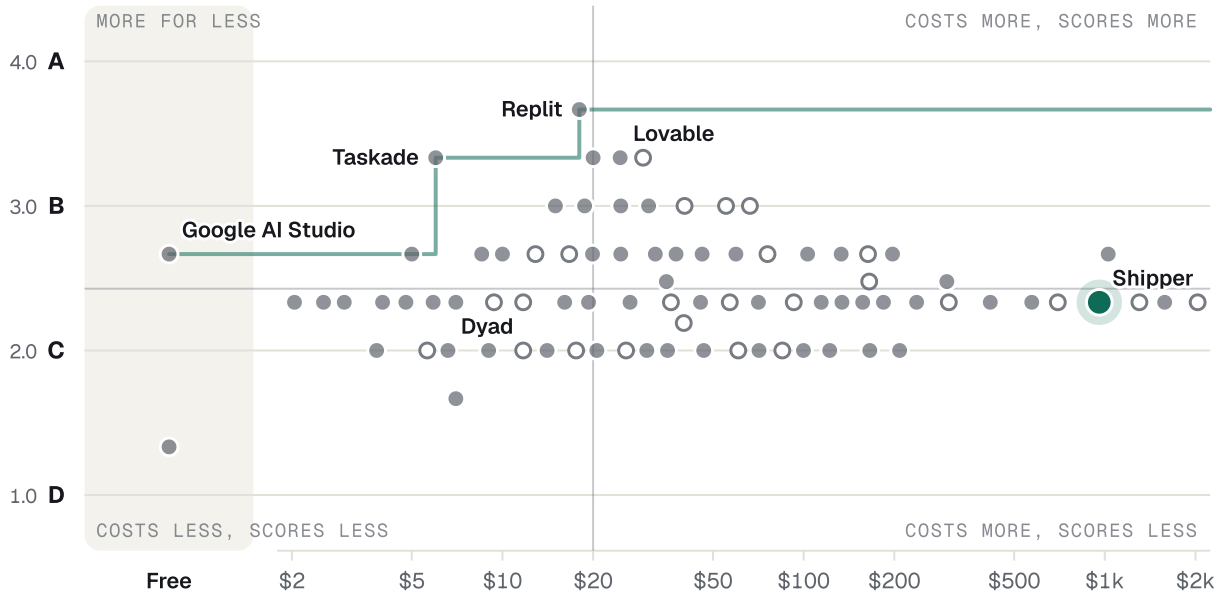

Each grade against the category

Every bar is all 90 AI app builders we grade, cut by the letter each got. Shipper's own letter is outlined.

Price against what you get

Each dot is one of 85 AI app builders. Further left costs less; higher up scores better on features, ease of use and platforms. Shipper is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Shipper you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 39 of the 89 other AI app builders grade higher. It costs $300 a year.

What you could not

- ✕ A tool that builds and hosts other apps.
- ✕ A builder that other people can use without writing code.

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ A chatbot builder hooked into the messaging apps.
- ✕ It is priced for each person, which means accounts and billing for a team.
- ✕ It plugs into other products, Stripe, Shopify and Google among them.

What this rests on. Shipper's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
